COAST NOTES.

CURRENT NEWS OF IMPORTANCE
BRIEFLY RECORDED.

A Train Wrecked by Robbers—A Civil Engineer Drowned Near Astoria—Two Medals Awarded for Bravery—The MongOOSE NOT WANTED IN CALIFORNIA—A Veteran Accidentally Wounded.

The recent heavy frost did great damage to a number of vineyards in Sonoma county.

Mayor Grant of New York city and a party of friends are visiting in Southern California.

An organization whose object is to rid the country of horse thieves has been formed at Albuquerque.

The depositors of the defunct California National Bank of San Diego will receive about 60 cents on a dollar.

The female department of the Stockton insane asylum is now lighted by natural gas. The wells are on the state's grounds.

Charles B. Wilcox, who killed John Connelley, ex-convict, at San Jose, has been convicted of murder in the second degree.

Several county World's fair associations of California are kicking strenuously against the preliminary exhibition at San Francisco.

C. P. Huntington gave the park commissioners of San Francisco \$25,000 to be used in constructing an artificial waterfall in Golden Gate park.

E. T. Thomas, United States signal observer at Port Angeles, committed suicide by shooting. Domestic trouble and liquor unbalanced his mind.

A Chinaman who was in jail at North Yakima, Wash., for indecent conduct toward little girls was taken out and unmercifully whipped by vigilantes. He was told to leave town and never return.

A resolution was passed by the executive committee of the California state board of agriculture deprecating the introduction of the mongoose into California, as the committee believe it more dangerous than ground squirrels or gophers.

Subterranean fires are burning in the mountains of Ventura county, Cal. The atmosphere is charged with the odor of burning sulphur and asphaltum and the ground is hot to the touch. No estimate of the extent of this underground furnace can be made.

Colonel J. E. Remington, aged 70, a veteran of the civil war was accidentally shot by his grandson at the Dalles. The boy was trying to get a shot at a squirrel when his pistol was accidentally discharged. The ball passed through the side of the house and struck the colonel in the thigh.

Walter de Clark, a railroad man, went to Tracy from Sacramento to kill, it is believed, Miss Tillie Ludwig, who had refused to marry him, but his brother discovered the plot and shot him. A letter on his body was evidence that he contemplated murder.

Fred Atkins, a civil engineer in charge of the Astoria end of the Astoria and Portland railroad, was drowned in Yonkers river. In company with John Caruthers he was crossing the river in a skiff, which a squall struck and flung. Atkins tried to swim but sank within fifty yards of the shore. Caruthers clung to the boat and was picked up by the steamer Frankfort. Atkins was 30 years old and a native of England.

It was supposed that Benjamin Vaughn, who died several months ago near Turner, Or., left considerable money, but it could not be found. A few days ago his little grandchild said she once saw him bury some big tin cans full of something heavy. She could remember only where was buried. It was in an old shed under a big rock. A search was made, and one can which contained \$500 in gold was unearthed. A further search will be made for the hidden wealth.

The secretary of the treasury has forwarded gold medals to John Regnier of San Francisco and John Bergman of Gardiner, Or., together with a silver medal to Robert Breen of Gardiner as official recognition of heroism displayed by them in life-saving exploits. Regnier saved several lives at the wreck of the steamer Mendocino in Humboldt bay, December 22, 1888. John Bergman saved twenty lives at the wreck of the steamer Tacoma at the mouth of the Unquiqua river several years ago, being assisted in his noble work by Robert Breen. The letters accompanying the medals speak in the highest terms of the bravery of these men.

Cholera is raging in India. A plot to murder the infant king of Spain was frustrated. The conspirators have been arrested.

France has determined to carry on extensive operations in Dahomey and subdue King Behanzin.

Gladstone has written a letter opposing woman suffrage. The movement is feeling the effect of the letter heavily.

The dean of Gloucester has discovered in Gloucester cathedral the remains of a king of Northumbria, who was buried in the year 729, beneath a beautiful shrine erected in his memory.

The engagement of Prince George, only son of the Prince of Wales, and Princess Mary of Teck is announced. Princess Mary was betrothed to the late Duke of Clarence, Prince George's elder brother.

The Canadian house of commons, in committee of the whole, has passed a bill giving the governor general in council the power of renewing from year to year the modus vivendi respecting the shifting vessels of the United States.

High society circles in St. Petersburg were greatly excited by the revelation of a horrible deed committed by the minister of the private chapel in the imperial palace. In a delirious frenzy he murdered his wife, chopped her body into fragments and burned them in a stove. He then threw his three children into a river.

The Drayton scandal has resulted in a duel. Borrowe and Fox met at Ostend and fired two shots at each other. Neither was hurt. Fox's coat was pierced near the hip by a bullet. The men then raised their hats to each other and left the field. Both sides notified the police of the duel before it took place, but, contrary to expectation, they were not interfered with, and they had to make a bluff at fighting to prevent their being branded as cowards.

The restaurant of M. V. Paris, at Paris, who delivered Ravachol, the anarchist, to the police, was blown up with dynamite. One of Vary's legs was broken and had to be amputated. He died shortly after the operation. The granddaughter of Vary and two ladies were also injured. Vary's wife was not injured, but she has lost her reason from the shock. Three persons have been arrested. It is believed the object of those who caused the explosion is to terrorize the juryman who will sit during Ravachol's trial. An anarchist proclamation has been published urging the people to inaugurate a social revolution on May 1. Rome is also frightened by the anarchist demonstrations.

BRIEF MENTION.

THE LATEST NEWS FROM ALL OVER THE COUNTRY.

A Summary of the Week's Important Happenings Carefully Selected, Condensed and Arranged for the Convenience of Those Who Have No Time to Spare.

Citizens of Stevens county, Wash., want the Colville reservation opened up to settlement.

A larger area in Oklahoma was opened up to settlement with the usual rush and scramble.

The steamer Connaught has left Philadelphia with a cargo of grain for the famine sufferers in Russia.

A sale of the labor of negro vagabonds occurred at Fayette, Mo. Prices ranged all the way from \$4 to \$5 for thirty days' work.

Port Townsend sent the fleet of war vessels north on Puget sound and those going north ordered to stop there and participate in the centennial celebration of the discovery of Puget sound by Captain George Vancouver, May 7.

The bureau of American republics at Washington is informed that in several places in Central America flour is now being made from bananas, which under a chemical analysis, is found to contain more nutriment than rice, beans or corn.

John G. Heckscher of New York was married in Philadelphia recently to Mary M. Travers, formerly the wife of Henry Winthrop Gray of New York.

On her account nearly ninety days ago.

The Palm Valley Water company has ordered Indian Agent Rust to reopen the ditch which he closed recently. His failure to do so will be attended with prosecution for willful and malicious trespass.

The Chinese of Portland are greatly excited over the recent death of one of their countrymen known as "Tom," who died in jail, shortly after a hard and protracted struggle in resisting arrest.

A number of Russian immigrants at Chicago were ejected after being housed and fed four weeks, because they refused to work. The refugees returned and attempted to tear down the doors of the house where they had lived in case, but the police eventually drove them away. They threaten further trouble.

The Bethlehem (Pa.) iron works are to be more strictly guarded and restrictions regarding visits will be rigid. After the discovery that spies are on the way to Bethlehem to obtain some of the guarded secrets relative to the composition of steel and its manufacture into gun forgings and armor plates.

The Reading combination has control of the greater part of the anthracite coal output of that country. The combination owns all the mines and is able to do what it likes with them. That is what the latest move indicates. Nearly 60,000 men have placed on half time. This restriction of production is a forerunner of an advance in price.

R. G. Gupit, a prominent glass manufacturer of Anderson, Ind., claims to have discovered the lost art of casting glass tubes, which is known to have been practiced by the Egyptians. He has interested capitalists and made his first cast with success. The glass tubes are suitable for sewers. Gas and water mains, joined by glass cement, are also the invention of Gupit.

Mendocino county is bidding for the Masonic widows and orphan's home which is to be constructed by the sons of California somewhere in the interior. A subscription has been started and \$4,000 subscribed. It is intended to increase this to \$20,000 and offer it to the trustees of the institution provided the home is located in that county. The county claims not only to have superior advantages for location but will make other inducements.

The itinerary has been prepared for the extended tour of George W. Childs and party to the Pacific Coast. The party will leave Philadelphia May 2, reach Chicago May 4, tarry there two days, then leave for Denver via Burlington. At Colorado Springs on May 12, the location of the Childs-Drexel home for indigent printers will take place. The Pacific Coast will be reached June 19 and Philadelphia will be reached July 19. The trip will cover 9,880 miles.

The regulators who started out to wipe out the rustlers in Wyoming were arrested and taken to Cheyenne by United States troops. All are charged with murder. The Texans who were hired by the wealthy ranchers to kill rustlers are in custody. The question of admitting the regulators to bail is bothering the leaders of the expedition. While the cattlemen would have no difficulty in securing bail, no one desires to go on the bonds of the desperadoes. The troops delivered the prisoners to the civil authorities at Cheyenne.

By the arrest of a Mormon at Trenton, Utah, a peculiar case of polygamy is brought to light. Several years ago Myron Butler married twin sisters on the same day. The young daughters of Israel are as near alike as two peas, and confused in the minds of the officers. It was impossible for the officers to tell which is the legal and which the plural wife. Mormon polygamy is a peculiar affair. Notwithstanding both of Butler's wives were married to him on the same day, in the same house and by the same officiating priest, one of them is made by law an illegitimate wife, or rather no wife at all. The woman who was first tied to the altar is recognized as the so-called "first" wife by the Mormons. She is recognized by law as the legal wife no matter if the same authority marries the second wife to the husband. In a case where a man has two wives marry a man, in a case where a church is that the older one must be the "first" wife.

The richest mineral ever found in Montana is reported from Bonanza in the Little Rock district. The vein is eight inches thick and assays from \$2,000 to \$20,000 per ton. The ore is fairly streaked with ruby silver. Reports of rich discoveries of gold continue to come from the Little Rockies southeast of Chinook. A ton of surface or float ore from the mines yielded over \$600 in bullion. A stream of water coming from one mine is said to cure the taste for liquor and is named Bichloride of Gold spring.

The coal poachers who are prepared to go to the firing line will endeavor to evade the modus vivendi by sailing their vessels under some flag other than the English or American. What the sealers want is to get other nations interested, as if England would not protect sealers perhaps other nations would do so, if the sealers were flying their flags. If the government does not change the modus before next spring it is almost an assured fact that sixty British sealers sailing from Victoria will sail under the flag and look to foreign governments for protection.

The first of the old boys, for the possession of which it was brought to Portland by Mrs. Haggins against Mrs. Wilcox, both of whom claimed to be its mother, is dead. The case was decided in favor of Mrs. Haggins and the baby was sent to the Babes' home pending a rehearing of the case. It had taken cold during the trial and as both mothers insisted upon visiting and fondling it kept getting worse. An order was issued allowing each mother to take only one week at a time of the little one's life. Now each mother nurses the other of being the cause of her darling's death.

The railroad magnates of New York, Chicago and San Francisco, who have the reputation of being the sharpest people on earth, have been taken in by a clean cut little Englishman. It came about like this: C. H. Cook landed in this New York a few months ago and said he was assistant superintendent and civil engineer of the London and Northwestern railway. He was given passes over the railroads and the magnates placed their private cars at his disposal. He travelled about and enjoyed the bounteous hospitality of the railroad men for some time before it was discovered he was an impostor.

A Washington special says: The extreme silver men, leading in the silver cause are in dead earnest. They may be Democrats or may be Republicans, but they are for silver first and foremost and if necessary, to the exclusion and sacrifice of all other party affiliations. In fact it is stated by one fully conversant with the ideas of the silver people in England that the threat to bolt meant what it expressed—that if the Republicans at Minneapolis nominated a ticket on a platform inimical or equivocal toward silver, and if the Democrats at Chicago nominated a similar ticket, the silver men West and South, either with or without the cooperation of the Farmers' Alliance, would bolt both tickets and run a ticket of their own on this direct and sole issue.

The United States coast survey steamer Endeavor sailed from Washington the other day. She has been rebuilt from the deck up. The Endeavor was the offering of the ladies of Norfolk to the Confederate government. The ladies gave their jewels to build the vessel and a shipbuilder named Graves began the work in the town of Berkeley. The ladies decided that the vessel should be named the Lady Davis in compliment to the wife of the president of the confederacy. When the Federal army took possession of Norfolk May 10, 1862, the Lady Davis was on the stocks. She was completed, launched, named the General Jessup and used as an army transport.

The national silver committee has issued the following call: The national silver committee appointed by the first national silver convention at St. Louis in November, 1889, believing an exigency has arisen which calls for earnest deliberation and united action on the part of the friends of bimetallicism throughout the United States, hereby calls a convention of the friends of bimetallicism to be held at St. Louis, Mo., on May 26 and 27, 1892, one of the objects being to organize a national bimetallic association or league for the better promotion of the cause of free bimetallic coinage in the United States. This action is impelled by the manifest determination of the gold combination to suppress the silver issue for another decade, if possible, by transmitting the existing debt into gold obligations and otherwise forcing forever a single gold standard upon the people of the United States, and thus perpetuate the subtle system of robbery carried on for the past twenty years by means of the money standard constantly increasing in value.

Mrs. Jessie Benton Fremont, the widow of General Fremont, has written an article for a magazine which is causing much comment. She calls it "A Home Found and Lost," and directly charges ex-Congressman John Coburn of Indiana with being responsible for her failure to get back her home in San Francisco from the government. According to her story she went to San Francisco with the general eight years after their marriage and picked out an ideal spot for a home, thirteen acres at the extreme end of Black point. The general brought the property for \$42,000 and had the deeds made out in his wife's name. The family left the place at the opening of the war; the government destroyed their home and threw up earthworks on the property. Secretary of War Stanton assured the general that the occupation was only temporary and would be satisfactorily settled. After the war General and Mrs. Fremont tried to get their property back and the settlement of the department has the homestead for a pleasure ground. There were fifty-four people dispossessed at the time and fifty of them got back their land after a long fight by an act of congress but Mrs. Fremont is still kept out of her holdings.

CRIMES AND CASUALTIES.

Two dozen sharpened knives have been taken from the inmates of the Huntington (Pa.) reformatory.

During a performance at Pittsburgh Frank Seaver shot and killed Frank Ferguson in an endeavor to shoot an apple from the latter's head.

Charles Tyler, colored, aged 17, is under arrest at Boston. Eight crimes, consisting of train wrecking, robbery, burglary, etc., are charged against him.

Henry Martin Scudder, who is charged with murdering Mrs. Dunton at Chicago, it is now asserted forged a will disposing of the property of his victim.

While some boys were playing in a sand pit at Toronto a slide occurred, smothering three of the boys, named Alfred Louie, 11 years old, Ernest Lucas and Henry Pettit, aged 12 years.

An attempt was made to blow up the pipe line of the Hector Mining company at Sutter Creek, Cal. The elevator south of the mill was also blown up. The damage will amount to \$7,500. There is no clew to the perpetrators.

Thomas Earl, a young man in charge of a tea store at Stockton, made a mistake in swallowing a dose of strychnine for quinine. The effects of the poison nearly proved fatal, but his life was finally saved.

At Jonesboro, Tenn., a wall in course of construction as a part of a vault for the county records fell, burying six men in the debris. Three of them were killed, and the other three are so badly injured that they are not expected to live.

John Crawford and Pat Aldrich of Ozark county, Mo., quarreled over family matters. Crawford shooting Aldrich dead, he being himself slightly wounded. He retreated, followed by the son of the dead man. Young Aldrich attempted to enter Crawford's house, but was put out. He fired a shot, striking Crawford in the eye, killing him instantly. Young Aldrich is slightly wounded.

Rev. E. Walpole Warren, the imported English rector of the church of Holy Trinity, says "I have retired from taking out papers as a citizen of New York, because the city is so wicked and corrupt that I would not wish to be identified with it, even as a voter, until it has rid itself of the present administration. It is vile from top to bottom. I will remain an alien. The entire municipal machine, I believe, from Mayor Grant down is absolutely corrupt."

Late Frosts in California.

Frosts, the past week, did considerable damage to the more tender vegetables and fruits in the central and northern counties. Many gardens devoted to the cultivation of tomatoes will have to be reset, and similar reports are coming to hand regarding potatoes. It has been several years since frosts have done such extended damage to garden truck and fruit here.

The damage to tree fruit is reported quite heavy in many localities as far down as Fresno county. While considerable damage has been done, yet there is a general opinion that the unripened fruit on each tree will grow to larger size and be of much better flavor than it otherwise would. The vineyards, more particularly in the lowlands in Sonoma, Napa, Alameda, Contra Costa, Yolo, and in counties farther north, are reported to have suffered quite heavily. It is stated by conservative persons that the grape crop in these low counties will be from 20 to 50 per cent less than it would have been with a frostless season.—Pacfic Rural Press.

A Washington special says: The extreme silver men, leading in the silver cause are in dead earnest. They may be Democrats or may be Republicans, but they are for silver first and foremost and if necessary, to the exclusion and sacrifice of all other party affiliations. In fact it is stated by one fully conversant with the ideas of the silver people in England that the threat to bolt meant what it expressed—that if the Republicans at Minneapolis nominated a ticket on a platform inimical or equivocal toward silver, and if the Democrats at Chicago nominated a similar ticket, the silver men West and South, either with or without the cooperation of the Farmers' Alliance, would bolt both tickets and run a ticket of their own on this direct and sole issue.

The United States coast survey steamer Endeavor sailed from Washington the other day. She has been rebuilt from the deck up. The Endeavor was the offering of the ladies of Norfolk to the Confederate government. The ladies gave their jewels to build the vessel and a shipbuilder named Graves began the work in the town of Berkeley. The ladies decided that the vessel should be named the Lady Davis in compliment to the wife of the president of the confederacy. When the Federal army took possession of Norfolk May 10, 1862, the Lady Davis was on the stocks. She was completed, launched, named the General Jessup and used as an army transport.

The national silver committee has issued the following call: The national silver committee appointed by the first national silver convention at St. Louis in November, 1889, believing an exigency has arisen which calls for earnest deliberation and united action on the part of the friends of bimetallicism throughout the United States, hereby calls a convention of the friends of bimetallicism to be held at St. Louis, Mo., on May 26 and 27, 1892, one of the objects being to organize a national bimetallic association or league for the better promotion of the cause of free bimetallic coinage in the United States. This action is impelled by the manifest determination of the gold combination to suppress the silver issue for another decade, if possible, by transmitting the existing debt into gold obligations and otherwise forcing forever a single gold standard upon the people of the United States, and thus perpetuate the subtle system of robbery carried on for the past twenty years by means of the money standard constantly increasing in value.

Mrs. Jessie Benton Fremont, the widow of General Fremont, has written an article for a magazine which is causing much comment. Made Happy

BY the cure of long-standing Rheumatism and Piles, H. P. Greene, of Johnston, Ohio, writes in reference to Ayer's Sarsaparilla: "For over fifteen years I suffered untold misery from rheumatism. Physicians' prescriptions, as well as the various specifics, proving of no avail, I at length concluded to give Ayer's Sarsaparilla a persistent trial. I have used it all the way from the first of January to the present time. The expense of my medicine was nothing compared with what I had put out for doctoring that did me no good whatever. I am happy to state that

the cure of long-standing Rheumatism and Piles, H. P. Greene, of Johnston, Ohio, writes in reference to Ayer's Sarsaparilla: "For over fifteen years I suffered untold misery from rheumatism. Physicians' prescriptions, as well as the various specifics, proving of no avail, I at length concluded to give Ayer's Sarsaparilla a persistent trial. I have used it all the way from the first of January to the present time. The expense of my medicine was nothing compared with what I had put out for doctoring that did me no good whatever. I am happy to state that
