Make This Room Yours

Whether you are building a brand new home, making additions to the old one or merely repairing walls, you can have a room like this if you use genuine Beaver Board.

Beaver Board walls and ceilings are more handsome, more substantial and more sanitary than any other kind. They are the easiest walls to build. No lath or plaster—therefore, no litter. Beaver Board always gives satisfaction. But you can't expect Beaver Board results unless this trade-mark is on the back of the board you buy.

GENERAL SUGAR CONSERVATION

Is sugar necessary in the diet?

Neither cane nor beet sugar is necessary. In the average American diet all the sugar needed may ordinarily be supplied by using honey, sirups, fresh, preserved and dried fruits.

What are the general sugar saving rules?

Use all sugar sparingly and wherever possible use other sweeteners. Be sparing of confections and sweet cakes. The American people last year spent enough money for candy to feed all Belgium for two years. Supplement sugar with honey and sirups. Cultivate a taste for fruit in its natural sweetness. Sugar is a fuel food. Get fuel from potatoes and other starchy foods rather than from sugar. Sugar excels them as an energy-food only because it produces energy more quickly. They excel sugar since they supply more than merely the fuel need.

How may the sugar ration be expressed in quantities known to everyone?

Two pounds per month means about 8 ounces per week, or a little more than 1 ounce a day. This daily ration is a trifle more than 2 tablespoons level full. It should be remembered that this is to include all sugar used for any purpose whatsoever—for table use, cooking, in ice cream and desserts, on cereals or fruit, in sugar sirups used on griddle cakes, etc.
