

For time-strapped **local journalists**, it's never been more important — or more challenging — to deliver the reporting their communities need

That's why we built **Pinpoint**, using Google's best search, artificial intelligence, and machine learning technology to quickly search and analyze thousands of documents, including text, images, audio, and even handwritten notes.

It's also why we train thousands of local journalists on digital skills, resources, and tools that help them work more efficiently, creatively, and securely.
