

AN ODD HONEYMOON.

A Texas Congressman's Bride

Wife's Peculiarities in the Office of a Bank Executive.

There are a few towns in the present country whose early histories are linked with what may be called "odd" marriages.

The visitor's inference was correct from where he stands, for he is one of the present generation. But 25 years ago no one suspected of being college-bred simply because he could recite Latin.

When he married 12 years ago, he could read and write. Beyond that he retained nothing. He knew little of the history of his country.

After the young South Carolinian had cast about for a means of livelihood, some of the neighbors suggested that he "take up school."

But occasionally an "overly smart boy" as he said, "would want to know something I had thought of, and I would be flustered. But I know it would never do to show my ignorance, and that is where I learned my first lesson in whatever diplomacy I may have.

"Preparing lessons in Texas in those days had its dangers. The Indians did their mischief most generally in the night, and in consequence most whites were afraid to have lighted candles.

He studied law and was admitted to the bar. He was successful. The civil war interrupted him in his work. He enlisted as a private in the confederate army.

As Assistant United States Attorney Southern Texas, of New York, was graduated from the Columbia law school in 1875, when he carried off the first prize of \$500.

PHOENIX'S SUMMER BEDROOM.

An Arizona Contribution to Increase the Possibility of Getting a Little Sleep.

The out-of-door life has been the favorite of Phoenix since the city was founded. The Phoenix summer bedroom will save a necessity, says the Arizona.

Phoenix sleeps out of doors in the summer, and the bedroom is built of this necessity. It is on a hill, it is built of this necessity.

The bed is a set of canvas or woven wire, covered perhaps with a sheet, but even a sheet feels like a feather bed on a Phoenix summer night.

Phoenix is proud of its climate during eight months of the year, but it is not so proud in winter. It is a right warm day when the government weather bureau doesn't know what the sun temperature is, and is unable to determine it.

But occasionally an "overly smart boy" as he said, "would want to know something I had thought of, and I would be flustered. But I know it would never do to show my ignorance, and that is where I learned my first lesson in whatever diplomacy I may have.
