Amazon

Continued from A11

The company announced this year that it planned to hire hundreds of people to staff the new stores.

The Factoria store "has hundreds of employees," Hass said in an email. "This number is similar to our other Amazon Fresh Stores and comparable to other major grocers."

Amazon has not yet announced a date for the opening of the Central District store, and declined to say whether that store would also have cashierless technology. Though not much of that store's interior is visible from the sidewalk, glimpses inside indicate that its shelves are close to fully stocked.

In Washington state, in addition to its two Amazon Fresh grocery stores, Amazon also operates six Amazon Go cashierless convenience stores, 11 Whole Foods locations and a handful of other physical retail storefronts, including Amazon Books and Amazon 4-star stores.

A traditional cashier checkout is also an option at the first Amazon Fresh in Washington that also has a cashierless technology option, seen on opening day Thursday in Bellevue, Washington.

Housing

Continued from A11

"There are so many factors that brought us to this point that the inevitable correction of the market is going to look more like a large ship slowly turning, not the speedboat that we saw in 2008," Highland said.

The inventory of homes for sale dropped again in May, this time to less than a month, the lowest level reported in

the 30-year history of the Regional Multiple Listing Service. A market is considered balanced between buyers and sellers when there is four to six months of inventory.

If sales continue at the same pace, the home inventory would take less than three weeks to zero out all the available homes on the market.

Since June 2020, the supply of homes to sell has idled around one month, according to the listing service.

May 2021 housing stats

New listings: The 3,971 Portland metro area homes introduced to the market in May marked a 2.3% decrease from the 4,065 new listings in April, according to the latest listing service report. Last month's new listings marked a 16.1% increase from the 3,419 new listings in May 2020.

Pending sales: In the Portland metro area, the 3,717 homes that received an accepted offer in May signaled a 9.3% increase compared to April and a 19.4% spike from May 2020, according to the report.

Closed sales: In May, 3,183 residential properties in the Portland metro area were sold — an increase of 8% from the 2,946 that closed in April, and a 62.1% jump from the 1,963 closings in May 2020, the report shows.

Time on the market: The average time Portland metro residential properties were for sale last month before receiving an acceptable offer dropped to 22 days.

Flights

Continued from A11

Delta Air Lines Inc. is more than 20% behind pre-pandemic capacity and United Airlines Holdings Inc. is more than 30% below. American didn't immediately comment on the difference.

American and other airlines have had trouble matching their desire to offer flights with their ability to assemble crews, although it expects to complete training for furloughed pilots by the end of June. The airline said it dropped

flights in markets that have other options for passengers and is working to make schedule changes in advance of travelers' departure dates.

Southwest Airlines Co. canceled about 200 flights Monday — the most among U.S. carriers, according to tracker FlightAware.com — and 30 more on Tuesday ahead of summer storms that were expected to push across much of the U.S. South and Northeast, including the New York City area, Washington and Philadelphia, a spokesman said. About 480 Southwest flights, or 13%, were delayed

Monday, FlightAware data showed, followed by 12% at American.

U.S. carriers have struggled to match the supply of aircraft and crews with soaring demand for air travel. The seven-day average number of passengers exceeded 1.9 million for the first time since the pandemic, according to Transportation Security Administration tallies of people going through security at U.S. airports.

While raw passenger counts have been climbing steadily as infections and deaths fall, the trend coincides with the traditional increase as the

summer travel season approaches. As a result, the number of people flying has remained at about 73% of 2019 levels, including for all of June.

"We're just seeing a rocket ship straight up to where we were prior to the pandemic domestically," said Dennis Tajer, an American captain and spokesman for the Allied Pilots Association. About 1,000 American pilots retired early or left the airline voluntarily during the pandemic as U.S. carriers sought to reduce headcount to match gutted demand.

American's scheduling system,

which has long been a sore point between the carrier and its pilots union, hasn't kept up with the expanded schedule, he said. "We're disappointed that management is surrendering to reducing the schedule rather than working with APA to create solutions to fly the schedule."

Aviators who have been
