Nathan Howard/AP

A paramedic treats a man experiencing heat exposure during a heat wave in Salem on Saturday.

Heat wave

Continued from A1
The NWS said that tied an all-time record and was the first time the area recorded two consecutive triple-digit days since records began being kept in 1894.

Records were being broken across the region, and the sizzling temperatures were expected to get even hotter Monday before beginning to cool Tuesday.

There were also power outages. Portland General Electric said about 3,000 customers were without electricity in the greater Portland area Sunday afternoon. Puget Sound Energy reported 3,400 customers down in the greater Seattle area.

The heat wave stretched into British Columbia, with the temperature in Lytton, a village in the Canadian province, reaching 115 Sunday afternoon, marking a new all-time high recorded in Canada.

A heat warning is in effect for most of Western Canada and the country's weather agency says numerous daily temperature records have been shattered across British Columbia, which is directly north of Washington state.

It got so hot in Seattle on Sunday the city parks depart-

ment closed a community pool in the southern portion of the city because of "unsafe, dangerous pool deck temperatures."

King County closed several COVID-19 testing sites because of the heat. Seattle opened additional public library branches Sunday, and will again Monday, to provide additional cooling centers, The Seattle Times reported.

Seattle's light rail trains may have to operate at reduced speeds because of excessive heat on the tracks, causing delays that could continue into the work week, Sound Transit said Sunday.

The heat wave also moved into Idaho, where temperatures above 100 are forecast in Boise for at least seven days starting Monday. Ontario, a city near the Idaho border in Oregon, could see at least a week of triple-digit temperatures, including a high of 109 Wednesday, forecasters said.

Cities were reminding residents where pools, splash pads and cooling centers were available and urging people to stay hydrated, check on their neighbors and avoid strenuous activities.

Ironman still on

Still, about 3,000 athletes participated in an Ironman Triathlon in Coeur d'Alene,

John Froschauer/AP

With the Space Needle in the background, members of a Seattle Tibetan Choelsum Bhumo dance group record a video for an upcoming virtual festival in the morning during a heat wave hitting the Pacific Northwest on Sunday.

Craig Mitchell/Dyer/AP

Justin Swanner and his dog Havoc swim in the Clackamas River to escape the heat in Oregon City on Sunday.

Idaho, on Sunday. The race start was moved up to 5 a.m. The event includes a 2.4-mile swim, a 112-mile bike ride and a 26.2-mile marathon run (a 3.9-kilometer swim, a 180-kilometer bike ride and a 42-kilometer run).

Race organizers said they had 62,000 pounds of ice at hydration stations, misting stations and chilled towels to hand out to athletes. The Coeur d'Alene Fire De-

partment brought in extra firefighters and paramedics because they usually see extra dehydration calls during the event. Rather than a crew of 17 firefighters, they had a crew of 60 on Sunday.

Ironman medical tent coordinator Stan Foster said 525 people were in the medical tent during the 2015 Ironman, when temperatures also rose into the 100s. Five people went to the hospital, he said.

"The biggest thing that we tell people is, No. 1, don't try to set a record on your race. Go slow. Enjoy your day. It's going to be hot," he said. "And then don't just drink water."

The National Weather Service in Coeur d'Alene said this week's weather "will likely be one of the most extreme and prolonged heat waves in the recorded history of the Inland Northwest."

"The scorching weather was caused by an extended 'heat dome' parked over the Pacific Northwest. Kristie Ebi, a professor at the University of Washington who studies global warming and its effects on public health, says the dayslong heat wave was a taste of the future as climate change reshapes global weather patterns.

The high temperatures were forecast to move into western Montana beginning Monday.
