

SCHOOL DAY AT THE FAIR

Free Admission for All School Children in County on Thursday

DRY FARM EXPERT TO SPEAK

Professor Thomas Shaw, Soil Expert, Commissioned by Hill Railroad Interests to Tour Interior Oregon--Has Been Successful in Montana and North Dakota.

The county fair will be held next week beginning on Tuesday and continuing until Saturday evening. Everything will be in readiness and the display of products and livestock will be the best yet seen. The speed and amusement program is one that will be interesting to all.

Thursday has been set apart as school day at the fair when the pupils of all the schools in Harney county will be the guests of the fair management and admitted free to the fair grounds. There will also be some special features added to the regular program for the children. Just what this program will be has not been entirely determined but will be announced later. It is expected to have many of the schools of the county present on that day that they may take part in the afternoon sports and program.

Prof. J. W. Livingston of Forest Grove will be present to instruct in the teachers' institute. He will be invited to make an address at the grand stand during the afternoon. All the members of the county in attendance at the institute will be invited to the institute.

Another feature that is of great importance to the farmers of this section will be an address by Prof. Thomas Shaw of St. Paul on dry farming. Prof. Shaw is expected here during the week of the definite date is not known at the time this is written.

The secretary of the fair has just received a telegram to ascertain what Prof. Shaw may be here but not yet been informed. The institute will be wired as soon as can be and every effort will be made to get the word out to farmers.

Prof. Shaw is an experienced farmer and his talk will be of great interest to our farmers. The following St. Paul dispatch shows that he is a man of affairs and thoroughly acquainted with the subject:

St. Paul, Minn., Sept. 29.—The superintendent will be given to dry farming next month in Oregon. Professor Thomas Shaw, soil expert, is expected here during the week of the definite date is not known at the time this is written.

St. Paul, Minn., Sept. 29.—The superintendent will be given to dry farming next month in Oregon. Professor Thomas Shaw, soil expert, is expected here during the week of the definite date is not known at the time this is written.

miles long and from two to two and a half miles wide and the water is only about five feet deep in the center. Some of the settlers are in favor of draining the lakes while a large majority are in opposition to it as it will dry up large portions of the country bordering on the lakes. Much of the lands bordering on the lakes are sub-irrigated lands which are very valuable, will bitterly oppose the scheme.

"There will probably be long drawn out litigation over the matter before the undertaking is accomplished, if it ever is, but in the course of time the Malheur basin will be one of the largest natural reservoirs in the state and the water that is now drying up in the summer time will be producing immense crops of grain, hay alfalfa and vegetables, as there is enough water in the lakes to irrigate a territory as large as the entire Harney Valley."

INDUSTRIAL NOTES.

(Portland Correspondence.)
A movement to stimulate hog production in the northwest is to be started at a conference of experiment station directors, railroad officials and livestock experts to be held in Spokane October 4. Ways and means to interest farmers in raising more hogs for market will be discussed and it is hoped to start a campaign that will result in a much increased quantity of hogs for the livestock packers. This plan is expected to add very much to the wealth of the three states. Robert Withycombe, superintendent of the Union Experiment Station, will be the Oregon representative.

Mount Hood will be enclosed within a national reserve if the petitions now being circulated for signatures accomplish their purpose. With its snow-capped peaks, great glaciers and dashing torrents, this mountain can be made a great national playground, easily accessible from this city, where thousands of people may seek recreation each summer. It is sought to have the same plan followed as has been done in creating the Mount Rainer reserve.

District fairs in the northwest will probably have a circuit of their own next season so there will be no conflict in dates, as has been the case in the past. It is proposed to call a meeting of representatives of the various fairs in Oregon and Washington with a view to arranging the dates harmoniously. It is hoped to so change the present plan that the district fairs can be operated in connection with the State Fair circuit. Gresham, Pendleton and Canby, in this state, have their fairs on the same dates, September 29-October 1, inclusive, and Secretary Lazelle, of the Canby Fair, has started a movement for the harmonizing of dates.

Hood River gave the glad hand to visitors last week when its Commercial Club held a housewarming in its fine new quarters. Portland people were guests of the apple growers and enjoyed the occasion very much. Hood River can plume itself upon having one of the finest small commercial club homes in the northwest.

Presidential postmasters of Oregon will hold their convention in Portland on October 13 and 14, meeting in the convention hall of the Commercial Club.

You are not experimenting on yourself when you take Chamberlain's Cough Remedy for a cold as that preparation has won its great reputation and extensive sale by its remarkable cure of colds, and can always be depended upon. It is equally valuable for adults and children and may be given to young children with implicit confidence as it contains no harmful drug. Sold by all good dealers.

You will never again be quite as you are today mentally or physically. Perhaps not ever again will you be able to get so "young" a photograph—that looks like you—as today. Visit the Sayer Studio.

THE TRANS-OREGON LINE

Increase in Capital of O. S. L. Indicates it Next Project

TO PASS THROUGH THIS VALLEY

Stockholders Will Vote on Increase of Capital Stock This Month--Oregon to Secure Much of The New Capital on East and West Line Across The State.

Some railroad news of more or less interest to the people of this section has been given publicly during the past week. The following is a New York dispatch:

"Stockholders of the Oregon Short Line Company, controlled by the Union Pacific Railroad, will be asked to approve a proposition to increase the capital stock of the company from \$27,500,000 to \$100,000,000.

"The proposition will come up for approval at a stockholders' meeting October 12 at Salt Lake City.

"All of the stock of the Oregon Short Line is owned by the Union Pacific. Officials of the Harriman lines say that should the increase, which amounts to \$72,500,000, be granted, no new stock would be issued in the near future, but would be held for emergency purposes, although the expectation is that the money will be used for new construction on the Oregon Short Line next year."

Commenting on the above a Portland paper says:

"Included in the Oregon Short Line construction planned for next year, it is believed, is the east and west railroad across the state of Oregon. The surveys for this proposed line of the Harriman system have been made by Oregon Short Line engineers.

The road as located runs westerly up the Malheur river across Harney county north of Harney and Malheur lakes thence through the Christmas Lake and Fort Rock countries to a junction at Crescent with the Klamath-Natron cut-off of the Southern Pacific.

"While O. R. & N. officers have made several trips into Central Oregon for the purpose of making recommendations concerning railroad construction, it is understood that so far as the east and west line is involved the O. R. & N. officers have acted only in an advisory capacity. It is understood that, if the railroad is built the work will be undertaken under the supervision Short Line officials.

"So far as known here the Short Line has under consideration no larger single project than the east and west line across Oregon and there is therefore the probability that a large share of the new stock issue is for construction work in Oregon."

HOW TO PREVENT SMUT IN WHEAT

The following clipping from an exchange will be of interest to the farmers of this section. Smut has not appeared to any great extent in this county, yet it is best to take precautions and not allow it to start. Too little attention is given to proper treatment of seed grain in this section any way, therefore our farmers should give it every advantage possible to make a good yield.

During the past season a great deal of smut has developed in the wheat crop, which has caused serious loss to the growers. It not only causes a loss in yield but also in the selling price. It is safe to say that the grower of smutty wheat does not receive over half the profit from it that could come from clean wheat.

By carefully looking over the wheat field at maturing time, heads may be found which have been entirely destroyed. The wheat kernels have become nothing more than a black mass of spores. When the crop is threshed many of these spores cling to the grain and are carried back to the wheat field at seeding time. Soon after the wheat kernel ger-

THE INSTITUTE.

Supt. Hamilton is particularly anxious that the school board convention for next Saturday to be held in connection with the institute be attended by at least one representative of each school district. He has expressed his approval and even recommends that each district defray the expenses of a representative to this convention.

Prof. J. W. Livingston of Forest Grove will be the outside instructor at the institute. No definite program has been arranged as yet, as the superintendent has not received anything from the instructor other than a wired message.

Supt. Hamilton is pleased with the arrangement of the Fair Association for a school day and will do all he can to get the schools of the county here to take part. Instead of holding an evening session of the institute on Wednesday the program will be given at the fair grounds on Thursday afternoon. It is hoped however to have an interesting evening program at the Presbyterian church on Thursday evening.

Reatos for sale, all sizes and lengths, price 20 cents per foot. Any one desiring Reatos address W. A. Ford of J. O. Alberson, Alberson, Oregon.

The best plaster. A piece of flannel dampened with Chamberlain's Liniment and bound on over the affected parts is superior to a plaster and costs only one tenth as much. For sale by all good dealers.

Religious Services.

The following are Rev. A. J. Irwin's regular preaching appointments for the year 1919.

Burns the third and fourth Sundays of each month at 11 a. m. and 7:30 p. m.

Sunset School House at 10:30 a. m. the first Sunday of each month.

Narrows at 3 p. m. and 7:30 p. m. the first Sunday of each month.

Waverly at 10 a. m. the second Sunday of each month.

Lawen at 3:30 p. m. and 7:30 p. m. the second Sunday of each month.

Denstead School House at 3 p. m. the third Sunday of each month.

Sunday School at Burns every Sunday morning at 10 o'clock a. m.

Services at the Baptist Church first and second Sundays in each month. Sunday School at 10 a. m. every Sunday. Prayer meeting Thursday evening.

Don't trifle with a cold is good advice for prudent men and women. It may be vital in case of a child. There is nothing better than Chamberlain's Cough Remedy for coughs and colds in children. It is safe and sure. For sale by all good dealers.

A Handsome Woman

Every woman may not be handsome, but every woman should keep with care the good points nature has given her. No woman need have hollow skin, dull eyes, blotchy complexion, who pays proper attention to her health. Where constipation, liver derangements, blood impurities and other irregularities exist, good complexion, bright eyes and sprightly movements cannot exist. Internal derangements reveal themselves sooner or later on the surface. Headache, dark rings around the eyes, sallow skin, a constant tired feeling—mean that the liver and digestive organs are needing help and correction. Chamberlain's Stomach and Liver Tablets give this necessary help. They work in nature's own way. They do not merely flush the bowels but tone up the liver and stomach to fulfill their proper functions. So mild and gentle do they act that one hardly realizes that they have taken medicine. Chamberlain's Tablets can be relied upon to relieve biliousness, indigestion, constipation and diarrhea. Sold everywhere. Price 25 cents.

Biliousness is due to a disordered condition of the stomach. Chamberlain's Tablets are essentially a stomach medicine, intended especially to act on that organ; to cleanse it, strengthen it, tone and invigorate it to regulate the liver and to banish biliousness positively and effectually. For sale by all good dealers.

FALL SHOWING of NEW GOODS

We are opening up our new Fall and Winter goods and we will be pleased to have you call. Our stock, as usual, will be the largest in Eastern Oregon.
