To Survey Arid Lands.

Salem, Nov. 15.—The State Land Board today decided to employ Frank M. Jordan to survey arid lands in Harney County, upon application of the Wright's Point Improvement Company, of Burns, which desires to enter into a contract to reclaim the desert land, under the act of the Legislature of 1901, which is an act to provide for the acceptance by the State of Oregon of certain lands, and for the reclamation and disposal of the same.

The survey has been asked in order to prevent the appropriation of some of the land by other people, thereby interfering with the irrigation system of the company.

(The parties composing the above company are J. W. Biggs, N. A. Cornish, Dalton Biggs, H. M. Horton and A. W. Gowan. The land they wish to reclaim consists of about six sections of land lying north of Wright's Point. There is some very fine land in this section and several good reservoir sites by which means the company expects to get water on the land. Mr. Jordan does not know just when he will commence the work of survey, which will take nearly a month to complete.)

To Oil Fields, Thence to Burns.

In more than one way would development of an oil field in Malheur promote the interests of this region. It is stated on good authority that with the first tangible evidence of oil in the area usually known as Malheur, the O. R. & N. railway would commence construction of a track into the interior of the section, which might, if given this impetus, be easily carried on into the Harney and Burns country. Should a road branch off from the main line to tap the oil fields, it would have a Burns direction.

Should the O. R. & N. be led to start by the traffic sure to result from a considerable oil business it would be comparatively a light matter to induce the company to make further extensions for the accommodation of the heavy traffic that would be found upon tapping the country and that must surely develop when the means is given for reaching the outside world.—Baker City Republican.
