I bought a bottle of it lands to start a skimming process. By this I mean to grow soil reducing crops like wheat or other cereals year after year and return nothing to the land to compensate for the food elements removed in the crops harvested. Pa. Sold by all good dealers. If dry farmers make this mistake

it will be in spite of the warning of past experiences. The community, the state, the nation and the world have an interest in the store of plant food held in the soil as this is a great treasure house, from which future generations must get their supply of life's necessities.

"The dry farmer cannot grow wheat continuously without inviting disaster. He must include soil improving crops such as alfalfa and peas to keep up the sumus content and nitrogen supply, and must grow livestock in order that the valuable plant food elements may not be need lessly shipped from the farm.'

M. R. Biggs is feeling pretty good as a result of the award of prizes on cattle at the Crook county fair, and for the reason that his trotting horses won all the harness events on the track without any effort. Not only did Mr. Biggs' herd of Shorthorn cattle win all of the first prizes in their class, but they won the sweepstakes for beef @ breeds over all the cattle on exhibition, some of those over which they won the award being prize winners in many of the
