JULIAN BYRD — Manager

The sealed bid system has proven unique in the sale of this year's wool clip all over Eastern Oregon, and had all the sheepmen waited for the sale days under the management of The Oregon Woolgrowers Association, they would be thousands of dollars a head. Uphold this integrity of our Woolgrowers Association and you are sure to profit thereby.—Ex.

Myrtle Creek Enterprise says: There are better and higher reasons why a man should be honest than because it's the best policy. We are all under a moral obligation to do right and be honest. It is the provision of the higher law and an obligation we owe to our fellow men as well as to our Creator. But putting aside for the time being this higher law and obligation, we remark that honesty is the best policy from a purely selfish point of view. It is not right in itself but it "pays." It pays in self-approval and satisfaction which it brings to him who practices it and also in the approval of his neighbors and acquaintances. When everybody says of a man, "He is honest as the day is long," or "His word is as good as his bond," they are helping to advertise his business, and thereby making good the proverb that "Honesty is the best policy." It is better than this advertisement or the approval of neighbors and acquaintances, is the approving conscience, which, when a man goes to bed at night, tells him that in no act of the day he departed from the line of strict rectitude. Honesty is not only the best policy in the increase of trade and business that it brings in the long run, but it brings big dividends in the way it tends to bring sound sleep, to improve the appetite and digestion and to save doctors' bills. It is the best policy in every way, and if a man does not recognize any higher obligation to be honest he should be honest because it is the best policy.

BONTA'S REPRESENTATIVES COMING.

J. S. Hutchins, the man who knows as much about the Bonta railroad as any other man save and except the Major and Doc. Faull, slipped through our little town Wednesday enroute for Burns. He was accompanied by two gentlemen who are presumably officials of the road, although their names were not obtained nor was their identity revealed.

Mr. Hutchins is a quiet unostentatious gentleman who concerning the progress Major J. W. Bonta is making with the road was inclined to be reticent. Incessant interrogation as to the when, why and howness of the railroad finally brought forth the remark "that Dr. Faull knows and whatever he says is authentic."

Several weeks ago Doc. was in here buying up power plants and at that time was buttonholed by a Miner man who was promised an annual over the road to take effect January 1st, 1906.

The doctor said that he was certain from assurances given him that the Bonta road would reach Prairie City in the next four months. Durkee (not Dufur) was its initial point and it would come steaming into the valley on a standard gauge track.

Mr. Hutchins' statement "that Dr. Faull knows" is corroborative evidence and establishes an indisputable presumption which proves by circumstantial evidence the existence of the road de facto.

Mr. Hutchins went on to Burns and will work back this way in the interest of the road. They want to become familiar with the country and its resources both actual and potential and with this

end in view will give it careful study.—Prairie City Miner.

Mr. Hutchins and party have not yet put in an appearance here as yet, at least The Times-Herald has no knowledge of them. The proposed electric line of Major Bonta at one time was given considerable attention by our people, but of late nothing had been heard of it. Should his representatives visit us they will be well received and shown every courtesy.

SENATOR MITCHELL'S MOTION IS DENIED.

Portland advises of last Saturday state that Judge DeHaven, of the United States district court, had denied Senator Mitchell's motion for a new trial. He also refused to heed the motion for arrest of judgment and refused to refrain from sentencing the defendant upon the sixth count of the indictment, upon which it was claimed the government presented no evidence. Upon Senator Thurston's motion for time to file a bill of exceptions, the court granted ten days.

THE SHEEP INDUSTRY.

America is becoming yearly more of a sheep raising and mutton eating country, writes the Washington correspondent of the Chicago Tribune. This is due primarily to the initiative of the department of agriculture which for the last ten years has been hammering at the farmer to raise sheep instead of exporting this surplus grain, and which has helped him in every way to this end.

One result is that there were reported on the first of this year 45,000,000 sheep on the farms and ranches of the United States, valued at \$127,331,855, as against less than 38,000,000 in 1899. The receipts of the Chicago stockyards are reaching upward every year since 1894, when the yard took over a million more mutton sheep than in the previous year.

The department is anxious to impress on the farmer the value of sheep as one of his farm products, and it points out that, while the sale of \$1000 worth of corn takes from the soil \$300 worth of fertility, the farmer would have to spend that much in fertilizers to recoup the land. The same amount of corn converted into good mutton and sold at a higher price than the corn would fetch, takes in the end from the land not over \$50 worth of fertility, and if the flock was kept for wool alone it would not reduce the value of the more than \$3 to \$4.

There is particular interest attaching to the sheep raising problem just now, because the price of mutton is going up by leaps, not only in the stores where the customer has to buy it, for every one realizes this but in Chicago, where lambs recently have touched the unprecedented figure of \$8 per hundredweight, and are now selling at about \$7.25.

The Diamond Cure.

The latest news from Paris, is that they have discovered a diamond cure for consumption. If you fear consumption or pneumonia, it will, however, be best for you to take that great remedy mentioned by W. T. McGee, of Vanleer, Tenn.

"I had a cough, for fourteen years. Nothing helped me, until I took Dr. King's New Discovery for Consumption, Coughs and Colds, which gave instant relief, and effected a permanent" unequalled quick cure for Throat and Lung Troubles. At City Drug Store; price 50¢ and \$1, guaranteed. Trial bottle free.

Wanted More of the Same.

About a year ago Dr. Gray lost a wallet containing a large sum of money. He offered a liberal reward for its return, but the party who found it thought the whole thing was better than the reward. The other day the doctor entered his coal house and the first thing he saw was his wallet, and protruding from the end was a card bearing the inscription: "Doctor, please fill this prescription again."—Garden City (Kan.) Herald.

Not an Extravagant Wish.

Stewardess—Madame is unreasonable. I know she is seascick, but she wants too much—she asks for impossible things.

The Stufferer—it's not true—all I want is the earth.—Cleve-

A NEW BREED OF HORSES

DISTINCTLY AMERICAN FAMILY OF COACH HORSES.

Secretary of Agriculture Secures Financial Support From Congress for Purpose --Horse Men All Interested.

According to the Washington dispatches the government is going to develop an entirely new breed of horses that will be a distinctive American type.

Secretary of Agriculture Wilson has given the matter his special study for two years past, and has obtained ample financial support from congress to carry out the idea. The aim is to produce a distinctly American family of coach horses.

The foundation lines of blood have been drawn mainly from the standard bred trotter, but there are large and valuable drafts from Morgan and the thoroughbred.

When the term "coach horse" is used, Secretary Wilson does not mean to have it understood that he is trying to create a fancy animal intended only for show, but rather a strong going, handsome, upheaded horse, able to pull a plow, or make good time on the road to a buckboard or surrey.

Horsemen all over the country are manifesting great interest in the government experiment and looking forward to the highest order of results from it. It is expected that if the undertaking succeeds, congress will authorize other experiments of a similar character in stock breeding.

CORVALLIS & EASTERN.

"Talk of extending the Corvallis & Eastern on to Vale has been premature up to this time, but I now feel the project has taken definite shape," said A. B. Hammond, the well known California capitalist, when seen regarding the continuation of that line, which has been promised so long. "There are too many roads on paper now, and we will not give out detail of our pains until everything has been determined so work can proceed," says a recent Portland dispatch.

Speaking further, Mr. Hammond dwelt on the changes in the state of late years, and from the tenor of his remarks it was inferred that previously he had doubts as to the policy of building the trackage. He denied that the project had been permitted to die, and while he admitted he was not familiar with the progress which had been made late in the preparations, his manner indicated plainer than words that the company is about to launch forth and clear the way for the main line through the promising lands in the eastern part of the state.

Forced to Starve.

B. F. Leek, of Concord, Ky., says: "For 20 years I suffered agonies, with a sore on my upper lip, so painful that I could not eat. After vainly trying everything else, I cured it, with Bucklen's Arnica Salve. It's great for burns, cuts and wounds. At City Drug Store Only 25¢

Periodic Pains.

Dr. Miles' Anti-Pain Pills are a most remarkable remedy for the relief of periodic pains, backache, nervous or sick headache, or any of the distressing aches and pains that cause women so much suffering.

As pain is weakening, and leaves the system in an exhausted condition, it is wrong to suffer a moment longer than necessary, and you should take the Anti-Pain Pills on first indication of an attack.

If taken as directed you may have entire confidence in their effectiveness, as well as in the fact that they will leave no disagreeable after-effects.

They contain no morphine, opium, chloral, cocaine or other dangerous drugs.

"For a long time I have suffered great attacks of pain, which seem almost more than I can endure. These attacks come on every month, and two or three times a month I have never been able to get anything that would give me much relief until I began to take Dr. Miles' Anti-Pain Pills and they always relieve me for a short time. My sister, who suffers the same trouble, takes them with the same results. Write A. H. Miles, 221 S. Michigan St., South Bend, Ind.

Dr. Miles' Anti-Pain Pills are sold by your druggist, and will guarantee that the first package will be sent free. If it fails he will return your money.

50 pieces, 25 cents. Never sold in bulk.

FOR THE MAN AND THE WOMAN WHO KNOW

There's no light rifle like the Marlin .22 repeater, for either target shooting or small game, because it has Marlin accuracy. If you shoot this means everything. The Solid Top, with its wall of metal always between you and the cartridge, and the Side Ejector are features which make it the safest to handle as well as the surest. It shoots short, long and long-life cartridges without any change.

The Marlin 16-gauge Shotgun are the smallest and lightest repeating guns manufactured. A new, well balanced gun of great accuracy. Handles stiff loads safely and well.

Write us about any particular repeating rifle or shotgun you have, our latest Catalogue—Specifications and prices of all our guns and traps are given in full. MARLINS are doing the world over, free for 2 stamp postage.
