Make This Room Yours

Whether you are building a brand new home, making additions to the old one or merely repairing walls, you can have a room like this if you use genuine Beaver Board.

Beaver Board walls and ceilings are more handsome, more substantial and more sanitary than any other kind. They are the easiest walls to build. No lath or plaster—therefore, no litter. Beaver Board always gives satisfaction. But you can't expect Beaver Board results unless this trade-mark is on the back of the board you buy.

PET SAVED SOLDIER'S LIFE
Effective "First Aid" Rendered by Cat When Its Owner Was Wounded During Crimean War.

During the Crimean war a French soldier was leaving his native village with his corps, when a little cat came running after him. It would not go back, so he put it on his knapsack and carried it along. Day by day, writes Arthur Bradley in the Evangelical Messenger, she was perched up thus, and every night slept by his side.

One day a great battle was to be fought, so the soldier left pussy behind with a sick comrade. After he had gone about a mile on the way the cat came running up to him, so he took it on his back again. Musket and cannon balls were now flying around. The soldier fell twice, but at last a dreadful wound laid him bleeding on the field.

The cat, instead of running away, jumped to the place where the blood was flowing, and began to lick the wound. The army doctor came, and the lad was carried to the hospital tent.

When he recovered consciousness he asked whether he would live or not, and the doctor said: "Yes, thanks to your pussy; she has used her tongue well and has stopped the flow of blood, otherwise you would have died."

Sponge Is a Germ Carrier.
Along with many other unsanitary toilet articles, the sponge is going out of fashion. But people may be still found who consider it indispensable. They have overlooked the fact that the sponge is porous and that every pore becomes a hiding place for untold colonies of germs. You cannot boil a sponge for any length of time, therefore you cannot insure its absolute hygienic cleanliness. As the germs multiply, a peculiar musty odor becomes noticeable.

When one bathes, many particles of dead skin are thrown from the body. If a sponge is used quantities of these dead particles collect in the pores of the sponge and will remain there even after considerable rinsing. If a sponge were examined under a microscope one would be horrified at the picture it would present.—Marianna Wheeler in the People's Home Journal.
