

HINTS FOR STOCK OWNERS.

The manure from each cow is worth from \$25 to \$30. Don't let it waste.

With a good stool to hold up the pail you can rest at milking time, after a hard day's work.

It pays to fuss a little with the cows, and they relish a little change in diet, with some dainties added, as well as we do.

Don't forget that a few beets, turnips or cabbage mixed with the regular rations of the dairy herd these winter days, will do much toward taking the place of the juicy grazing the animals relished so much in summer, when they filled the milk-pail to overflowing.

Drafts under the floors are death to pigs and even to grown hogs.

Hogs and hens do not go well in the same house. Don't try it. Do not let the brood sows that are to farrow in the spring become too fat.

Dark hog houses are not healthful. Let in the light and keep your porkers healthy.

If a small pig is chilled it can be revived by dipping it into water as hot as you can bear your hand in, then wrapping it in warm flannel.

Pigs are not protected from cold by warm coats of hair, and suffer greatly if exposed.

An uncomfortable, suffering pig cannot be a profitable one.

Because sheep have warm coats it does not follow that they can be exposed to wet and storms.

If any sheep or lamb is heard coughing, put it by itself and give special care and treatment. Find the cause and remove it.

When a sheep gets unruly, the best thing to do is to make a trip to the meat man's, and take as your passenger that trying sheep.

Don't feed out all the clover to the cows. Save a nice lot for the sheep. They will get as much good out of it as any animal on the farm.

Millions of pounds of wool are imported annually to supply the home demand. Why not grow this wool on our soil and keep the money in the family?

It pays to feed the colts grain. Good feed and exercise must go together.

Turn the colts in the yard every day for exercise.

A horse's pulse beats from thirty-six to forty times a minute when he is in good health.

Carrots must be fed sparingly to working horses. Cut them in slices. They are a laxative, and effect the kidneys also.

It is impossible to develop a colt into a sound, serviceable horse if it is kept tied on a hard floor day in and day out through the winter.

Stuffing the colt with hay or straw or any coarse feed will spoil its looks. Keep this grain down by the use of some grain and less coarse feed.

Loose the ration of all kinds when the horses are doing little or nothing. They are too much like a man to stand heavy feed while lying still.

The cost of twenty or thirty bushels of oats fed to the colt during the winter will be worth more than twice as much in its growth and development.

Watch the hired man with your horses. If they cringe, dodge or show signs of fear while with him, take my advice and "fire" him. A good horse is spoiled when he is the victim of fear.

From January Farm Journal.

NEW CLUBBING PROPOSITION

We have arranged to offer in connection with this paper, the new monthly farm magazine just started at Lincoln, Nebraska, by Prof. H. W. Campbell and devoted to the subject of how to farm in the dry country and how to get best results from soil tillage under normal conditions. This Paper is Campbell's Scientific Farmer and we offer it clubbed with The Times-Terald both for \$2.50 per year cash. Prof. Campbell's new paper is a monthly, check full of good things, the only paper of its kind in the world, and it embodies the results of the editor's many years of painstaking investigation of the soil tillage proposition.

When given as soon as the croupy cough appears Chamberlain's Cough Remedy will ward off an attack of croup and prevent all danger and cause of anxiety. Thousands of mothers use it successfully. Sold by all good Dealers.
