DEAR SIR:—We are now starting on the new year. Computations for last year are completed. We find that our firm sold during 1895 the enormous amount of 167 car-loads of goods, equal to ten train loads—just think 167 cars—For this we thank our patrons, and promise the same generous treatment in the future. During 1896 we will sell closer than ever, and no honest competitors will be allowed to do more for you than ourselves. We are here for your business, we must have it, if honest count, weight, and treatment and low prices will do it. Call or write us

Did He Borrow This?

Hartman, of Montana, in the house the other day, incidentally reviewed the populist platform. He knew, he said, that it had thirteen different ways of restoring prosperity to the country, and he understood that it was about to add three additional planks. One was to encourage the propagation of honey bees by crossing them with lightning bugs, so that the bees could work at night; another was to cross centipedes with the genus hog, so that every hog would have a hundred hams, and the third was a project of grafting strawberries on milkweed, in order to raise strawberries and cream.—Boise Democrat

Edison Said to Have Been Successful.

Chicago, March 22.—The Times.

Herald's special says Edison has succeeded, with the aid of the Roentgen ray, in penetrating the human body with the naked eye, the successful experiment having been made last week. He looked into the lungs and heart, and examined the arteries, muscles and blood vessels of one of his assistants. With the powerful cathode light placed behind the subject he looked through a screen of prepared chemicals, and is said to have plainly seen the workings of the various organs of the body.
