Dr. L. E. Hibbard and Rev. A. J. Irwin have spent the past two weeks in the Stein Mountain section where the doctor desires to catch two or more antelope fawn. It is understood that antelope will not propagate in confinement and Dr. Hibbard desires to give the matter a thorough test. He already has two domesticated and says that it is only a matter of a short time until the prong-horn antelope is extinct, as civilization is driving them farther back into isolated sections and they are becoming scarce.
