The East Oregon Herald

Has successfully maintained itself through an ordeal of local opposition, vindictive and unscrupulous to a degree seldom equalled in country journalism: has advocated unflinchingly the the people of East Oregon generally and Harney Valley especially against the machinations of all organzed petty cliques that sought by fraudulent misrepresentation to advance the private interests of a few at the expense of the many. Believing that "The sober second thought of the people is always right and always effective," and that "Truth is mighty and will prevail," The Herald has steadfastly followed THE RIGHT, and the people have given it a moral and material support that renders its permanency beyond question. As it has worked indefatigably and unselfishly in the interest of the people, it now asks for patronage that will yield something more than a bare existence. It has become valuable to all as a general newspaper, and

Is now a fixed Institution of the Valley.

THE EAST OREGON HERALD

Has, from the initial number to the present, persistently and impressively maintained that the Harney country was one of the finest agricultural regions in the Union, needing only the presence of industrious farmers to develop its wonderful resources. To prove the truth of the strong language in its columns, the proprietor gave up a part of his office room to the exhibition of the products of the Valley, and urgently asked for specimens of actual growth and for everybody to call and inspect them. Attached to each specimen was the name of the producer, often with the mode of cultivation. This was a tangible, practical presentation of the matter, which any one could verify. How successful this movement has been, hundreds can testify. All THE HERALD asks in return for its efforts to serve the people, is an increase of public patronage-a modest request when it is considered that it returns to each patron more than his money's worth. If each resident of the Harney country will subscribe or renew for himself and take one or more copies to send abroad, it will so extend THE HERALD'S sphere of usefulness as to enable all to claim that it
