Did You Notice In a Competitor Advertisement of Last Week?

He quoted you a small list of prices and then added: "A Few every day prices until the markets compel us to make changes." He might just as well have said—"Here are only advertised prices and when you come to buy they will be higher." When we advertise a price—that price is good and that is the price you will pay when you come to buy.

We also make a further concession for the housewife who cannot take a whole case of one item. For an illustration if you cannot use a case of 24 cans of Tomatoes—but can use a mixed case, say 6 cans corn, 6 cans Tomatoes, 6 cans Beans and 6 cans Peas we will add any charges for mixing, just average the price of the 4 different items selected. This gives you the one case price even though you have 4 different kinds.

We have the volume of business and therefore the power to buy in car load lots and can distribute this merchandise to the people of Harney County at lower prices.

We use a car of flour every 45 days—buy milk in car loads, tomatoes, corn and peas in car load lots. In fact all of our groceries except a few fill ins are bought in straight cars. Our buying power is equal to the buying power of all the rest of the merchants in Harney County combined. Since it is an established fact that "well bought is half sold."

The result is that we can and do sell for less.

Our low prices, quality merchandise and our straight guarantee of satisfaction to every customer has brought us in the grocery department since June 1st an increase of 33 per cent in business over the month previous to June 1st.

"The growth of the Weinstein Stores is unparalleled in the History of Harney County."
