

**LATEST DEVELOPMENT LEAGUE NOTES**  
(From Our Portland Correspondent)

Field demonstration work by Oregon Agriculture College, widening the usefulness of that institution greatly, will be realized to a much larger extent than has hitherto been possible if Senate bill No. 72 is passed by the Legislature. This measure provides for the appropriation of money by the state and counties to carry on co-operative field demonstration work among the farmers themselves.

The bill was drawn by the Central Oregon Development League and the Oregon State Bankers' Association agricultural committee. It provides for a well-organized system of field work, conducted by experts under the direction of the O. A. C. The demonstrations in agriculture will be given in different parts of the state and the plan is what might be called a system of traveling agricultural schools.

There is found to be need for this work, particularly in the newer sections of the state where settlers are flocking in and taking land. They must be given a start in the proper agricultural methods suited to the country if they are to prosper, and demonstration work by the state college will do this and do it right. The plan of the bill is extremely practical, meaning to place the demonstration work right out among the farmers so they will not have to waste valuable time in visiting some far point. It is thought friends of the agricultural interests of the state will rally to the support of the bill in the Legislature and secure its passage.

The present year is likely to witness the completion of another railroad across the eastern half of the state. The Oregon Eastern being built from Vale westward to Dog Mountain, 140 miles, is progressing favorably and railroad men say they will complete the construction for this distance within the year. Dog Mountain is near Burns and it is expected the line will then be extended to a connection with the Southern Pacific Natron-Klamath road now being built.

To see the legislative wheels go around, a number of delegates to the recent Oregon Irrigation Congress were passengers on a special train that carried them to Salem for the opening of the session and later they visited the state institutions at Corvallis and Eugene. The Irrigation Congress was notable as being the most important gathering of irrigationists ever held in this state, and the visit of the delegates to the capital was full of interest.

Memorials to Congress on important subjects have been prepared by the Oregon Legislature. One asks for appropriations for the improvement of Tillamook, Yaquina and Coos bays. Another memorial asks for the protection of migratory game birds and another suggests a federal law to curb the divorce evil.

The Russell Sage Foundation has probed the public school systems of all the states and finds Oregon ranks 15th in efficiency among the 48 commonwealths of the nation. This state, however, is found to stand first in point of attendance. The percentage being 87.8.

**Petition for Liquor License.**

We the undersigned legal voters of Harriam Precinct, Harney County, State of Oregon, respectfully petition the Honorable County Court of Harney County, Oregon, to grant a license to Price Cochran to sell Spirits, Malt and Vinous Liquors in less quantities than one gallon in Harriam Precinct, Harney County, State of Oregon, for a period of six months, as in duty bound we will ever pray.

Names  
B. J. Clur, Geo. E. Parker, C. L. Lee, H. Denman, R. C. Heinz, H. C. Albreton, T. C. Albreton, C. H. Fredrick, T. M. Miller, A. Bergeron, Emma C. Libby, J. W. Carpenter, J. L. Kellogg, P. F. Heinz, A. Brock, T. B. Clark, I. B. Clark T. M. Fitchet, J. B. Dougherty, A. S. Graham, Jerry Dillon Jr. W. H. Thimmes, Chas. Hanning, L. L. VanHorn, F. A. Hora, A. Petersen, Peter Ufer.

Notice is hereby given on Wednesday the 5th day of March 1913 the undersigned will apply to the Honorable County Court of Harney County, State of Oregon, for the License mentioned in the above petition.

PRICE COCHRAN.

**Value of Feeding The Land**

No open-minded person who makes an honest investigation of the subject of soils and crops can deny that the farmer is operating a wonderful chemical and biological laboratory, the processes of which are coming to be fairly well understood. An Illinois Farmers' Institute Bulletin says: One of the fundamental truths that has been thoroughly established is that "crops are not made out of nothing," but that certain chemical elements are necessary to the growth of crops as are heat and light, that some of these elements must be fed to the plants through the soil (the laboratory) and that the farmer (the chemist) through the art and science of agriculture, must provide the food and prepare his soil for putting it into proper solution.

Of course, the land must be well drained, because too much water dilutes the plant-food solution, cools the soil and prevents aeration. Active organic matter must now be supplied as it is the life of the soil, making the chemical changes necessary and providing the medium for the development of the necessary bacteria life, because no matter how large the quantities of all the elements of plant-food the soil may contain, or which may be applied in an inert form, plants cannot use them until the chemical changes brought about by these bacteria take place.

The continuous cropping of land for sixty or more years, together with the removal of all crop residues has depleted the soil or organic matter, both active and inactive, while the natural deposits of lime have reached into the subsoil or have escaped to the lower lands by erosion, hence even where soils are not acid, the application of ground limestone is needed to hasten the solution of the mineral elements of plant food, phosphorus, potassium iron, sulphur. If the soil is acid, the application of limestone is absolutely necessary to profitable crop production, as bacteria cannot flourish in a soil where there is no free carbonate of lime. If lime is needed nothing else will take its place and there can be no high state of fertility without free carbonate of lime and humus.

Where fine ground natural limestone is applied to the soil it does not attack any of the elements of the soil, but the acids in the soil attack the particles of stone and become neutralized, the soil is sweetened and the bacteria can work, this has the effect of flocculating clay soils, black of yellow, making them mellow, crumbly, admitting the air, allowing the fertility brought to the surface from the subsoil by evaporation and plant growth, to be leached back into the surface six or seven inches of soil for use in crop rotation.

Lime is absolutely necessary to the formation of humus as well as its retention; it has been known and used in various forms, agriculturally, for more than 2,000 years, but the manufacture of co-called complete fertilizers has operated against its use as well as the economical use of natural mineral plant-foods.

**Urges Better Care And Breeding Of The Cows**

Better care and breeding would greatly increase the present output of dairy products without even increasing the number of cows," said E. R. Stockwell of the dairy department of the Oregon Agricultural College very recently.

"The direct loss is not only loss in the use of inferior sires, the off-spring of such sires will continue to be inferior from one generation to the other. The solution to the problem is to get good sires and then test their progeny and thus weed out all which do not come up to the proper standard.

"The dairyman who has a large herd can well afford to invest in a good sire. It is estimated that the improvement in six heifer calves will pay the cost of an average good dairy sire. The small farmer, however, is confronted with the difficulty of making the investment, but this should be done through co-operation.

"Communities where the small dairies are maintained should purchase a sire as a community animal. Some of the southern states are doing this now with good success. They maintain a sire in such communities for two years and then exchange for the better. In this way the expense is kept down to the minimum. I believe strongly in the community co-operative system of breeding in dairy districts."

**Damage Done By Cut Worms**

Much damage to young orchards is done by climbing cut worms. These insects eat the buds and young foliage only during the night time. During the day they hide at the base of the tree, going down a few inches into the soil. The Oregon Experiment Station recommends as the best treatment for this pest to scatter poisoned bait, a spoonful to a tree. This is made by mixing dry one pound of paris green to twenty pounds of bran, then adding one or two quarts of molasses, and if possible the same amount of old beer. Work up with an engh water to make a stiff mash before placing over the orchard. Do not let the chickens have access to this poisoned bran.

As a supplement to this treatment spray the trees with Bordeaux mixture made as follows: Five pounds of bluestone dissolved in 25 gallons of water and 5 pounds of lime slaked in 25 gallons of water. Mix the two. The same scheme of treatment will answer for the garden cut worms. If the poisoned bait be distributed before you set your plants or sow your seed you can work out the cut worms from the garden. After the plants have come up the Bordeaux spray will help to protect them.

Tying bands of cotton around the tree trunks, or painting with tanglefoot or axle grease, or fastening collars of tin or paper around the trunks are remedies that will not answer for our climbing cutworms. There are several other insects which feed on buds, foliage and garden produce which may not be killed by this treatment.

**Notice of Final Settlement.**

Notice is hereby given that the undersigned executor of the last will and testament and estate of Green Hudspeth deceased, has filed with the County Court of the State of Oregon, for Harney County, his duly verified final account, as by law required, and that said county court has appointed the 15th day of February 1913, at the hour of 10 o'clock A. M. of said day, at the court house of said county, in Burns, Oregon, as the time and place for the hearing of objections to said final account and the settlement thereof. Any and all persons having objections thereto must file the same with the clerk of said court on or before the said day of hearing.

ROBERT N. HUDSPETH,  
Administrator of the estate of  
Julia Hudspeth, deceased.  
Burns, Oregon, January 6th, 1913.

**NOTICE OF CONTEST.**

UNITED STATES LAND OFFICE,  
Burns, Oregon, January 1913.  
To Louis P. Brown of unknown address, Contestee:  
You are hereby notified that Charles P. Fay, who gives Burns, Oregon, as his post-office address, filed in this office his duly subscribed application to contest the cancellation of your Homestead Entry No. 2556, Serial No. 2242, on the NW 1/4 of Section 12, Town 36S, Range 2E, Willamette Meridian, which said entry was made by you on the 18th day of January, 1913, and which said entry was cancelled by the United States Land Office on the 18th day of January, 1913, and has never been retailed upon or cancelled since.

UNITED STATES LAND OFFICE,  
Burns, Oregon, December 4, 1912.  
Notice is hereby given that Mary E. Thurman, who resides at Harriam, Oregon, and who on March 8, 1906, made Homestead Entry No. 2556, Serial No. 2242, on the NW 1/4 of Section 12, Town 36S, Range 2E, Willamette Meridian, has filed notice of intention to make final proof, to establish claim to the land above described, before the Register and Receiver, at Burns, Oregon, on the 18th day of January, 1913. The name of the witness is: Frank Newman, George Lucas, all of Harriam, Oregon.  
W. F. PARKS, Register.

**NOTICE FOR PUBLICATION.**

UNITED STATES LAND OFFICE,  
Burns, Oregon, December 17, 1912.  
Notice is hereby given that Thomas Hutson, of Ell, Oregon, the Assignee of Edwin H. Steadman, Assignee of Louis Frotscher, has filed in this office his application to enter under Section 206, Homestead Statute of the United States, the SW 1/4, Sec. 20, T. 36 S. R. 24 E. W. M., Oregon, Serial No. 2666.  
Any and all persons claiming adversely the lands described or desiring to object because of the mineral character of the land or for any other reason to be disposed to applicant, should file their affidavits of protest in this office on or before the 9th day of February, 1913.

**Summons.**

In the Circuit Court of the State of Oregon for Harney County.  
Lela Millar, plaintiff  
vs.  
C. J. Millar, defendant.  
To C. J. Millar, the above named defendant: In the name of the State of Oregon, you are hereby required to appear and answer the complaint filed against you in the above entitled suit on or before the last day of the time prescribed in the order of publication of this summons, to wit: on or before the 24th day of February 1913, said date being the expiration of six weeks from the first publication of this summons, and if you fail so to appear and answer, for want thereof, plaintiff will apply to the court for the relief demanded in the complaint, to wit: For a decree dissolving the bonds of matrimony existing between plaintiff and defendant, and for costs and disbursements of suit.

This summons is published by order of Hon. Grant Thompson, Judge of the County Court of Harney County, Oregon, made and entered on the 8th day of January 1913, and the date of the first publication of this summons is January 11, 1913.

G. A. REMBOLD,  
Attorney of plaintiff.
