The Silver Bryan Club of Burns is increasing in interest and numbers every day. A decided step should be taken by the silverites of this county to organize a club in every precinct. C. A. Mrs. Sweek canned 84 gallons of huckleberries. When it was first seen it was in six feet of a hay stack and had caught in a plank fence between the house and barn. The alarm was given and a crowd gathered almost instantly and quickly smothered the fire. The cause of the fire is not known, and most likely was caused from a spark lighting in the manure from some stove pipe. Tom Lahey has a model of his own invention, which he will endeavor to have patented. This model if a success, and many who have examined it declare it cannot help but be, will in a great measure revolutionize the gearing and power of nearly all kinds of machinery, wind mills not excepted. It has no central force, or "dead center" as the term is used, but is so constructed that all points are equal, and one turn of the wheel gives two strokes to the shaft. It is argued that this invention will not require the acceleration and power or not so much as is necessary to run machinery geared, as at this time, it will do away with many cog wheels and the friction will be lessened. An attempt is being made by some of our leading citizens to establish a kindergarten in Burns. For the benefit of our readers who do not fairly understand the especial benefits of a kindergarten, we explain that its value, in training small children, is great indeed. It is an infant school, intermediate between the nursery and the primary, in which play is combined with a certain amount of educational training, being based especially upon object lessons and in teaching the child to produce simple articles or objects of an elementary kind; it develops the thinking faculties and induces habits of order, manliness, politeness and a grammatical construction of sentences, phrases and language, such as used by small children. The impression is made on the child almost in its infancy, to shun evil, selfishness and to pursue what is good and honorable. A kindergarten when properly taught, its value to small children toward forming the character of the child and its future usefulness, can hardly be estimated.

Rev. DeForest, of Baker City, was called upon to marry a couple lately. The young man was very much excited but was trying to put on a bold face for the emergency. To show that he was not frightened in the least he concluded to ask the minister if it was customary to kiss the bride. After stuttering for some time he finally broke out: "Is cussing kistomary?"
