

First National Bank Burns, Oregon

Burns, Oregon, May 31, 1918

To The Subscribers to The Third Liberty Loan, Through The First National Bank, Burns, Ore.

To those who subscribed to the Third Liberty Loan through our bank, under the Government installment plan, we wish to make the following explanation and statement.

We made requisition in early May to the Federal Reserve Bank for blank notices and franked envelopes so that each subscriber might be notified of his next payment, the amount thereof and when due.

Such supplies not having been received, we finally wired, inquiring the delay, and were advised that same had been forwarded the day before and they were finally received on May 29th, the day after the installment payments had to be made.

Believing that every subscriber would wish to make good his obligation, and not allow his initial payment to be forfeited, we settled on May 28th the 20 per cent installment due from every subscriber, and we trust that each subscriber will remit us promptly the amount we advanced at that time.

While this circumstance has made us much additional work, we appreciate the fact that the Federal authorities have much to contend with these trying times and we make this brief explanation that it may be understood that in not notifying subscribers generally we were no way at fault.

C. B. Ausmus, who was seriously hurt in a run-away several weeks ago and was brought to this city for medical attention and remained at the hospital for a few weeks, is again an inmate of the hospital following an operation. It seems his physician did not realize how bad he was hurt in the accident, since he responded to treatment readily without an extensive investigation of his internal injuries and Mr. Ausmus felt he had recovered from the effects of it. Complications appeared recently and upon investigation it was found a slow leakage from the intestines had been going on perhaps ever since his hurt and it was necessary to open him and drain the abdominal cavity. This poison had been accumulating for a long period and thus it has weakened the patient until it is a very serious matter but his physician reports he is improving slightly.
