The Stag is one of the latest and best additions to the famous Deere Line of Riding Plows. Is light in weight, simple and durable in construction—full of genuine merit, and has shown its mettle and utility in every test it has been put to. It has amply demonstrated by its good work its right to be classed as a strictly up-to-date, high-class farm tool. It is certain to suit the most critical farmer and be a money-maker and a labor-saver for him.

"If It's a Deere—It's Right"

and does its work perfect ease to the operator and team. It is manufactured and sold as a tongueless plow—a tongue not being necessary to best results, but one is supplied at slight cost to those who prefer it that way. The Stag is the simplest riding plow built,—anyone who can hook up a team and drive 'em straight can operate it successfully. It possesses many superior features not found on other plows, and it takes a whole book to illustrate and describe them. Better write for it today and all the information you want about this superior implement.
