

BY HENRY GEORGE.

CHAPTER V. (CONTINUED.)

THE PROTECTIVE UNIT.

The petty states of which a few years ago Germany and Italy consisted, ought upon this theory to have had, as they once had, tariffs between them. Yet now, upon the same theory, they no longer need these tariffs. Alsace and Lorraine, when provinces of France, needed to be protected against Germany. Now that they are German provinces they need protection against France. Texas, when part of Mexico, required a protective tariff against the United States. Now, being a part of the United States, it requires a protective tariff against Mexico. We of the United States require a protective tariff against Canada, and the Canadians a tariff against us, but if Canada were to come into the Union the necessity for both of these tariffs would disappear.

Do not these incongruities show that the protective theory is destitute of scientific basis; that instead of originating in any deduction from principles or induction from facts, it has been invented merely to serve the purposes of its inventors? Political changes in no wise alter soil climate, or industrial needs. If the three British kingdoms do not now need tariffs against one another, they could not have needed them before the union. If it is not injurious to the various states of Italy or Germany to trade freely with each other now, it could not have been injurious before they were united. If Alsace and Lorraine are benefited by free trade with Germany now, they would have been benefited by it when French provinces. If the people of the opposite shores of the great lakes and St. Lawrence River would not be injured by the free exchange of their products should Canada enter the American Union, they could not be injured by freedom to exchange their products now.

Consider how inconsistent with the protective theory is the free trade that prevails between the states of the American Union. Our Union includes an area almost as large as Europe, yet the protectionists who hold that each European country ought to protect itself against all the rest make no objections to the free trade that exists between the American States, though some of these states are larger than European kingdoms, and the differences between them, as to natural resources and industrial development are at least as great. If it is for the benefit of Germany and France that they should be separated by protective tariffs, does not New Jersey need the protection of a tariff from New York and Pennsylvania? and do not New York and Pennsylvania also need to be protected from New Jersey? And if New England needs protection against the Province of Quebec, and Ohio, Michigan and Illinois against the Province of Ontario, is it not clear that these states also need protection from the states which adjoin them on the south? What difference does it make that one set of states belong to the American Union and the other to the Canadian Confederation? Industry and commerce, when left to themselves, pay no more atten-

tion to political lines than do birds or fishes.

Clearly, if there is any truth in the protective theory it must apply not only to the grand political divisions, but to all their parts. If a country ought not to import from other countries anything which its own people can produce, the same principle must apply to every subdivision; and each state, each county and each township must need its own protective tariff.

And further than this, the proper application of the protective theory requires the separation of mankind into the smallest possible political divisions, each defending against the rest by its own tariff. For the larger the area of the protective unit, the more difficult does it become to apply the protective theory. With every extension of such countries as the United States, the possibility of protection, if it can be applied only to the major political divisions, becomes less, and were the poet's dream realized, and mankind united in a "Federation of the World," the possibility of protection would vanish. On the other hand, the smaller the productive unit the better can the theory of protection be applied. Protectionists do not go so far as to assert that all trade is injurious. They hold that each country may safely import what it cannot produce, but should restrict the importation of what it can produce. Thus discrimination is required, which becomes more possible the smaller the protective unit.

Upon protective principles the same tariff will no better suit all the states of our Union than the same size shoes will fit all our sixty million people. Massachusetts, for instance, does not produce coal, iron or sugar. These, then, on protective principles, ought to come into Massachusetts free, while Pennsylvania enjoyed protection on iron and coal, and Louisiana on sugar. Oranges may be grown in Florida, but not in Minnesota; therefore, while Florida needs a protective duty on oranges, Minnesota does not. And so on through the whole list of states. To "protect" them all with the same tariff is to ignore as each that part of the protective theory which permits the free importation of commodities that cannot be produced at home; and, by compelling them to pay higher prices for what they cannot produce, to neutralize the benefits arising from the protection of such commodities as they do produce.

Furthermore, while Massachusetts, on the protective theory, does not need protection on coal, iron and sugar, which she cannot produce, she does need protection against the beef, hogs and bread-stuffs with which she is "deluged" from the west to the injury of her agricultural industries, and of which protection would enable her to raise enough for her home consumption. On the other hand, the west needs protection against the boots and shoes and woollens of Massachusetts, so that western leather and wool could be worked up at home, instead of being carried long distances in raw form, to be brought back in finished form. In the same way the iron workers of Ohio need protection against Pennsylvania more than they do against England, while it is only mockery to protect Rocky Mountain coal miners against the coal of Nova

Scotia, British Columbia and Australia, which cannot come in competition with them, while not protecting them against the coal of Iowa; or to protect the infant cotton mills of the south against Old England while giving them no protection against New England.

Upon the protective theory protection is most needed against like industries. All protectionists agree that the United States has greater need of protection against Great Britain than against Brazil—and Canada against the United States than against India; all agree that if we must have free trade it should be with the countries most widely differing as to their productions from our own. Now there is far less difference between the productions and productive capacities of New Hampshire and Vermont, of Indiana and Illinois, or of Kansas and Nebraska, than there is between the United States as a whole and any foreign country. Therefore, on the protective theory, tariffs between these states are more needed than between the United States and foreign countries. And since adjoining townships differ less in industrial capacities than adjoining states, they require protective tariffs all the more.

The thirteen American colonies came together as thirteen independent sovereignties, each retaining the full power of taxation, including that of levying duty on imports, which was not given up by them until 1787, eleven years after the Declaration of Independence, when the Federal Constitution was adopted. If the protective theory, then dominant in Great Britain, had at that time had the hold upon the American people which it afterward obtained, it is certain that the power of protecting themselves would never have been given up by the states. And had the Union continued as at first formed, or had the framers of the Constitution lacked the foresight to prohibit state tariffs, there is no doubt that when we came to imitate the British system of protection we should have had as strong a demand in the various states for protection against other states as we have had for protection against foreign countries, and the arguments now used against free trade with foreign countries would to day be urged against free trade between the states.

YEARS OF VARIOUS EXPERIENCE
In the Use of CURE
No. 1. Alone own
for all Dis-
...
FREE BOOK OF HOME TREATMENT
...
HOPE FOR YOU
Don't brood over your condition, nor give up in despair. Thousands of the Worst Cases have yielded to our HOME TREATMENT, as set forth in our WONDERFUL BOOK, which we send sealed, post paid, FREE, for a limited time. GET IT TO-DAY. Remember, no medicine has the method, appliances and experience that we employ, and we claim the MONOPOLY of SUCCESS. ERIC MEDICAL CO., 84 NIAGARA ST., BUFFALO, N. Y.
2,000 References. Name this paper when you write.

Mexican Mustang Liniment

A Cure for the Ailments of Man and Beast.
A long-tested pain reliever.
Its use is almost universal by the Housewife, the Farmer, Stock Raiser, and by every one requiring an efficient Liniment.
No other application compares with it in efficacy.
This well-known remedy has stood the test of years, and generations.
No medicine chest is complete without a bottle of Mustang Liniment.
Occasions arise for its use almost every day.
Druggists and dealers have it.
For sale by H. M. Horton.

HAIR RECOVERY by AGO
In contemplating a solution a part was accidentally lost and a solution afterward it was discovered that the part was not lost. We at once put this wonderful discovery to use. We have the demand that we have it throughout the world under the name of Queen's Hair. IT IS PERFECTLY HARMLESS AND SO SIMPLE ANY CHILD CAN USE IT.
Lay the hair over and apply the mixture for a few minutes. The hair disappears as if by magic without the slightest pain applied or ever afterward. It is unlike any other preparation for the purpose. Thousands of LAIES have been cured with hair on their FACE, NECK and ARMS. GENTLEMEN who do not appreciate a beard or mustache find a priceless boon in Queen's Anti-Hairing. A Shaving, by rendering its future growth an impossibility. Queen's Anti-Hairing is sent in safe mailing boxes, postage paid (on observation). Send money or stamps by letter with full address writing to the publisher strictly confidential. This advertisement is honest and straight to word and contains. We invite you to deal with us and you will find everything as represented. Address **QUEEN CHEMICAL CO., 174 Race Street, CINCINNATI, O.** Send your letter at any Post Office to insure its safe delivery. We will pay \$1.00 for failure or slightest injury to any purchaser. Every bottle guaranteed. **SPECIAL**—To ladies who introduce and sell among their friends 25 Bottles of Queen's Anti-Hairing we will present with a SILK DRESS, 16 yards best silk. Extra Large Size of silk to select from sent with order. Good Salary or Commission to Agents.

MEN! WHY ARE YOU WEAK?
DR. SANDEN'S ELECTRIC BELT AND SUSPENSORY FOR WEAK MEN
A NEVER FAILING CURE FOR ALL WEAKNESS OF MEN.
CURE GUARANTEED OR MONEY REFUNDED.
PATENTED 1894.
WHO ARE DEBILITATED AND SUFFER FROM NERVOUS DEBILITY, SEMINAL LOSS, NERVOUSNESS, LOSSES, DRAINS, IMPOTENCY, LOST MANHOOD, RHEUMATISM, BACK, KIDNEY TROUBLES, NERVOUS SLEEPLESSNESS, POOR MEMORY & GENERAL ILL HEALTH.
The effects of abuses, excesses, worry and exposure. For in our marvelous invention, which requires but a trial to convince the most skeptical, or by excesses, or exposure, you may have unduly drained your system of electricity—and thus caused your weakness or lack of force. If you are drained, which are required for vigorous strength, you will remove the cause at once and in a natural way. This is our plan and treatment, and we send for our Illustrated Pamphlets, free; sent by mail, sealed.
Belt is no experiment, as we have restored thousands to robust health, failed, as can be shown by hundreds of cases throughout this State, who whom we have strong letters bearing testimony to their recovery after using our Electric Belt.
THE DR. SANDEN ELECTRIC BELT is a complete galvanic battery, made into a belt so as to be easily worn during work or at rest, and it gives soothing, which are instantly felt throughout all weak parts, and we warrant \$5.00. It has the greatest boon ever given weak men, and we warrant it to cure all of the above weaknesses, and to enlarge the system, and the worst cases in two or three months. Address **SANDEN ELECTRIC CO., 174 Race St., PORTLAND, ME.**
