ROYAL BAKING--POWDER Pure

No inferior or impure ingredients are used in Royal for the purpose of cheapening its cost; only the most highly refined and healthful.

Royal Baking Powder imparts that peculiar sweetness, flavor and delicacy noticed in the finest cake, biscuit, rolls, etc., which expert pastry cooks declare is unobtainable by the use of any other leavening agent.

Alum is used in making cheap baking powders. If you want to know the effect of alum upon the tender linings of the atomach, touch a piece to your tongue. You can raise biscuit with alum baking powder, but at what a cost to health!
