G. Shindler, who has had charge of the Pacific Pine Needle Company's business in Grants Pass for the past year, left for San Francisco last Tuesday. Mr. Shindler liked Grants Pass very much and while here made some very warm friends whom he hated to leave. He has implicit confidence in the pine needle business, its ultimate success when properly managed, but he was so hampered by difficulties over which he had no control that he could accomplish nothing. The proper machinery could not be obtained and the funds with which to carry on the work were not forthcoming and after waiting patiently for a long time in hopes that something might be done by the company, he finally concluded to give it up and go home.

Mr. Shindler experimented to his entire satisfaction while here, which lead him to believe that in time the pine needle business will be a great industry for this place on account of the abundance of needles, but it will take money and enterprise. The company has not given up the intention of pushing the work to completion, so we are informed.

Melon Shipments. Messrs. Christie & Reynolds are now shipping melons to Portland by the railroad. Last Tuesday evening Mr. Reynolds went to Portland to see if he can make arrangements with the S. P. Company for cheaper rates. Instead of making concessions to melon shippers from Grants Pass in the way of freight reductions, the S. P. Company seem to be coming down on the producer more and more each year. It seems to us that it is to the interest of the railroad company to encourage the growth of melons in Josephine county as an industry. Of course it is not much for a great company but it is more humane to give the people who wish to engage in the business a chance, rather than choke them out entirely. Fifteen hundred dollars in freight to the company each year is by far better than nothing. T. P. Lee is also shipping by the car-load this year, and all these parties have fine melons as we are able by experience to testify. We trust that Mr. Reynolds may succeed in prevailing upon the S. P. Company to see the situation and to lend a hand for promotion of this industry.
