WISE AND OTHERWISE.

Germany does not appear to consider the treaty a treat.

If some day you were to hear a sound like thunder, and in response to your amazed inquiry were informed, "Oh, that was only prices falling," wouldn't you be delighted?

For a study of the depths of pessimism observe the child who comes down with the measles the first week of vacation.

While the Germans are considering the peace treaty, our army of occupation is considering what a privilege it would be to occupy Berlin.

The principal amusement in Europe at present is waiting to see which way the cat will jump.

Venus and Jupiter shine close and brilliant in the early evening. It is strange that we are not obliged to pay a luxury tax for having two evening stars.

No wonder that the Germans cling to the Saar Valley mines. They will need coal in this life, although some of them will have it furnished free in the next.

We are glad that Hawker is safe. His magnificent disregard for his life may be foolish, but it is inspiring.

Life in a summer cottage would be delightful were it not for the cups without handles and the saucers that do not match.

The Huns are not even entitled to the praise of being good losers.

If we compare life upon the farm now to what it was fifty years ago we shall find a wonderful increase in its convenience and comfort to the farmer.

Improvements in farming machinery have made the work somewhat less strenuous, and improved methods of farming enable better results to be produced with less effort.

But the greatest amelioration in conditions comes from the rural free delivery, the telephone and the automobile.

These have put an end to the farmer's isolation. He is now a member of the community, and a prominent one. Whatever the weather conditions news of the world comes to him regularly, and he is in immediate touch with neighbors and friends. Would you call the airplane voyage plane sailing?
