

Future Community Hall

pinnacle
architecture, inc.

The Dayville Community Hall was built in 1920. Throughout the past 100 years, this grand building has served as a school gymnasium, dance hall, roller skating rink, movie theater, box factory during World War II, meeting hall and home for the South Fork Theater Group. It has provided a meeting area for traveling shows, weddings, receptions, parties, memorial services, school functions and community gatherings.

The Dayville community has received the necessary funds to renovate the Community Hall through State and Federal funding agencies, local businesses, and generous donations. This restoration and renovation project is currently under way with a completion date of Spring 2022. These renovations will include restoring the main hall, with construction of a new commercial grade kitchen and restrooms.

The Community Hall has served the Dayville area well throughout the past 100+ years. Many fond memories have been made within those walls, and the community bonds have been strengthened by those memories. It is the vision and mission of the Dayville Community Hall Renovation Committee to keep the spirit of our cherished hall alive and thriving.
