

BLUE MOUNTAIN CARE CENTER

Blue Mountain Care Center is a 40-bed, intermediate care facility. The care center is a nonprofit organization that is part of the Blue Mountain Hospital District.

We are Medicaid certified only (not Medicare) providing long-term care, day care and respite care, and accept private pay and long-term care insurance.

Our mission is to make each resident feel like part of our family. It is the goal of BMCC to keep each resident functioning at their highest level of independence while maintaining a high degree of dignity and respect centered on their personal wishes.

Each resident must have a local physician who will make rounds at the care center every 30 days for the first 90 days, then every 60 days thereafter. Appointments can be made at the physicians' office more often if necessary; nurses are in close contact with the doctors as well.

Blue Mountain Care Center employs licensed nursing staff 24 hours per day and certified nursing assistants to provide the day-to-day care for our residents. Blue Mountain Care Center has always met or exceeded the state's mandated staffing ratio.

We have an excellent dietary staff that serves delicious home-cooked meals under the supervision of a Registered Dietician. They offer special diets to meet every resident's needs.

The last Thursday of each month, the residents create their own menu for the lunch meal. Family and friends are encouraged to attend. Blue Mountain Care Center also has a full-time social service department that meets the psychosocial needs of each resident individually. The activities department provides a large range of activities such as gardening, picnics, fishing trips, weekly drives, and outings to events, and regular lunches at the Senior Centers. Activities are centered on the preference of the resident, trying to keep them involved in activities just as they were prior to placement.

The facility also offers Restorative Therapy under the supervision of a licensed Physical Therapist. This service is provided to help get your loved one back on their feet and back to their home as soon as possible. The care center provides wheelchair accessible transportation for residents to and from local medical appointments, as well as all the out-of-facility activities. We provide basic haircare to residents as part of their all-inclusive rate through the activities department. A licensed beautician comes in monthly and as requested. Haircuts and manicures are included in the basic daily rate for the care center's Medicaid residents. We have housekeeping services provided five days a week and laundry services six days a week, both are also included in the all-inclusive rate. Visitors are welcome at the care center anytime and we are happy to give tours. Private heating/air conditioning units are in individual rooms. The rooms can be personalized with the clients own belongings to make it feel more like home.

Placing a family member in a care facility is a difficult decision; let us help you make this transition as easy as possible. We provide a warm, caring, homelike atmosphere and encourage family members to continually be a part of this.

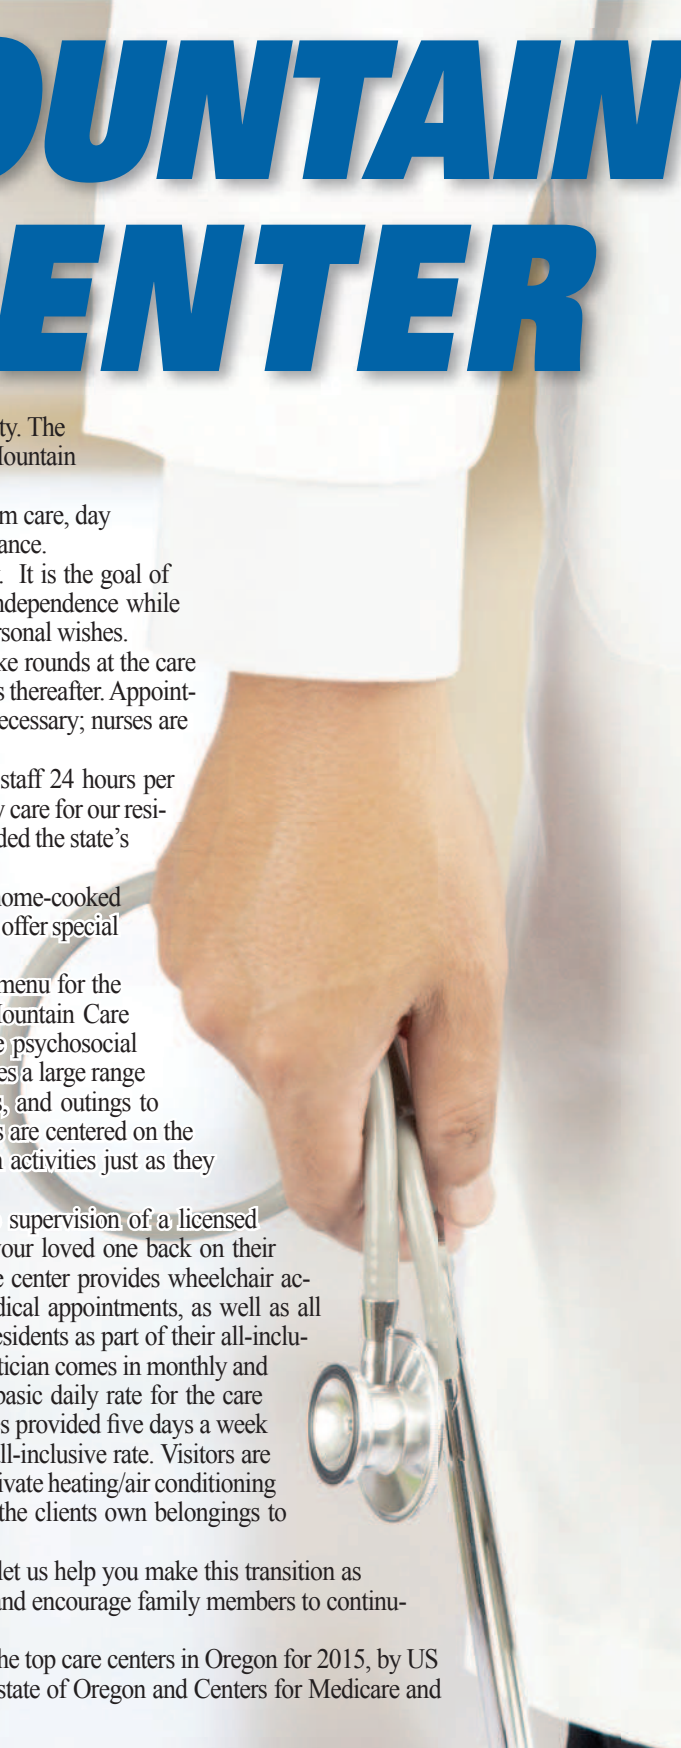

Blue Mountain Care Center was recognized nationally as one of the top care centers in Oregon for 2015, by US News and World Report. The care center was also surveyed by the state of Oregon and Centers for Medicare and Medicaid Services and found to be deficiency free for 2015.
