AUBSORIPTION BATES

been quite unfortunate for those ington and California. who have put in crops and failed, of the present season will be a it in ten days. great help in future and we may gain by it in the long run.

The Vale Oriano issued a special 24 page paper on last Saturday that was quite creditable. The edition was nicely illustrated with half-tone cuts of various scenes in Vale and Malheur county. Such enterprise is commendable and the people of that town and county should appreciate such work as it will advertise that section in a much better manner than the pamphlet sys-

The LARGER the order the LESS it COSTS.

The Stag is one of the latest and best additions to the famous Deere Line of Riding Plows. Is light in weight, simple and durable in construction—full of genuine merit, and has shown its mettle and utility in every test it has been put to. It has amply demonstrated by its good work its right to be classed as a strictly up-to-date, high-class farm tool. It is certain to suit the most critical farmer and be a money-maker and a labor-saver for him.

"If It's a Deere-It's Right"

and does its work perfect case to the operator and team. It is manufactured and sold as a tongueless plow-a tongue not being necessary to best results, but one is supplied at slight cost to those who perfer it that way. The Stag is the implest riding plow built, -- anyone who can hook up a team and drive 'em straight can operate it successfully. It possersos many superior features not found on other plows, and it takes a whole book to illustrate and discribe them, Batter write for it today and all the information you want about this superior implement,
