IMPORTANT ROAD CONSTRUCTION SHOULD HAVE ATTENTION

An all year road that would connect the lower part of this county to the north, eliminating the Juniper grade and be of much benefit to the people is reported feasible by citizens of Crane.

A representative of this paper recently discussed the proposition with a business man of Crane and it was once brought properly before the court it would surely receive consideration. According to the information given the writer only a small outlay of money is necessary. All that is asked is the building of a short distance of road to connect at the A. E. Brown place.

Last summer the citizens of Crane made an excursion to Jordan Valley for the purpose of gaining information about the possibility of getting business from that point to come to Crane. They invited members of the county court to accompany them and Judge Levens signified his intention of being a member of the party but the day before they started he received a telegram from the state highway engineer that he would be in Burns to take up some important matters in connection with the highway between Burns and Lawton and Judge Levens had to remain here as other members of the court were out of the county. Complaint has been made as to the lack of interest shown in this matter, and The Times-Herald made inquiry in order to get the facts.

It finds the matter has never been placed before the court in any form whatever, no petitions filed or even suggestions, therefore it is hardly to be expected that the court would act under the circumstances. If the road has merit; if it will be the means of aiding the people and bring out 1,500,000 pounds of wool from the southern part of the county that now has to be hauled to Winnemucca; if it will aid in getting the mails to the people of Andrews, Albernson, Fields, and Donio more quickly and regularly; if it will be the means of furnishing the people of those districts an all year round road to the county seat, the railroad and land office, it is worth putting before the court.

WANT RECORD OF SERVICE MEN

How would the people of Harney county feel to have the history of the service in the big world war published with only \$3 of the boys mentioned in it? Yet that's what it amounts to at this time. The state historian is desirous of the necessary data being furnished in order that the history may be as complete as possible. The work of gathering this information has been placed with the schools on the several districts in this county, just as it has in the other counties of the state. A total of 83 have been reported and are of record in the school superintendent's office. Twenty of

HEADS MINE WORKERS

John J. Lewis, president of the United Mine Workers of America, central figure in the big strike discussion and rulings of that organization.

GRIFFITH INTRODUCES SUFFRAGE BASEBALL

There is no "off-season" for Clark Griffith, owner and manager of the Washington, D. C. American league ball team. Griffith teaches women and girls to play the great game. Here he is umpiring a game between women teams from government apartments. Griffith—the old fox—says women can play ball as well as men—if they'd give the same time.

these are from the Burns school district, two from Crane, seven from Drewsey, five from Riley, etc., many of the districts show no return whatever.

Harney county sent a lot of boys out to war service and we owe it to posterity to have a record of their service kept. The object of the state in making this record is to forestall any effort to commercialize this work. It is the desire to secure every bit of information obtainable.

The work may be added much now since the American Legion has been organized and the records of the men who join may thus be obtained. It is up to every citizen of this section to aid in the work of gathering the necessary information. We want Harney county's part in the world war to be of record, as it is only justice. In later years this will be of more importance than we now realize.

Not only is it desired to have a complete record of the boys who were engaged in the field, but also of other activities, such as Red Cross, Liberty Bonds and similar work that was a part of the program of winning the war. The active committees engaged in such service, the efficiency of the work as to its success in doing what was asked—proving 100 per cent, and like information should be furnished.

Will Harney county be represented in this state history as it should be or are we going to allow it to go to press with practically nothing said of it and which will always be looked upon with shame by our citizens in future?

It is up to every individual who can do something toward this matter.

SOURCE OF QUESTIONS, TEACHERS' EXAMINATIONS

Following are given the sources of questions for teachers' examinations which will be held at each county seat on December 17, 18, and 19, 1919:

Arithmetic—One-sixth from the course of study and five-sixths from Hamilton's Essentials of Arithmetic. Civil Government—Community Civics, by Hughes, and current events. Geography—One-sixth from the course of study and five-sixths from Tarr and McMurry.

Grammar—One-sixth from the course of study and five-sixths from Potter, Jeschke and Gillett, Book II. History—One-sixth from the course of study and five-sixths from School History, by Mace, and current events.

Orthography—One-sixth from the course of study and five-sixths from The New World Speller.

Physiology—One-sixth from the course of study and five-sixths from Healthy Living, Book II, by Winslow, and Advanced Physiology and Hygiene, by Conn and Budington.

Reading—Course of study for the elementary grades.

School Law—Oregon School Laws, 1919 edition.

Theory and Practice—How to Teach, by Strayer and Norworthy. (One question on theory and practice will require the applicant to prepare a report on library work, including a discussion as to what would determine his choice in the selection of books for a school library.)

Writing—The Palmer Method of Business Writing.

Algebra—New High School Algebra, by Wells and Hart.

Composition—Written and Spoken English, by Clippinger.

American Literature—Two-thirds from American Literary Readings with Introductory History of American Literature, by Payne, and one-third from American classics.

Physical Geography—General Science will hereafter be taught in the schools instead of physical geography; hence, the questions will be based on First Year of Science by Snyder.

Psychology—Introduction to Psychology, by Head.

Bookkeeping—Principles of Bookkeeping, by Miner and Elwell.

Botany—Practical Botany, by Bergen and Caldwell.

Geology—LeConte's Compend of Geology.

Geometry—Plane and Solid Geometry, by Durrill & Arnold.

History, General—Ancient Times, by Broadest and Medieval and Modern Times, by Robinson.

History of Education—History of Modern Education, by Parker.

Literature, English—Two-thirds from English Literature, by Long, and one-third from English classics.

Physics—A First Course in Physics, by Millikan and Gale.

Chemistry—First Course in Chemistry, by McPherson and Henderson. (For graduates of non-standard colleges only.)

FRANCES CLARK, County Superintendent.

Nature is the foundation of character building, we are told. True, but in many cases the foundation is so rotten that character never makes its appearance.

IT'S HIGH-LOW YEAR IN BLOUSE RANKS

At last, the blouse ranks are leveling out. The high-low year is over. The blouse is no longer a fashion statement, but a practical garment. The women of today are more concerned with comfort and utility than with the latest trends. The blouse is now a staple in every wardrobe, and its design is more functional than ever before.

EVEN GREAT COMETS ARE SHORT IN WINTER

Winter coat days are here again and fur still retains its place of importance. The great collar of the dark green coat of boules shown at the top suffices without fur. But the wide-margined velvet in the center calls upon the yellow fox for its collar and with a fur to match.

The air market remains steady, with no advance in sight.

FALL OR WINTER SUIT

You can gratify your wish for a new FALL OR WINTER SUIT at exceedingly modest outlay here.

WILLIAMS-ZOGLMANN CLOTHING COMPANY

HIGHWAY ENGINEER VISITS

District Engineer O. M. Bennett of the state highway commission, is a visitor to this vicinity. Mr. Bennett came in to make an investigation of the work being done on the highway and to consult with local people in regard to certain phases of it. The engineers representing the commission on the job have spent considerable time and money in prospecting for gravel pits along the route in the hope that satisfactory material might be found that would eliminate the long haul, but up to the present time it has been a failure and the gravel is being hauled from the nearest pit at the hills to the north. However, the engineers insist in continuing their search and we are informed will sink more test holes with that in view.

OHIO'S GREAT STAR RANTING AGAIN

Captain "Chick" Harley of Ohio State grid team, is proving conclusively for all time that he is one of the greatest football players of his day. In 1918 Harley was selected All-American fullback by Walter Camp, then went to war. Harley got away for a 55-yard run, beating Yost's great Michigan team in his first big game this year.

Save Your Eyes

Eye strain causes headaches, nervousness and other troubles. I fit glasses accurately and scientifically. All Work Guaranteed. MAURICE SCHWARTZ, Optometrist. Office with Dr. B. F. Smith.

desire was a road built of the best available material and that the club had an interest in it, therefore a committee consisting of Sheriff Goodman, Chas. M. Faulkner and T. S. Geer was appointed to keep in touch with the work and make reports.

RABBIT PEST MAN GETS BUSY

E. E. Horn of the U. S. Biological Survey, has been spending the past week visiting several of the districts of the county and making preparations for the campaign against the rabbit pest. Mr. Horn is calling upon the farmers in the several neighborhoods, explaining the method of procedure and getting them organized to take up the work in connection with himself.

The plan is to have each community organized to look after the distribution of the poison and watch results. Mr. Horn will have to cover a big territory and therefore can not be at one place long at a time but can direct the work and help each community. The poison must be properly placed and the people fully informed in order to prevent loss of stock from the poison, see that the poison is placed at such points as likely to do the best execution, etc. This can be done, by the residents themselves under the direction of Mr. Horn.

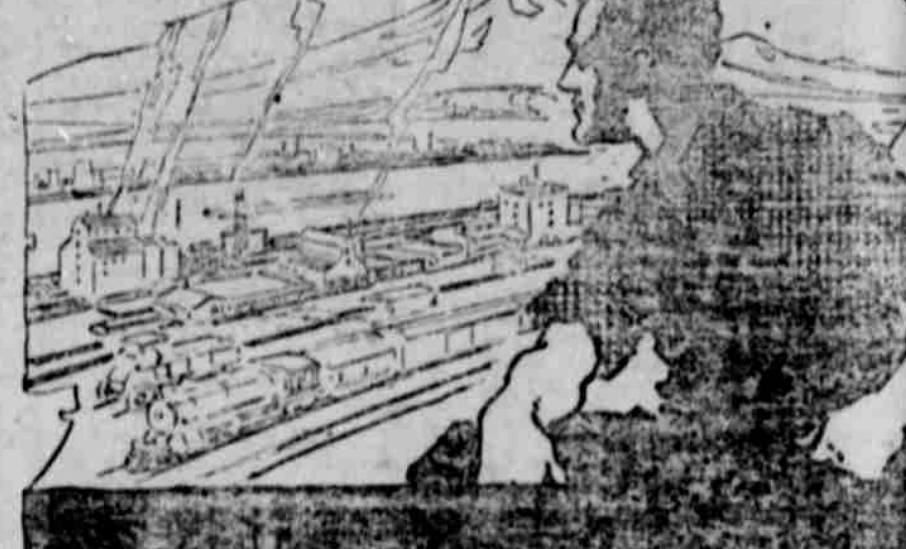

The man who exaggerates can never understand why he is doubted when he speaks the truth.

Oregon Has Great Natural Resources

APPROXIMATELY one-third of all the water power in the United States is within the Columbia River Basin.

The water power resources of Oregon are roughly estimated to be 3,500,000 horsepower. This is a great asset.

It means that Oregon will eventually become a great manufacturing center. Nature has done much. But you must do your bit.

Encourage the rapid growth of Oregon industries by purchasing Oregon products.

Associated Industries of Oregon

We Court Public Opinion ON PRICE AND QUALITY OF GROCERIES

We established our business on the principle of being fair with our customers, giving them full value for the money they leave with us.

We have continued that policy throughout the years we have been serving you, and we are pursuing it more persistently than ever in this exasperating era of price inflation today. In our efforts to keep prices as near normal as possible we are selling at a closer margin of profit than ever before. But we NEVER lower the standard of our goods.

On this high plane of commerciality we solicit your patronage:
