So long as we shoot at long range and don't get together on things of vital interest to our town and country we are not going to do much damage or good either. This thing of "passing the buck" and shifting the responsibility upon the other fellow has to cease. If it is worth anything to the town or community it is worth backing up in a personal way. If the other fellow won't do his part then it is up to those in a position to make it so interesting for him that he will "come through." Let's get down to "brass tacks" and see if we can't get somewhere with the development of this country and put ourselves on the map proper. Don't leave it to the other fellow—see to it personally yourself—that's the way to get things done.
