THE TWO SPIRITS

Two Spirits are always at war, struggling to rule the world and each one of us. One is the spirit that donies; the other the spirit that oreates. Let any plan be proposed, aby enterprise initiated, any scheme suggested for the good of mankied, and people quickly fall into iwo groups or classes, according as they are ruled by one or the other of these two spirits. The cleavage at once appears between Fear and Faith, batween the backward-looking and the forward-looking, those who doubt and those who dare to attempt new urdertakings.

The spirit that denies is afraid of the untried, and casts doubt on all the generous impulses and enthusiasms of man. It mocks, discourages, finds fault, raises objections, sees all the difficulties, real or imaginary; it clings to the old, the secure, the established-forgetting that things as they are were once new, untried and full of uncertainty This spirit Goethe called the Devil, the only devil that nead be feared, and a devil that lurks in all of us, shouting "No" to every constructive proposal. It is the cynic that sneers at ideals as day-dreams and delusions, and jeers at the high motives of men, denying the reality of disinterested service and sacrifice. It professes to be very "practical," but it never makes any discoveries, and refuses to try anything until someone else, braver than itself, has put it to a test.

The spirit that creates conceives a new age, dreams of a new world, and trusts human nature. It sees things as they are to be a prelude of things as they may be, must be, can be. It believes that plain common people like ourselfes are capable of great world, to encourage others, to gladden life with faith in the worth of powers.

known as the Forest Service. The years rolled by and still nothing happened in the way of timber utilization. But the timber was being protected and allowed to grow against that future need which still held a permanent place in the dreams of the "Old Timers." By and by farsighted citizens began to grow impatient and decided that it was time to wake up Uncle Sam from his lethargy and to ask the very pertinent question of why this timber could not be sold and bring a new activity into the community life.

The Forest Service had planned to do the very thing the citizens asked but perhaps at not so early a date. In any case, a new cruise, a new timber apprasil, and a new sale was offered to the public known as the Bear Valley unit, containing 890 million feet of timber. With it was the promise of the Forest Service to furnsh fifty million feet of timber, more or less, to a sawmill and wood-using industry perpetually. A big sawmill and a railroad, piways busy sawing logs and hauling forest products, that was the promise the Forest Service made to the people of Harney County.

Mr. Fred Herrick bought that unit of timber, and in doing so accepted his part of the obligation which was to build the railroad and the sawmill and to make use of the resources of the wilderness which had formed the background of the Harney county community since the ploneer days.

You have gathered to-day to celebrate the accomplishment of the first step in that new enterprise. The railroad has come to Burns It is the "coming event" which is already casting its shadow before it, portending the fulfillment of that timber dream of long ago. I want to congratulate not only the people of Harney county but also Mr. Herrick for his part in the enterprise. Especially do 1 want to congratulate my old friend, Jim Girard, whom I hope everybody in Harney county knows and appreciates by this time.

I am delighted and rejoice with you. I want you to note particularly that this development of the lumber industry is something different from things! it nurses the seedlings of the usual development. How many faith, talent, intelligence, construct of you have seen a deserted sawmill development of one of the most tive energy, self-reliance and self-re- town? If possible it is even a little spect. It believes, it affirms, it seeks more depressing than a deserted minto build, to create, to beautify the ing town. If you have ever seen one you understand what it means to cut the timber and have the sawmill in which we all are so much interestman and the joy of using his high | ccases operating, leaving only a monument in the shape of a huge

The influence of man, his power sawdust pile. With the help of this community, in forest fire protection and its hearty support in all the activities of the Forest Service in the mountains, the sawmill which Mr. making and need men of vision, pow- Herrick is to build need never cease er and leadership to lift us out of operating for lack of a timber supthe rut and discover the measureless ply. We are going to grow timber na fast as Mr. Herrick can cut it. The people of the United States, acting through the Forest Service, are in the business of growing timber as a crop, and the Malheur National Forest is only one of the many Na-

for good, the worth of his life to him self and others, in his community, depends on which of these two spirits rule his life. We are still in the possibilities of our own time. With hats off to the past; coats off to the future, let's join hearts in one faith; join hands in one purpose, and do the things that need to be done.

FORESTRY NOTES

-M. M.

The gathering of cattle which began early in August has resulted in demonstrated. the removal of practically all the cattle from the forest range. Lack of has made early removal of the stock livestock. And we want the mounnecessary.

Even though there has been very little rainfall over the forest land it tined to prosper in your community. is believed that th cooler weather of the past couple of weeks combined with the longer nights and rising Burns and the surrounding country a humidity has brought the worst fire season on record to a close as far as Oregon. the Burns District is concerned. The King Mountain and Myrtle Butte lookout stations have been closed for the year and the smoke chasers have been relieved from duty.

The Forest Service was represented in the Railroad Day program on September 24 by Messrs. J. T. Eldridge of the Forester's office in Washington, D. C., and Fred Ames of the District Office in Portland... Mr. Ames read a message from Col. W. B. Greeley, Chief Forester of the United States in which he expressed his interest in the development of the Burns country which is so closely associated with the development of the Malheur National Forest. The bad fire situation in California prevented Col Greeley from being present in person as he had planned.

The Forest Service is proud to do its share in the fulfillment of one promise of American life-a happy and prosperous community of good western folks.

J. F. Eldridge, of Washington. D. C., was another representative of the Forest service present and he gave a short address in which he stated emphatically the service was behind the project to market the Bear valley unit and that the citizens of this section would have the active cooperation of the department in expediting matters.

Others who appeared on the program were Donald Stirling, managing editor of the, Portland Journal, Henry J. Frank of the Portland Chamber of Commerce, Louie Wol-H. L. Plumb of Band, Supervisor denberg, of Canyon City, Walter Because of the unfavorable weather ner. It is estimated that over 3,000

drers of pounds of barbecued beef theer were sandwiches, pickles, Ralph Catterson recently returned prunes, cookies, fine coffee, etc.

"We extend to the people of Burns -most of you are our old and dear friends-our heatry congratulations upon the completion of rail connections with the outside world. We certainly would be delighted to be with you today and have a part in your festivities and to share in your joys and your triumphs. Yours with pleasant memories of bygone days." Another interesting message that was a part of the celebration was one from George McGowan, the "daddy" of Burns, who named the town. It was a great disappointment to Mr. McGowan that he could not

he present. He sent the following in addition to a personal message:

BURNS

All the world loves Bobby Burns His Banks O'Doon and a' that; He was a bard of much regard 'mong humble folks an' a' that. For a' that an' a' that His "mans a man for a' that" Tho he's not here to taste our cheer His spirit is for a' that.

Town is waking up and a' that, With poe'ts vision looking down The glowing years, an' a' that. For a' that an' a' that, Its timber fields an' a' that, Its wide domain will well maintain Ten thousand homes for a' that.

And now his namesake, Burns, the

The weary years of hopes and fears Are past and gone for a' that The silver dream of forty years Is coming true for a' that; For a' that an' a' that The humming mills an' a' that Its broke its shell and left its cell With iron horse an' a' that.

Then let us pray to haste the day 'As come it will for a' that." When watered fields, with banner yields

Will dot the vale for a' that For a' that an' a' that With countless herds an' a' that The fertile soil inlaid with oil Will see the light for a' that.

THE OLEO MARGARINE AND CONDENSED MILK BILL

At the last session of the legislature, a law was passed which briefly There were at least 1000 local peo- forbids the manufacture and sale

dustry provides a very large percent age of the taxes. It austains the banks and stores. It renews and maintains the fertility of the soil.

Anything no matter what, which affects such an important industry surely is worthy of the close attention of the voters.

In order to understand all phases of the subject clearly, it has been divided into various heads, and each one will be discussed separately as follows.

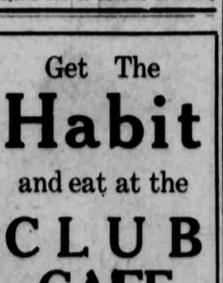

1 Economic value of the dairy industry to Oregon.

2 Value of the dairy industry from the standpoint of health and development, particularly as relates to children.

Effect of the oleo margarine industry on dairying in Oregon. 4 The aim and intent of the oleo

AT NOVEMBER ELECTION

We will vote on whether coconut oil substitute shall be sold and advertised as butter. Think about it-Scientists say that the vitamine A is absolutely essential for growing children. It is found in abundance in butter while none is found in coconut oil. You want your children to keep healthy and develop both physically and mentally. Don't use substitutes for butter.

Vote 306 Yes on The Referendum Protect the children and Dairymen
