

The Times-Herald.

Harney county's resources are attracting the attention of the entire West. Irrigation, stock raising, mines, oil and gas prospects and agriculture—all awaiting development.

VOL. XXXIII

BURNS, HARNEY COUNTY, OREGON JUNE 12, 1920

NO. 33

BOYS AND GIRLS BUY PURE BRED CATTLE

County Agent McDaniels Has Organized Calf Club; To Arrive Next Week.

"Some meetin' fellers!"
"You bet—Say! Why didn't you take a Shorthorn so's you'n I could work together?"
"Notin' doin' my dad says the Whitesides is better rustlers. He knows you bet."
"Yes but the Shorthorn's birren a Whitface an'll take on fat quick-er."
"What yu givin me, Betcha I'm that prize at the fair."
"Betcha don't."

The above dialogue was one of many heard at the Commercial Club house, Friday evening when the respective members of the first Pure Bred Cattle Club ever organized in Harney County with their fathers and backers met with the County Agent McDaniels for the purpose of discussing ways and means of getting the twenty odd head of registered Shorthorn and Hereford cattle from Crane to Burns after they arrive about June 17th.

Any one looking into the faces of the eager eyed, intelligent and ambitious youngsters and listening to their talk could go away feeling that the future of the pure bred livestock industry in Harney County was indeed in safe hands.

It can be said—and greatly to their credit—that the parents and backers of the boys and girls were not one whit behind in enthusiasm as evidenced by their unanimous authorization to instruct the breeders to draw upon them through the First National Bank of Burns for \$100 to cover the cost of one year's insurance against loss from any cause for each animal.

Members, McPheters, Davis and Thornburg were appointed on a committee to see that the animals were safely delivered in Burns from Crane.

Upon arrival at Burns they will be housed at the feed barn until June 17 when they will be allotted through drawing to the members of the Club and paraded through the streets.

Mr. L. J. Allen, State Livestock Club Leader from the Oregon Agricultural College, Mr. Dawson, Field Man for the Shorthorn Breeders Association, Mr. W. E. Green of the Valley Junction Farms and other prominent men interested in the pure bred livestock industry will be present and talk to the boys.

Surely, June 23rd will be a red letter day for a score of Harney County boys and girls.

As will be noted two of the club members are girls, therefore, it is a safe bet that every animal will have exceptional care as no boy is going to let a mere girl get a look in at the prizes that will be given at the fair this fall for the greatest improvement shown by them under dual ownership of a club member.

Professor E. L. Potter, head of the livestock department of the O. A. C. and one of the best judges of cattle in the Northwest will judge the animals on points before shipping and will also be here to judge them at the fair and award the prizes.

The members will be divided into two classes—One Hereford and One Shorthorn. The Shorthorns are from the Valley Junction Farms of W. E. Green & Sons and the Herefords are from the famous Chandler herd at Baker.

Shorthorns: John Welcome, Adolf Byrd, Buras McGowan, John Culp, Elwood McPheters, Herbert Whiting, Amy Turner, Jack McDaniels, Hilton Whiting, Bessie Hansen, Raymond Voegly, James Varlen, Delphine Whiting.

Herefords: Alfred Welcome, Vernon Tudor, Arthur Thornburg, Billy Gouldin, Harold Baker, Ian Davis, Charles Hotchkiss, Leslie Terrill, Charles Irving.

Applications are in from others wishing to enter, boys and girls, and it is possible to secure the animals this fall. This list will be enlarged to accommodate a few more live wires.

Kemp Hardisty was down from his Trout creek home the other day.

On Their Honeymoon. CHIMES TO STRIKE THE PASSING HOURS

Mr. and Mrs. W. L. Wooley arrived in this city last night from their home at Caldwell, Idaho. Upon reading of the Pioneer reunion in the Times-Herald last week they made up their minds to come over and join with their old time friends in the gathering.

Mr. and Mrs. Wooley were married in Burns thirty-one years ago tomorrow and for many years made their home here. Mrs. Wooley was formerly Miss Cora Harris. It has been eighteen years since she was in Burns, yet she meets many of her former acquaintances as familiarly as though they had been parted but a short time. Bill formerly worked for Peter Stenger and other stockmen of this vicinity.

The Wooleys have three boys but all are grown and are in homes of their own. This trip to their former home is a delayed honeymoon since they will celebrate their thirty-first anniversary tomorrow.

COMMUNITY NURSE SPENDS TIME ON SILVER CREEK

Miss Sara A. Howell, the community nurse, spent several days of the past week on Silver creek where she met the people of that community in their homes. Miss Howell finds many hospitable people in her work and is glad to become acquainted with them, and to give such assistance as she can in her capacity. She is hiding her time until the opening of the fall term of schools to begin active work in that line and in the meantime is covering as much of the county as she can conveniently, getting acquainted with the people. She hopes later to be supplied with a car as thus she may visit as she sees fit and stay as long as necessary without being subject to the convenience of car drivers with whom she may now find ways to reach her destination.

SUMMER NORMAL SCHOOL COURSE AT PENDLETON

Pendleton, Oregon June 5—(Special) An extension summer school of the State Normal School at Monmouth will be held in Pendleton starting June 21 and lasting for six weeks. The course will be identical with the summer normal course offered at Monmouth and the same credits will be allowed. The course will include instruction in special methods, educational psychology, physical training, public school music etc. The tuition charge will be \$6.00 for the entire course.

Announcement of the course at Pendleton was made recently by President Ackerman of the Oregon normal after consultation with Pendleton school officials. The purpose in holding the summer school at Pendleton is to accommodate Eastern Oregon teachers and incidentally to relieve the crowded condition at Monmouth.

H. E. Inlow, new superintendent of the Pendleton schools, will be director of the summer school. The faculty will be composed of regular instructors from the normal school faculty at Monmouth and several Eastern Oregon educators of ability. Superintendent Inlow who has been two years with the Pendleton schools was formerly superintendent of Forest Grove and is known as one of the strong school men of the state.

The summer school at Pendleton will be held in the high school building. This is a large, modern structure, well equipped in all respects. A cafeteria is conducted in the building. There are tennis courts on the campus and gymnasium accommodations. Pendleton also has a wonderful public natorium which will be available for those taking the summer course.

The Ellison-White chautauqua will be held in Pendleton while the summer school is in session thus allowing students opportunity to attend its programs.

Special steps are being taken to list good living accommodations FOR THE TEACHERS. All requests for accommodations or for other information regarding the summer school should be addressed to H. E. Inlow, director, Pendleton, Oregon.

Fred Otley was among our business visitors during the fore part of this week.

BAD FEATURES OF BIRD BILL REMOVED

The Harney County National Bank of Burns Installs Illuminated Clock.

The Harney County National Bank has erected a magnificent electric illuminated clock on the front of its bank building, not only adding materially to the appearance of the busiest section of Burns, but providing a convenience that will undoubtedly be greatly appreciated by the general public.

The most distinctive feature of the clock, other than its unusually artistic appearance and the perfection of its mechanism, the complete set of Westminster chimes with which it is equipped. These ring every quarter hour and may be heard practically as far as the clock may be seen.

The big clock is operated by electricity from a master clock inside the building, in the main banking room. This is an especially handsome structure of bronze and plate glass construction, with a 12-inch dial, and guaranteed to keep practically perfect time. Every minute the hands of the big clock are sent ahead one minute by electricity governed by the master clock within, the connection between the two instruments being perfect and insuring correct time on

NEW BILL DRAFTED LEAVING OUT OBJECTIONABLE PART; WILL NOT HOLD UP PROGRESS.

Charles W. Ellis arrived home last night from a trip to outside points in the interest of the Roosevelt Bird Refuge Bill. He was sent as a representative of the citizens of this section to present the matter before the Federated Women's Clubs congress at Enterprise and later he continued his journey to Portland where he joined Dr. L. E. Hibbard in placing the matter before some of those responsible for initiating the bill. The result was most gratifying and satisfactory as they succeeded in having the bill redrafted without the objectionable features. It is now satisfactory to the people of this county who never did object to the reserve but did object to its interfering with the development of the country. The bill now reads and will go on the ballot providing: That the state "cede and convey to the United States of America, (subject to existing water rights, filings and applications to use, impound or appropriate water made in conformity with the water laws of the state of Oregon.)" Thus it will not interfere with the irrigation project.

Wayside Observations

County Agent—L. E. McDaniels
Nearly everyone is poisoning squirrels with good results. Keep up the good work as long as they are out which will be only a short while now and they lay in a supply of poison in order to be ready for them when they first come out again in the spring. Concerted action another season will make the squirrel menace a thing of the past, after another season.

County Fair Assured
Are you preparing for the Livestock and Agricultural Fair to be held this fall? If not it will pay you both individually and as a community to begin preparations for attending and exhibiting the resources of your farm and ranch.

Harney County has had some splendid fairs in the past, but from the responses received, the coming fair will eclipse anything ever held along the line of pure bred horses, cattle, sheep hogs and poultry, in addition to a wide and varied exhibit of farm and dairy products.

The eyes of the entire county is upon Harney County on account of the proposed irrigation district and the hundreds of prospective settlers will be at the fair to see what each section can produce, therefore, it is up to every ranchman and farmer to give the matter of a suitable individual or community exhibit their earnest attention.

The County Agent will assist in the selection and collection of exhibits when requested to do so.

The educational and entertainment features will not be neglected as they will be in capable and experienced hands. More of this later—The principal thing now is to get busy—prepare an exhibit yourself and induce your neighbor to do likewise.

Grasshoppers Hatching Out
The attention of all is called to the utmost importance of watching closely for the first appearance of grasshoppers this year as they can be destroyed cheaply and efficiently during the first few days after hatching, with poisoned baits or other means, but requires hard labor and much expense once they can fly.

Poison is any quantity desired can be had at cost through the county agent or you can mix it yourself after this formula.
To 25 pounds of wheat bran use one pound white arsenic or paris green, 6 finely chopped oranges of lemons, 2 quarts heavy black molasses and 2 to 4 gallons of water.

The bran and poison is thoroughly mixed dry. The fruit is then added and lastly the molasses and water is poured over the mixture and worked until the entire mixture is moist enough to ball up.

The mixture should be sown broadcast over the ground at the rate of from 5 to 8 pounds per acre.

It is absolutely essential that the mixture be kept as moist as possible to allow broad cast sowing.

The best results are obtainable by sowing late in the evening.

Do not be disappointed if results do not show at once as it takes about 24 hours for the full effect of the bait to become apparent.

Fresh horse droppings may be used as a substitute for the bran if desired and where available it is recommended that these be used to lower the cost.

Season tickets to the Chautauqua may be found on sale at a few of the business houses in this city. By comparison with the daily admissions it will be found that it is economy to buy season tickets as three admissions to evening programs equal the price of a season ticket, besides it is an aid to the committee and the guarantors to buy the season as they are credited upon the guarantee while daily admissions go to the Chautauqua with the exception of 25 per cent.

Mr. and Mrs. J. H. Henderson were up from their home at Narrows the first of this week. They have recently moved into the hotel at Narrows from their farm adjoining the town.

THIRTY YEARS AGO IN HARNEY COUNTY

Items Taken From Files of This Paper Dated June 11, 1890; Some Births.

Thirty years ago this week as recorded in The Times-Herald. That's what is disclosed in the items appearing below. The elections were held in June in those days and the first general election following the establishment of Harney county had been held and the issue of the paper dated June 11th, gives the following officers elected:

W. E. Grace, county clerk; Wm. Miller, judge; A. A. Cowing, sheriff; W. E. Alberson, assessor; Thos. H. Roberts, treasurer; T. A. McKinnon, surveyor; Wm. Altzow and N. E. Duncan, commissioners; Chas. Newell, school superintendent; E. P. Moore, coroner.

Born to the wife of Irwin Geer, Saturday, June 7, a daughter, weighing 8 pounds.

Miss Maud Jameson entertained her many friends with a birthday dinner last Sunday.

The freight wagon of P. F. Stenger, driven by W. L. Wooley, and loaded with wool, ran off the bridge that spans the ditch running through town near the old town hall and upset, causing a few curs words and a delay of about half a day.

Simon Lewis, M. V. Smith, Mr. Baker and Robt. Williams of Silver Creek, were in town Friday night, remaining until Saturday afternoon. Married—At Harney, Monday, June 9th. Bud Beard and Mrs. Lucy Baird widow of Joe Baird.

Born to the wife of Al Reineman, June 10th, a son, weight 8 pounds.

Lunaburg & Fry have received their stock of boots and shoes.

Thos. Potter, loaded with dry goods and groceries for N. Brown, arrived Sunday.

Dr. Horton will move to Burns in a few days to follow his profession. John Robinson expects to start in a few days to the railroad for his family, who have been in the Willamette Valley visiting friends. When he returns from the railroad he will make his home in Burns.

Among the professional cards appearing in that issue are: Doctors, T. V. B. Embree and S. B. McPheters. Lawyers: Nat Hudson, C. A. Swook, Geo. S. Sizemore, M. Dustin, W. W. Cardwell, M. R. Biggs.

MAGGOTBAIT

To labor hard, preparing gardens for home use or, field crops of cabbage, turnip and other root crops, only to have them killed by pests is not likely to prove encouraging to the amateur or professional gardener.

Of late years root maggots have become so troublesome that almost every entomologist in the country has been searching for something with which to deal a deathblow to the maggot pest.

Every now and again some one would come forth with a "sure remedy" only to disappear in the background after a few trials.

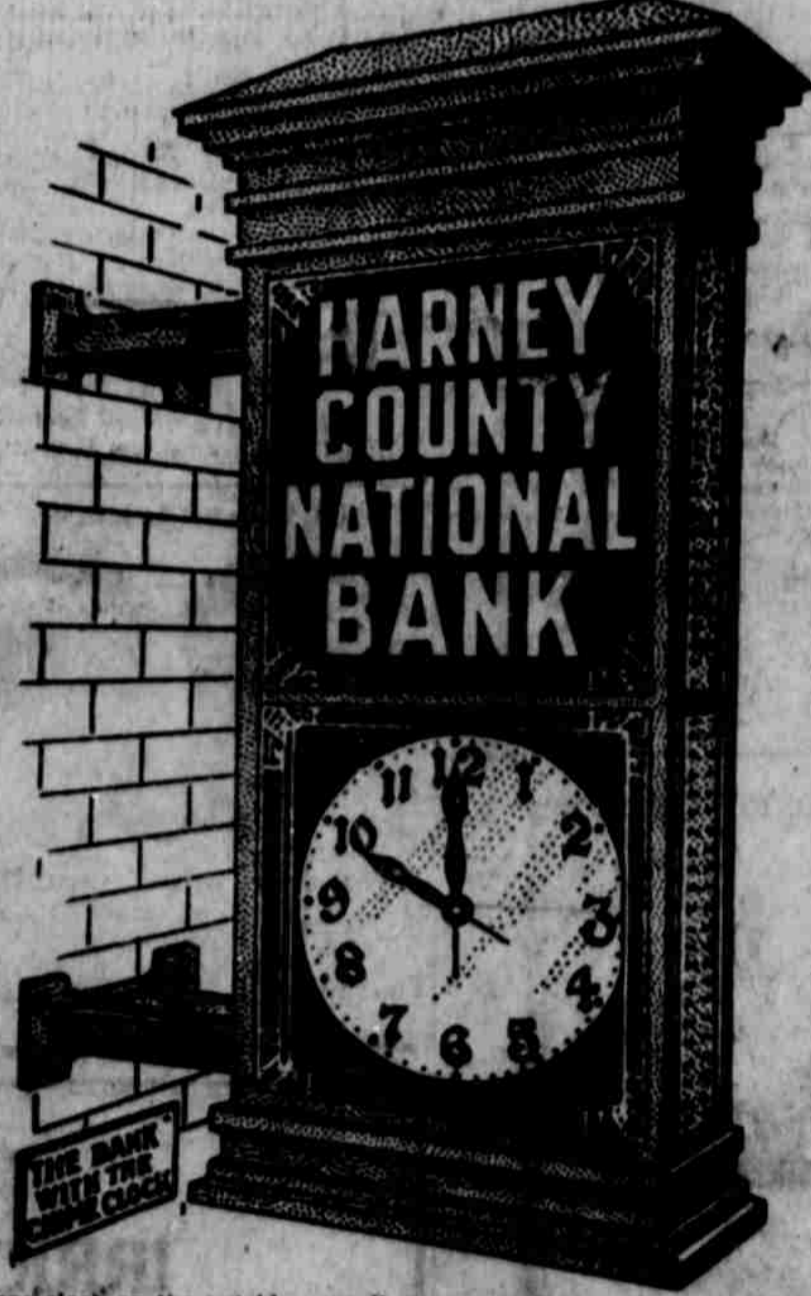

THE CHARLES H. LILLY COMPANY grows every year, for seed purposes, between five hundred and a thousand acres of Cabbage, Turnips, Beets, etc., and the damages done by root maggots makes serious inroads upon the crops. In fighting the maggot pest this concern obtained the best information procurable from State and Federal experimental sources.

LILLY'S MAGGOTBAIT is the result of this investigation.

It acts externally, for insects living beneath the soil on roots of plants, including both sucking and biting insects, prominent among which are the grubs and maggots in roots of cabbage, onions, radishes, etc., cutworms, wireworms, apple and peach root-aphides, the grape phylloxera and many others.

Full directions for using are to be found on each package and no gardener should procrastinate but should arm himself with this weapon today.

Among a deligation of ladies up from Crane last Tuesday were: Mrs. H. J. Jokisch, Mrs. P. S. Weittenhiller, Mrs. Cady and Mrs. Curry.

The large clock on the outside as well as on the master clock inside.

The clock is attached to the front of the bank building at a sufficient elevation to be plainly visible from all parts of the main street. The clock is 7 feet in height by 2 1/2 feet in width, of dark bronze with copper hood at top and bottom. Both faces of the clock are alike, the top being surmounted by the words "Harney County National Bank" in illuminated letters. This is added by a sheet of copper in cut the letters, laid over a clear white glass, with crystal plate glass on the outside.

The dials of the clock are 24 inches in diameter, on glass with crystal glass on the outside.

Cashier Leon M. Brown, of The Harney County National Bank, offers the following explanation of the beautiful Westminster chimes, consisting of five tubular chime bells, with which the clock is equipped, giving interesting information regarding the chimes themselves as well as explaining the objects which have prompted the bank to offer the public the many advantages to be derived from this beautiful clock:

"As a home institution serving the people of this locality—enjoying your good will and business favors, we have in the past endeavored to

show our appreciation by presenting our patrons with calendars and novelties, and otherwise recognizing your co-operation in making this a serviceable and successful banking house.

"Years of prosperous banking have been made possible only by your support. We wanted to show our appreciation in a substantial way and have therefore purchased of the manufacturers, the O. B. McClintock Company, of Minneapolis, Minnesota, including their exclusive rights for this city, a large, handsome clock, combined with a set of the softest and most beautiful chimes ever heard in any city of the old or new world.

THE CHIMES
"Lord, through this hour
Be Thou our guide
So by Thy power
No foot shall slide.

"Everybody who has lived within the sound of the bells of Westminster is familiar with the verse given above. The origin of the carillon has never been positively established. Some writers accredited it to a Mr. Crouch, who was a pupil of Dr. Randall, Regius Professor of Music. This, however, is disputed by other writers who accredited it to Dr. Ran-
