TALE OF AN ALL NIGHT SIEGE.

An Ugly Visitor That Gave Herself a Warm Reception In a Settler's Cabin, a Quick Retreat by the Inmates and a Display of Presence of Mind.

Two of the first English settlers in the town of Addison, Vt., were John Strong and Zadok Everest, Early in had to go to Albany for provisions. Pioneer women seldom worried but for some reason Molly Strong felt uneasy after her husbaud had gone. She and her sons got in a good supply fuel and did the chores early.

When they came back to the cabin baby was crying for his supper, and Mrs. Strong gave him a cup warm milk and sat him down in front of the fireplace. She had just swung the kettle of samp from the fire when she heard a noise. Looking round, she saw the blanket that served for a door swing aside as a great bear thrust her head into the room. The children screamed, and the bear backed out in haste, but Molly Strong knew that she

"Quick, children!" she said as she caught up the baby. "Climb the ladder. Let sister go up first, now John nie, now Frank-hurry, hurry!"

When the others were safe in the loft Mrs. Strong climbed up with the baby and drew the ladder after her. She laid it across the hole, and then she and the children sat down and waited. The floor of the loft was made of round poles laid closely together, but not fastened. It was dangerous to move about on it.

Peering down through the pole floo they listened and watched for the bear come back. They could hear her moving round the house, and once a big paw crashed through the oiled pa per at the window hole. Finally she came to the door and, after blinking uncertainly at the fire, walked in. Two cubs followed ber. The old bear presently upset the pan of milk on the ta-ble, and the cubs began to lap it up "I'd like a taste of that myself,

Frank whispered.
"So would I," Johnnie replied. "I'm

awful hungry." Next, the bear found the pudding kettle and took a mouthful of the boll ing samp. Jumping back with a cry pain and rage, she broke the pot with a swift blow of her paw, and the sat up on her haunches, growling and whining, and began to dig the pudding out of her mouth. The cubs sat and watched her in grave wonder.

That was too much for the children. who burst into laughter. Instantly the bear gave a loud roar and rushed to ward the hole with the ladder across it. Mrs. Strong gave hurried orders: "Get me a pole, Frank, quick! Now

get another. Punch her if she tries to Be careful. Don't fall The baby, awakened by the noise, be

gan to wall, and Mrs. Strong soothed him with one hand while with the pole in the other she warded off the bear. The little girl clung crying to her mother's skirts, but the boys each | lantic Monthly, had a long pole and prodded the bear through the rungs of the ladder. The big brute finally shuffled off toward the "She's gone!" Johnnie said. "Do

you think she'll come back, mother?" "I expect she will, son, but we can manage her-if we keep awake." "I won't go to sleep!" groaned John-"I'm too hungry!"

Nevertheless, the silent wait in the dimly lighted loft made them all

lrowsy, and before the bear returned Mrs. Strong knew by their heavy breathing that the children were sep. It was near midnight when the bear came in and renewed her efforts to reach the loft. - Mrs. Strong rapped her sharply with her pole, and re was a roar that brought the boys Dazed and only half awake, Johnnie

ran across the loft. His foot slipped into a gap between the poles, and as he fell other poles spread apart. Down he went into the room with the bear and cubs. The bear did not see him fall, but she faced about at the noise and started toward him. Quick as a flash, Mrs. Strong brought

her pole down on the nearest cub and pinned him to the floor. The bear turned to rescue her squealing offing, and Frank drew his brother up into the loft unharmed. No injury to herself -could have

weakened the old bear's courage like the attack on her cub, and although at intervals she slouched in and out of the cabin, she made no further atapt to reach the loft. As it grew light. Mrs. Strong, watching through the chinks in the wall, saw her lead her cubs across the clearing into the As soon as she thought it safe she

lowered the ladder and the family came down. They saw no more of the bear, and when Mr. Strong came home he made the cabin secure with a door made from basswood slabs and hung on wooden hinges. - Youth's Compan-

Beware of the man who does not return your blow. He neither forgives nor allows you to forgive your self .- George Bernard Shaw.

He Plagued Him. The catcher was having an argument

with the umpire.

BAFFLED THE BEAR MOSBY FLED WITH HIS MEN. PONDEROUS SEA ELEPHANTS. An Attack That Wholly Demoralized

The Manual of the state of the

the Partisan Rangers. Colonel John S. Mosby, commander of the Partisan rangers, who gave

which he figured. In the summer of 1864 when General Phil Sheridan was in the valley of the Shenandoah he found himself much harnssed by Mosby, who was continu ally cutting off his supply trains. An army cannot fight on an empty stom-ach, and Mosby knew it. One bright morning Mosby beard that a long sup' the forks of the valley pike, watching the fall of 1776 Strong and Everest for the head of the wagon train to ap-

> Presently a cloud of dust was seen rising far up the road, and as the wind blow it aside the Confederates caught sight of a line of men in blue escorting a caravan of lumbering wagons drawn by mules. Instantly Mosby gave the order to run a little howitzer up on the ide of a hill and unlimber it. As soon as the gun had opened fire the rest of the men were to make a cavalry charge

> The rangers jerked the gun into po-sition and began to swab it out. Buddealy the man with the swab gave a shrill yell, seized the seat of his pantatoons and fled down the bill and out into the road. Almost in the same bandoned it. He seemed to be fighting at the air as he disappeared over stone wall,

The sutler's wagons were creeping earer, and Mosby did not know what to think of such extraordinary conduct. He ordered four more men to the gun. but hardly had they reached it when they, too, yelled, began to beat the air of small fish and use the trunk to madly with their bats and took to selze them with. Afterward the food

flight Spurring his horse over the stone rall, Mosby rode toward the gun, but his stay was short. The howitzer stood just over a hornets' nest, and those busy insects were resenting the intru-sion. They had repelled the invaders foot, and now they swarmed or Mosby's borse till the maddened and mat tore off down the pike on a run. Then they turned their attention to

the rest of the troop. Their attack was so vicious that the ingers gave up any idea of standing by the gun. They scattered far and wide, and it was an hour before they returned. When they did the wagon train had safely vanished in the distance. So the bornets saved the day for Sheridan.-Youth's Companion.

Science has wrought many achieve ments, but it has not cleared up a single elemental mystery, and it has cre ated a thousand lesser mysteries that never were imagined until science ame. Science has demonstrated that this oak of a world used to be an acorn, but how that acorn came into existence or whence it obtained the an oak science has not suggested. Sci ence has made it possible for a manu facturer to cut down three trees in his forest at 7:35 in the morning. have them made into paper at 9:34 and to have them selling on the street as newspapers at 10:25, but whether the manufacturer himself is a brain that has a mind or is a mind that has a brain science cannot even guess .- At

Iron mold stains spread in any fabric door. She pulled down the blanket they come in contact with in the wash. and tore it into shreds; then she went | To remove them stretch the stained water, so that the steam may pene trate the fabric, and apply with feather a teaspoonful of salt dissolved in a dessertspoonful of lemon juice When the marks disappear dip the ma terial well into the hot water, after ward ringing very thoroughly in cold

water.

see, it's very simple." "I's ought to knowed it." said the old woman. "If those fool men folks been doin' it all dese years I might 'a' knowed it was a powerful simple proc ess."-Life.

ONE AND ONE MAKE TWO?

Not Always, by Any Means, According to Sir Oliver Lodge, Sir Oliver Lodge has attracted tremendous amount of attention by telling scientists (of whom he is one)

that he believes in immortality in spite of science. This is not the first time he has locked borns with scientific dogma. In his book, "Modern Probems," he affirms that one and one do not always make two. And this is the "almost frivolous" way he makes "I would contend that, whereas the

proposition that one added to one makes two is abstractedly beneath controversy, it need not be true for the addition of concrete things. It is not true for two globules of mercury. for instance, nor for a couple of collid-ing stars; not true for a pint of water added to a pint of oil or vitriol, nor for nitric oxide added to oxygen, nor for the ingredients of an explosive mixture; not necessarily true, either for anakes in a cage, or for capital in vested in a business concern, flour shing or otherwise, nor is it true, save in a temporary manner, for a couple of trout added to a pond. Life can make havor of arithmetic.

"The moral of all which is that propositions can be clear and simple and sure enough, indeed absolutely certain, as long as you deal with abstractions, but that when you come to concrete realities and have all the complexities of the universe behind you-not only behind but in front and mong and intermingled with every simplest thing-then we perforce step out of the realm of positive dogmatic security into the region of reasonable and probable inference, the domain of pragmatic conviction, of commonplace

intuition, of familiar faith." Took a Mean Advantage.

Returning from South America, a New York man vouches for the inge-nuity of the city officials in Rio de Janerio. The householders on a certain street received notices that the city fathers had heard complaints of the high tax rates along that particular thoroughfare, and in order that justice might be done the residents were asked to submit their own valuation on their property. When the prompt and joyful responses had all been received the lots were condemned and bought for a contemplated public improve-ment.—New York Tribuna.

pers Tipped With Claws. That which is believed to be the last berd of sea elephants known to exist such dashing service in the southern is to be found at Guadalupe island, off cause, told of an amusing incident in the west coast of Mexico. In the herd there are now only about thirty speci

The sea elephant is an important link in the chain of evolution and is the largest of all fin footed animals. The adult male is about twenty-two feet in length and is about eight feet high when propped up on his front flippers ply train was winding its way down in a natural position. These great the valley. By noon the rangers in bulls weigh from two to three tons their gray uniforms were gathered at and have a trunk, or proboscis, which, in a natural position. These great when relaxed, hangs down over the mouth about two feet. In the end of this the nostrils are placed rather wide apart, and when they breathe their whole mass trembles in tiny undula-

tions to the very end. The dippers are thick and tipped with heavy claws. There is a tail about one foot and a half long, separated horizontally in two division This tall acts as a propeller, to resist the huge creature when he comes in back flippers and tall so as to catch the full sweep of the waves, and then

Coarse, bristly hair grows sparsely from the back along the body, and tough protecting crust of flesh reaches like a shield from the lower jaw down over the chest and round to the back of the neck. This biblike affair is nature's provision for protection in time of battle. The male fights viclously in the mating season, and the chest protector prevents much loss of

Sea elephants live on various kinds seize them with. Afterward the food is transferred to the mouth precisely as elephants manage it.

EGGS BY THE YARD.

Korea Also Produces Oysters That Weigh Ten Pounds Each.

While in the orient a correspondent lived near Seoul, the principal city of Korea. He tells the following story: One morning my hostess, while giving orders for the necessary things from the market for the day, mention ed four yards of eggs. I accompanie the steward that day on his marketing trip, and when the eggs were asked for the grocer reached down in a bar rel and brought out the end of a large straw rope. He measured off the required length on the counter, just as dry goods store clerk would measure off cloth, rolled it up and put it in the basket without a smile. The eggs were inside of this hollow straw rope, with string tied on the outside of it between each egg. This effectually pro-tected the eggs from being broken

while handling. Another day my hostess ordered two 'small" oysters for dinner. This orler caused me to wonder a little, for knew that there would be seven to dine, besides the servants, but when

Primitive man boiled his water with hot stones. That was not the only use reside he made of them, at any rate, if he he made of them, at any rate, if he was a Scythian. The Scythian practice described by Herodotus has been tice described by Herodotus has been allegations will be taken by this office as having been confessed by you, and your said entry will be canceled the reunder without your case of smoking. Having spoken of a kind of hemp that grew in the country. Herodotus proceeds; "Now, the Scythlans, taking the seed of this hemp, go into their tents and then throw the seed upon the stones heated white hot. As it is thrown on it is burnt into smoke, producing so much that no Greek vapor bath could surpass it. And the Scythians, delighting in it, beliew. This takes the place of washing for them." It seems as though they had discovered the Turkish bath and the eigarette.

The Widow's Dower. It is certain that "dower," the estate life which the widow sequires at her husband's death, was not known among the early Saxons. In the laws of King Edmund the widow is directed to be supported wholly out of the personal estate. Dower is generally ascribed to the Normans, but it was fire introduced into the feudal system by Emperor Frederick II., who was con temporary with the English Henry III.,

The Usual Way. "It would never do for the farmers to get into the financial business of the untion."

"Why not?" "From force of habit they would always be waiting to water their stock." Baltimore American.
