The rains last week are reported to have done considerable damage to both grain and vegetables as well as in the hay fields. However unfortunate this may be, it has convinced the easterners that it does and can rain here, and has been the best advertisement we could ask for, as at that time there were many from the east out here, and were greatly impressed with the liberal supply of moisture they saw fall while here.

There is only one way to reach and interest the people who buy things and that is through your home paper. The people read their home papers—every word, every week, but they don't read the telephone poles, barbed wire fences, wooden signs or rubberneck at an angle of 90 degrees to see your particular sign, of business. You never saw a man setting by the fire reading the broad side of a board fence or barn to his children, or carry into the house to read did you? But they do this with your local paper, and the difference is plain—very plain.
