his original plan, either because he has made some miscalculation or a clothing store. new conditions have arisen; yet he will still adhere as closely as he can to the original plan to the original plan.

So it is necessary for farmers to have a plan of what they wish to accomplish, not only during the season before them, but through life. In no other way can farming be carried on most successfully but by having a definite policy which is to run through the years. It is not, Have you an overcoat for \$4?" however; the general policy that we wish to insist upon now, but to urge farmers to have before them, at the beginning of the season's work of vhay. I haf some overcoats for \$6, crop growing, what they wish, and und if I can't sell you one for \$8, expect to accomplish, just as the den maybe I come down to \$4. Come in und we shplits der differmechanic has before him what and how much he has to do in the ten ence und calls it seven!"

hours before him. The farmer The discovery of the magnifying should know at the beginning of the power of the simple lens was no season, just what crops he will plant, doubt made long before the Chriswhere he will plant them, and make tian era, as rude lenses of crystal Whisky Brandies and Wines his calculation as to what he may have been found in Egyptian ruins, ly he can have the season's plan in and it is known that the Greeks mind, having all calculations made, used magnifiers of glass, which they as to when each part of the work is to be done, how much material, labor, etc., will be needed, the better scope, however, is claimed for various persons. It is generally beable will he be to carry on his farmlieved that the first one was made ing operations successfully.
