

HIGH SCHOOL STUDENTS CONDUCT A CARNIVAL

Most Unique Entertainment Furnished
Public Thursday Evening Preceded
by Grotesque Parade. Celebrities
Exhibited. Better Babies Contest,
Stock Show, Baby Given Away

The High School carnival held at the public school building Thursday proved a novel attraction and there were some great "stunts" pulled off to separate those present from their nickels. Each class had something of a side show and while those present knew they were being "stung" each place was visited and fully appreciated.

The parade on the street was unique and attracted much attention. They formed at the High School building and each class had its separate division. The Freshmen had the most striking section as they represented Gipsies and had a covered wagon drawn by two cows. The Sophomores had the baby they were going to give away in a very gorgeously decorated baby buggy; the Juniors and Seniors were represented in autos decorated with their class colors. The band headed the parade and everything along the streets which they took had to give way to them.

Upon reaching the building each class began "barking" for their particular attraction. The program was slow in starting as they did not seem to be well organized but finally the curtain was pulled in the assembly room and some of the "stunts" prepared by the Freshmen were pulled off. Upon coming into the hall way from the assembly room one was confused by the "speakers" of the different attractions. The Juniors had "Lady Evelyn" the famous bareback rider and this was a most exciting experience to see one of the class girls in proper regalia astride a fractious steed made of a saw horse and the daring feats were wonderful. She even stood up on that saw horse and whipped. Their snake charmer was no less daring and she wound the imitation snake around her neck, etc. The stock show was free and of course was well pat-

PETITIONS FOR DESIGNATION OF LANDS

Rules of Procedure Prescribed for Execution of Enlarged-Homestead Act Passed March 4. Applicants Must Petition for Designation and Set Forth Character of Land Involved

The following information regarding the method of procedure and rules in petitions for designation under the new enlarged-homestead act of March 4, 1915, is taken from a circular sent by the Interior Department to the officers of the local land office:

Section 1 of the act of Congress approved March 4, 1915, confers a preference right of entry under sections 1 to 5, or under section 6, of either of the enlarged-homestead acts, upon a qualified person pursuant to whose petition land is designated as subject thereto. These instructions are explanatory of the act and of the procedure prescribed for its execution.

2. The act applies to cases where the party is seeking to make an original entry and to all cases where he seeks to make additional entry, regardless of the question whether proof has or has not been already submitted on his original filing.

It does not effect the right of any person or persons interested in designation of land to forward to the Director of the United States Geological Survey or to the Secretary of the Interior a petition therefor.

3. (a) Where a preference right under the act is sought there must be filed at the proper local land office the usual application for entry, original or additional, as the case may be, executed by the applicant and two witnesses, and the fee and commissions must be then paid; it must be accompanied by the applicant's affidavit, executed in duplicate and corroborated by at least two witnesses, setting forth the character of the land involved—both tracts, if additional entry is sought.

(b) This affidavit, which will be entitled "Petition for Designation," must give the name and post-office address of the applicant and a description by legal subdivisions of all the land involved; in case of additional applications it should give the serial number (or numbers) of the old claim.

(c) In case of applications for entry under sections 1 to 5, commonly known as the general provisions, of the enlarged homestead act, the affidavit should set forth fully the conditions governing the irrigability of the land. If any part or parts thereof are irrigated, their location, area, source of water supply, and other pertinent facts should be stated. If any part or parts thereof are under constructed or proposed irrigation ditches or canals, or adjacent thereto, the relation of the lands to same and the reasons for applicant's belief that the lands are not irrigable therefrom should be explained. The relation of the tract to surface streams or springs rising on or flowing across them or in their vicinity should be indicated. If such sources of water supply are inadequate for the irrigation of the applicant's lands, or are not available to him, full particulars should be given.

The location and depth of wells, elevation of water plane relative to the surface, and other pertinent facts which will disclose the quantity and quality of the water supply, obtainable from either ordinary or artesian wells on the land, should be given. If there are no wells thereon such information should be furnished as to any other wells in that vicinity, and the possibility of, irrigating the tract involved from underground sources should be fully discussed. If any attempts have been made to irrigate and reclaim the tract, or if it has been included in a desert-land entry, the reasons for lack of success should be stated.

The affidavit should be supplemented by a map or diagram in cases where the facts may be advantageously presented thereby.

The filing of an affidavit, as above indicated, will not be conclusive as to the character of the land therein described, and the applicant may be required by the Geological Survey to furnish additional evidence with regard thereto. Moreover, the filing of an application and petition does not give the party the right to fence the land or place other improvements thereon, and the erection of improvements will not confer upon him any right to equitable consideration of the application in the event the land is found not to be of the character contemplated by those provisions of the enlarged homestead act under which the claim is filed.

CO-OPERATIVE FARMING A SUCCESS HERE

Prof. H. D. Scudder, Agronomist of O. A. C. Talks of Wonderful Adaptability of Big Harney Country to the Growing of Field Peas and Alfalfa. Experiment Farm Seed in Demand

The following is from the O. A. C. weekly bulletin:

"The Harney County Branch Experiment Station will have several hundred very active co-operators growing the Station's successful varieties and following the Station's method of tillage, since the success of the Station crops and methods has been quite pronounced," says Prof. H. D. Scudder, agronomist of the Oregon Experiment Station. The Station's high yielding varieties are very successful under Central Oregon conditions and include Early Baart wheat, Swanneck and Hanchen barley, Sixty-Day oats, Carleton field peas and Baltic alfalfa. The supply of the Station seed was soon exhausted but being sold in small lots was widely distributed.

"There is no other dry farming country anywhere in the world that is undertaking so rapidly and so successfully the growing of field peas. Grown under the row method, originated and developed by the Oregon Experiment Station, this crop has proven to be peculiarly adapted to the short, frosty growing season and low rainfall of the country. The crop is more profitable than wheat either grown for seed or forage for producing pork and mutton. The Baltic alfalfa grown by the row method is equally successful as a forage crop. By means of these two legumes not only the possibilities for the production of livestock and for diversified farming are assured, but improvement of soil fertility and physical condition are provided. The Harney county dry farming country is unique in that from the beginning it has found these two invaluable crops to start successful farming with.

"Aid to both the old and the new settlers alike in starting their work is being given by Obil Shattuck, an O. A. C. graduate, who is agriculturist of Harney county."

"Don'ts in The Hog Business"

Following are some "don'ts" learned in the hog business, says an agricultural paper:

Don't try to raise hogs without good warm quarters; build the house first.

Don't keep hogs shut up in a small pen; they are the cleanest animals on the ranch if given a chance to be.

Don't change a sow's nesting place at farrowing time; if she is in a straw stack, leave her there until the pigs can walk home. Be sure, of course, that she is well fed and warm.

Don't keep a fat hog after he is fat, as he won't take a second growth. You will waste feed for nothing.

Don't feed hogs from a sack; always use a pail, and be sure to rattle the pail; they will soon learn what it means.

Don't drive hogs; call them. One man can call 20 hogs where 20 men cannot drive one hog.

Don't engage in this business just for the dollars and cents. If you don't like hogs, raise sheep.

Chamberlain's Lintiment.

This preparation is intended especially for rheumatism, lame back, sprains and like ailments. It is a favorite with people who are well acquainted with its splendid qualities. Mrs. Charles Tanner, Wabash, Ind., says of it, "I have found Chamberlain's Lintiment the best thing for lame back and sprains I have ever used. It works like a charm and relieves pain and soreness. It has been used by others of my family as well as myself for upwards of 20 years. 25 and 50 cent bottles. For sale by all dealers.

We do job printing.

Work on New Phone Line Progressing.

James Weston returned Thursday evening from a visit to Riverside where he had been looking after the work on his new telephone line from that point to Burns. He informs The Times-Herald there is a car load of material at Riverside this week and that the work is progressing as rapidly as circumstances will permit.

More equipment will follow in a short time and while he has not set any particular date for its completion to this city it is reasonable to suppose the line will be in working order within a short time.

This line will accommodate a big territory and when the branches are completed and connections made with points on the eastern side of the Valley as well as the Warm Springs territory to the south and west, it will give a service that practically covers the entire valley, putting people in close connection with the county seat, the land office and also giving them direct communication to outside points with good connections either east or west.

The local switchboard will be of the common battery type, the latest and most efficient type where a subscriber does not have to ring for central and each phone, even though on a party line, will have but its own ring come in, thus dispensing with the annoyance of always wondering whether it was the ring for that particular party or not. This equipment will be installed at once upon the exchange being opened and there will be no confusion.

The suburban lines of the Crow Camp section and intervening points will be put in right with the other through lines, thus giving the farmers of the Valley immediate and efficient service. Mr. Weston has many contracts signed up for these phones and applications are coming in every day he is in the territory.

Ed Egli Opens Auto Agency in Portland

The Sunday Journal says: Portland ushered another automobile agency into existence last week when J. P. Scarece, northwest factory representative of the Metz Motor Car company, of Waltham, Mass., signed a contract for the distribution of Metz cars in Oregon, with Edward Egli, of Burns, Or. Mr. Egli has been in the motor car business in the eastern Oregon metropolis for some years, handling the Chalmers and Saxon. The new location of the local distributor will be at Broadway and Oak streets. The new cars will arrive in Portland the latter part of next week. The Metz car is well known in this territory, on account of the publicity it received several years ago, when it won the famous cross country run, Glidden Tour.

Market Report.

Receipts for the week at the Portland Union Stockyards have been cattle 975, calves 10, hogs 2138, sheep 2442.

With a medium supply on sale the market opened on a good active basis and with prices 10 to 15 cents higher than a week ago. Choice steers are selling around 7.50 to 7.90, cows 6.25 to 6.60.

Swine market opened up with an advance of 10 to 15 cents over the closing of last week's quotations. Several loads at 8.05 to 8.10 represent the top of the market, while the bulk went from 7.80 to 8.00. Market steady at close of week.

The sheep supply was small and the market quiet. A couple loads of spring lambs went at 8.25 being the top price paid for that class of stuff. Shorn ewes are quoted at 5.50 to 5.75 and yearlings at 7.00.

Sumpter Valley Railway Co.

Arrival and Departure of Trains

Departs
No. 2, Prairie 10:15 A. M.
