FAIR WEEK EXTRA. NO. 5.

BURNS, OREGON, FRIDAY EVENING, OCTOBER 6, 1911

PRICE FIVE CENTS

FAIR PRIZES

The Stock Awards Completed—Judges Still at Work Late This Afternoon.

The judges began passing on the exhibits this morning. The live stock awards had been completed up to noon but the judges were still busy in the pavilion this afternoon and up to a late hour the awards had not been completed.

The judges of the stock were C. D. Huffman and A. Egli. In the pavilion P. C. Clemens, Leroy Breithaupt and H. F. Huntley.

There were some very close competitors in the live stock and several times Supt. Wilson had to be called upon to settle the awards. The stock exhibit is not so large as usual, but there are several fine animals. The awards were:

STANDARD BRED

Stallion—Geo. Hagey first.
Mare—P. G. Smith first.

Pair mares or geldings—Thos. McCormick, first. Wm. Stewart, second.

Mare or gelding two years—Wm. Stewart, first.

Clyde Stallion—Robt. Settlemyre first.

Shure Stallion—Robt. Settlemyre first.

Hackney Stallion—Robt. Settlemyre first.

ROADSTERS

Team—Wm. Stewart first, C. S. Johnson second.

Stallion—Thos. Baker first.

Mare or gelding two years old or over—Chas. Wilson first, P. G. Smith second.

Yearling colt—T. C. Albritton first.

Yearling mare—H. Dixon first.

P. G. Smith second.

Stallion two year old—P. G. Smith first. C. A. Brittingham second.

GRADE DRAFT

Stallion—Wm. Stewart first.

Stallion and three of get—Wm. Stewart first.

Mare 3 year old—Stewart first.

JACKS

Alex Hanley first.
Mare and mule colt, W. M. Stewart, first; C. T. Albritton, second.

SHORTHORN.

M. L. Lewis, first on cow and yearling bull.

RED POLLED.

H. Dixon, 1st on bull.
Dan Varien, first yearling.
H. Dixon, first cow.

Wm. Hanley had a herd of Herefords, the only ones on exhibit and Dr. L. E. Hibbard's herd of Jerseys had no competition.

Ed. Goodman had a pen of merino sheep.

Dr. Hibbard's Berkshire and Wm. Hanley's Jersey Reds were the only hogs.

The poultry pens consist of one pen of Bantams, one pen of Plymouth Rocks, one of Black Minorcas, one of Rhode Island Reds, two of turkeys and one of ducks.

IRRIGATED FARM PRODUCTS

The following awards were made on the first division of farm

THE CHURCH AND HER

Part In Country's Development.

C. C. BABBDIGE.

The mottoes of the Commercial Club were to the point, and showed to us in a concise way the needs of our country.

The most important banner of the lot was the one which read "Give us Railroads, Irrigation and Farmers" these words are too true, for without the railroads, our country will remain in an isolated condition, and we would have no need of irrigation, for bunch grass, sage brush and jack rabbits will grow without that and there will be no need of a railroad to market the crops for all that we raise can be driven on foot as far as need to be.

But our country is not going to lay in such a state a great while for capital is looking toward Oregon for investment. No greater opportunity for profitable investments can be found than in the irrigation development of Central Oregon.

The Guggenheims are spending one and a half million dollars on an irrigation project in northern Malheur county, which will be entirely finished by fall. The result has been so far, two new thriving towns, extension of the railroad to meet the demands and hundreds of settlers flocking in to get the irrigated lands because they are sure they have all the water when conserved, necessary to supply their demands.

These people did not come into that part of the country with a great blare of trumpets, but in a great business like way and went to work and did things and are still doing them.

Now if capital can be interested there, why can't it be made to become interested in the great Harney county where we have larger valleys and more water. We have fine chances for not only one company but a number. There is water enough running to waste in Harney county coupled with the rains and snows sent in a natural way, to furnish ample moisture for every square foot of our tillable lands.

When our lands are under water the deserts will be made to blossom and we will be blessed with railroads whose cars will go from our valley groaning under

the heavy loads of grain and farm products.

Of course it does not take much of a philosopher to realize that with irrigation and railroads there will be a great demand for settlers to work the soil. We of course will need something in the way of publicity, which should be honest and just truths; we will have the soil, the water, the climate and the railroads, and settlers will come and we can't prevent them from coming; they will be anxious to come because we will have something for them.

They will come from the north, south, east and west, and locate in our valley and make homes. Yes, we will extend them the large glad hand and say welcome settler—we want you, we need you. This you will agree with me. But now, there is one thing further: what kind of settlers, any kind, all kinds? yes, no.

We want settlers that will make homes that will be an ornament to our beautiful country, not so much in a physical beauty sense, with fine houses, barns, outbuildings and well kept fences, etc., these are good and are a natural consequence of an elevated condition of its occupants.

It is the settler with high and lofty ideals we want, from whose homes come children who have been trained to love their country, their neighbors and their God. For the home is the center of development of the country, for from the home comes the farmer, the merchant, the politician, and professional man, and these men are soon to become the ones that are to handle our affairs in business, political and professional ways.

It is easy to draw the conclusion that as the home of today is, so will be the development of tomorrow—I think you will all agree with me, we want and must have the best class of citizens.

Such being the case the professional man, merchant, politician and ordinary citizen ought to give his or her support to everything that will bring about conditions desired. And become not a knocker of anything that is laboring to this end but a booster—Yes a booster first and last and all the time.

We are loyal to the Development
