An indication of the return of normal financial conditions on the outside is the wheat and other commodities of the northwest are again beginning to move.

The local land office has received telegraphic instructions from Washington to accept final proofs and where proper evidence was shown that applicants had money in banks that could not be drawn out in the present financial flurry, that payment be suspended for thirty days.

The present financial flurry on the outside has had no effect upon the coming of new people into the Harney country and they continue to come and invest. There is certainly no occasion for alarm any way and further no safer investment is now open than the purchase of land especially in this section where it cannot help increasing in value within a very short time.

The Merchants National Bank of Portland was forced to suspend last Tuesday, although it is solvent according to the best authority and will resume business within a short time. It seems that the circulation of malicious rumors by enemies and thoughtless persons caused a steady run during which time \$2,000,000 in cash was paid out to depositors.

You have heard of persons caring themselves. The present financial scare is very much like that of the man who resorted to a big whale story in Seattle in order to get himself placed at a dining table.

The panic starter smiled and sated himself to enjoy the meal's shrewdness had won. The crowds flocked by as news of the whale spread, and soon thousands were on the run to see the deep a monster. The panic man piled still broader, then became eply interested and at last said at there really must be a whale wn there or every body would t be rushing down to see it.

Congressmen Ellis will leave at week for Washington to be attendance upon the opening congress. The East Oregon-give the congressman's views various matters of public in-est and among other things he s: Regarding the matter of leas- the public domain there are ous wishes among his con-ents, so Mr. Ellis says, ile the sheepmen, or at least y of them, seem to favor the . Many others oppose it. The sition is especially noticeable rant, Malheur and Wheeler aties.

That the leasing bill will be sent again this year now s inevitable and it is Con-ssman Ellis' opinion that if erred by the administration it become a law. In the East

there is a general sentiment in favor of charging western stockmen for the use of the public ranges and even if all western members opposed the bill it is doubted if it could be defeated. That being the case, it seems up to the westerners to get "into the bandwagon" and see that the provisions of the law are as favorable as possible.

The chances are quite favorable that should Judge Ellis go in for a land leasing bill that, unless it is quite different from those formerly proposed, he will find a "band wagon" next election in which he cannot ride.

THREE WILL TAKE 33rd DEGREE.
