MT. HERMON HOLY GROUND

Many Nations Have Built Their Temples on the Elevation of Which David Sang.

Mount Hermon, sacred mountain of Syria, rises, a silent sentinel, above the fruitful fields and vineyards of Lebanon and Damascus. Cut off from its range of the Antilibanus by the deep valley of Barada it has kept its lonely vigil through the ages. The Hebrews called it Hermit. According to legend the wicked angels in their fall from Paradise landed on Hermon and gave it its name.

Like a gray-haired giant the old mountain holds its white-crowned head above the clouds. At sunset these clouds turn to rose and gold, the mountain top flaming like a torch against the sky. As the sunlight fades the evening mists wrap old Hermon's head in veils of gray and white. "The white-haired old man of the mountain has donned his nightcap for the night," the people of the surrounding plains tell you.

The mountain's foot is covered with the green of oaks, poplars and dense brush with an occasional luxuriant vineyard. The vines of Damascus are famous throughout the Orient. The mountain springs keep the valleys well supplied with water. Higher up are the ruins of former temples, built centuries ago, their entrances facing the rising sun. In the old days the pious folk of the valley climbed the mountain side to worship on their holy ground. The temples are of various nations, including Greek, Roman and Hebrew.

David sang of Hermon and the cooling breath of the winds blowing from its icy summits. As the giver of all good things, of wine and cool water, of timber and olives and breezes in summer days, of tales of wonder and angels for the winter nights, the people of old looked to Hermon as a storehouse of treasure set up by a beneficent Deity.

WANTED HIS MONEY'S WORTH

Nobleman Evidently Had Some Idea That Great Musician Was Giving Him the Worst of It.

Wienlawski had his humorous experiences, this even after he was quite widely known, writes Alexander Bloch in the New York Times. On one occasion he was asked by a wealthy British nobleman to state his terms for playing half an hour at his home. They came to an agreement, and on the evening of the musicale Wienlawski opened the program with Beethoven's "Romance in F."

He was playing his best and deeply engrossed in the music when he suddenly noticed out of the corner of his eye the host nervously looking at his watch. This happened several times before the "Romance" was finished.

At its close, as he was bowing his acknowledgments to rapturous applause, the British peer caught him by the sleeve and whispered in his ear:

"For heaven's sake, man, how much do you expect to get through in half an hour at this rate? Why do you play such slow pieces?"

ROOTS SUPPLY SUCCULENCE

The chief function of roots in cattle feeding is to supply a succulentions the quantity of nutrients grown per acre in root crops is small in comparison to the cost of production. These root crops, however, can be preserved during the winter equally well whether large or small quantities are fed each day, and therefore have special application when only a few cows are to be fed. Of the different root crops, mangel-wurzels furnish the greatest yield per acre. Other kinds of beets and turnips and carrots may be used. Turnips, however, should be fed after milking rather than before, as they cause a bad flavor in the products if fed immediately before milking. Carrots impart a desirable color to the milk.

ROMEO WAS CLAD IN KHAKI

Played the Popular Game, Choosing the Dinner Table to Work on Affection of Waitress.

It is natural that we should be eager to do whatever we can for the boys in khaki; but sometimes, when the patriotic zeal is not accompanied by a sympathetic imagination, the beneficiary may pray to be delivered from our friends, writes "An American Woman" in the Outlook.

A homesick lad is likely to want either an atmosphere like that of his own home or else the exotic flavor the expectation of which has helped him to undertake the great adventure so cheerily.

In one family among my neighbors the son of the house was scandalized when one of their guests at Sunday dinner made the perfectly simple and natural request that he be permitted after the meal to repair to the kitchen where the pretty waitress was. Permission was denied, but young Romeo was not discouraged, and this letter came "To the Girl That Waits for Mrs. So-and-So: You are the best ever. Are you keeping company with anybody?" He added his name and a few personal details, and this delicious bit of identification: "If you don't know which soldier wrote this, it is the one that touched your hand under the dish when you passed the potatoes."

Russia a Puzzle Even to Tolstoy.

"How can one understand chaos?" is the reply Count Ilya Tolstoy, son of the famous Leo Tolstoy, writer, philosopher and mystic, made to the question as to his interpretation of conditions in Europe.

If such a man as Count Tolstoy is at sea in regard to Russian affairs, it is surely pardonable for Americans to be in ignorance of them. The count says that the real Russia has not been consulted at all in the recent changes there. The real Russia is peasant Russia and peasant Russia has been ignored. The count pleads for American sympathy for his people, who, he says, have been deceived and misled. "The crime of all the Russian leaders," he says, "is that they have been following their own programs and ignoring the peasants, the masses." What will come out of the present chaos the count professes he does not know.

Long Leaves Are Most Economical.

A leaf weighing one pound contains 11 per cent of water if it is round and only 34 per cent if it is cylindrical. Therefore, she who buys long leaves gets 140 grammes more actual food for her money than she who buys round leaves.

The reason for this is that the sphere is the figure that contains the largest possible volume under the smallest possible surface, and, as evaporation is a matter of surface, this is greater from a cylinder than it is from a sphere of the same weight.

Where Thomas Yale Rests.

In the new American army there are many officers whose alma mater is Yale college, and some of them regard Wrexham, in North Wales, as a place of almost personal interest. For it is there that Thomas Yale, who inaugurated the great sent of American learning, was buried, and it is interesting to recall that in the early nineties a root of ivy from his grave was sent to Professor Phelps, formerly the American minister in London, to plant against the college building.—London Chronicle.

NATURALIST TELLS ABOUT GOPHERS

"The life history and control of pocket gophers in the Willamette valley," is summed up in a new O. A. C. experiment station bulletin of the foregoing title, written by a western naturalist, Howard M. Wright, now in army overseas service. Mr. Wright studied the living, feeding, and talking habits of the little pest and utilized the information gained in telling how to control its depredations by poisons and traps. Father and son will both be interested in the story and directions. A copy may be had free of charge.

This will be the greatest Thanksgiving since the days of the Pilgrim Fathers.

One hardly knows how to specify the causes for thankfulness, however, we might mention Peace by Victory, President Wilson, Marshal Foch, General Pershing, the French 75's, the Yanks, the Gobs, the 1918 wheat crop, sugar substitute, cranberry sauce and pumpkin pie. Add others to suit your individual taste.

He Was "Broken"

Capt. Wallace, U. S. A., was a victim of sinister forces that sought to betray America to the enemy. But he "came back." On the battlefields of France he fought for the honor of the army that had discarded him. He lived to win vindication and the hand of the "daughter of the regiment" who had never doubted him.

Bride of mmmmm Battle

Victor Rousseau's romance of the American army in France, which we will print in serial form, is a gripping story in which intrigue, love and war all play a part. It is the first up-to-the-minute novel of America at war.
