

Cannonading to produce rain has been tried in the semi-arid sections of the West until those in charge of the experiments have been convinced that there is nothing in it. Prof. Willis Moore, of the Weather Bureau says: "The great process going on in the atmosphere are conducted on too large a scale to warrant any man or nation to attempt to control them. The energy expended by nature in the production of a hail-storm, a tornado, or a rainstorm exceeds the combined energy of all the steam engines and explosives in the world. It is useless for mankind to combat nature on this scale." Explosives are being used in France, however, and horticulturists over there are of the opinion that they do much good.

The date for the second annual Harney county fair has been set for the week beginning September 16 and ending September 21, both inclusive. New features have been added which will make it more popular this year than last. We are authorized to say that the premiums on farm produce and stock will be larger than last year and those particular industries will be the main features. The business men of Burns certainly see the benefit of this annual fair and there is no doubt that all will respond liberally toward making it a greater success than ever. It depends on the energy and interest of our business men.

The wool growers of the interior should make it a point to be in Ontario on June 25th and meet the wool buyers here. At that time it might be advisable for the growers to form an association and pool their wool for sale as has been quite successfully and profitably done by the growers of Wyoming and Idaho, where associations were formed at Rawlins, Mountainhome and Caldwell. Assurance has been given that quite a number of wool buyers will assemble in Ontario on June 25th, and it would undoubtedly prove to the interest of the growers to meet them here on that date.—Ontario Argus.

The visit of F. H. Newell, chief hydrographer of the Geological survey, to Eastern Oregon next month is hailed with much satisfaction by the farmers. That it will be of great benefit to this particular section, there is no doubt. With the assistance of the government and the water properly utilized we could irrigate a large portion of this valley which is all that is necessary, ordinarily for an abundant crop. We call attention to the proposed method of irrigation on our first page.

Our age is revolutionary. Even such an old proverb as "love laughs at locksmiths" has been discredited by a Paris mother who kept her daughter locked in a room for twenty-five years to prevent her marriage to an undesirable lover, and by an Oakland father, who prevented an elopement by having his daughter arrested for vagrancy.—Stockton Mail.

At Salem last week Judge Hamilton in the circuit court gave judgment on the presentment submitted by the grand jury in the case of George W. Davis, clerk of the board of school land commissioners in 1890, who was charged with a shortage of \$31,000 in his accounts. The court held that the case is outlawed. As a result the grand jury dropped investigation of the case.

While there has been a disposition among our taxpayers to "kick" at the high levy of the

past few years, all will feel better to learn that a call has been made by the treasurer for all county warrants registered prior to June 14, 1901. It will come easier next year.

A western editor said that silver buckles on garters were becoming fashionable and that he hoped "to see more of them." His wife sued for a divorce, and the only woman in town who had silver buckles on her garters cowhided the editor until he was as raw as a potato.

If everyone will do their best to make the Fourth of July celebration a success we will have a grand time. Don't go at it in a half hearted manner. Give our neighbors in this section of the country the best time of their lives.

Vol. 1 No. 3 of the Pacific Miner, a journal devoted to mining, reached our table this week. It claims to be the only periodical in Oregon devoted exclusively to the treasures of the earth.

Some of the grain crops in this section that were so badly knocked out by the recent frost are recovering and it is thought that a very good yield will be realized yet.
