It is a hard blow to the fond parents with whom all their friends truly sympathize. Rev. Jones conducted the funeral services.

—We hope our city authorities will take steps to drain the water from the lower part of town. This thing of ditching and draining the upper portion of town thereby conveying the water to another part of the place submerging houses and premises for weeks is not agreeable to property owners who have to stand the inconvenience as well as probable damage and sickness likely to ensue.

—Fred Lunaberg returned last Sunday from his visit to Colorado, Salt Lake and other places. He brought with him some rich specimens of ore, both gold and silver, taken from the mines at Cripple Creek and vicinity. He reports thousands of idle men everywhere begging for work. The one getting work at a fair compensation is the exception. Plenty of work in the silver mines if it paid to work them but since the demonetization of that useful circulating medium the mines have closed down, resulting in the discharge of thousands of laborers. This is not only killing on the mining laborer himself, but the want of it in circulation reaches the households of all American citizens except the favored few who handle the gold.

—It is the general opinion in political circles that the senate will refuse to seat Gov. Lord's appointee to the senate, but the Gov. himself thinks the conditions not being similar to the general run of such cases, he may be seated, as the legislature failed to organize. Cases heretofore have been a failure to elect after organization and the senate under such conditions refused to confirm.

—J. S. Bowen gave us a clipping taken from, we presume, a paper published at Hailey Idaho, giving a lengthy account of the marriage of his daughter Alice and Charles F. Nelson which took place in Hailey some time since. From the account given it must have been a very elaborate affair, the house where the ceremony was performed was handsomely decorated for the occasion. The invited guests were 24 in number, but about 200 partook of the bountiful repast prepared. After supper the whole assembly adjourned to the ball room which was also handsomely decorated and ended the wedding festivities with a hop.

—The question of a permanent organization of the silver element of this county has not yet been settled. Several meetings have been held in this place, but really no definite steps have been taken towards permanent organization. We cannot understand how this element can be divided on this subject, nor can we see any excuse for delay. In conversing with silver men we find them intensely interested and still we are slow about the most important step towards success,—organization. In unity there is strength and divided little, if anything, can be accomplished. For men to hesitate to interest themselves in an act of vital importance, because some old fogy, or young fogy, insists on some movement or name which is repugnant to the majority, is not a sufficient cause to throw the matter up.

The Battle-Ship Oregon.

San Francisco, March 6.—All sorts of rumors have sprung up on the water front in regard to the sailing of the battle-ship Oregon. The reports have varied greatly, some being that she was to start next week on a trip to Seattle, to go on drydock. A small sensation was created today by the river steamer J. D. Peters going alongside and discharging into the Oregon a large cargo of flour. It was an indication that the battle ship is preparing for a long cruise, and water front prophets said that the war vessel was getting ready for a voyage to Cuba, in case of war with Spain. The cruiser Philadelphia has already started toward Cape Horn, and though report has it that she will return this way in a few weeks, the water front wise-acs believe that only enough vessels to protect the Pacific coast will be left on this coast.
