Entered at the post office at Grants Pass. Oregon, as second-class mail matter.

THURSDAY, JANUARY 3, 1901.

A treaty is now before congress by which the Klamath Indians are to cede a disputed portion of their reservation to the United States. The excluded tract lies on the west side of the reser vation and includes a portion of the Cascade range. Large areas of this land are sterile and wortheless, but other tracts are extremely fertil and there is a considerable quantity of fine timber, which under present conditions is inacessible to the markets, but will me valgable when the railroads penetrate this country.

strate the fact they still inhabit the turf, by capturing a few companies of B. itish infantry or some such exploit. Lately their successes have been very frequent but they are able to operate only on so amail a scale that the headway is scarce—the creamery business. ly discernible against the vast army of British that are in South Africa. Probably if England could have foreseen th ulties and disasters of this war and more fully realized the desperate stubbornness of the people with whom she is dealing, she would not have gone to war with such cheerful alacrity. Now, however, she knows no other way out of the scrape, except to go through with

America is not deficient in Boxers as

is newly evinced by an outrage recently perpetrated on Chinamen by white men and Mexicans near Riverside, Cal., A hauled in farm wagons to a lonely place on the river bottom and were here treated most brutally and beaten into insensibility. The excuse was that eeveral Mexican girls had been discharged from working in a cannery and that the Chinese had been hired in their places. The real reason however, which the excuse gave opportunity of putting into practise, was that the perpetrators were savage and brutal in their nature and only waiting to vent their maliciousness The Chinamen seldom dares to resent abuse and public opinion is indifferent to the treatmen he receives, as he is felt to be an interlopes and not wanted here. The offenders in an occasion like the one mentioned should be made to feel the strong arm of the law as suddenly, decisively and severely as the circumstances will admit. The heathen Boxer has the excuses of ignorance, superstition and fanaticism on his side; palliating circumstances, denied to the enlightened

Again the hour of the derided New Years resolution. There is however, a more worthy thing recorded than the nary to good accomplished. There is no better time, either, for the inauguration of good resolves than the beginning of this new year and century. Thousands of people throughout the world will resolve that the coming year shall be the best year of their lives and whether they succeed or not their effort in tha direction, however slight, can not fail of being productive of good to themselves and to others. The next best thing to success is honest failure. The effort is the important thing after all. Those who rise do so by constant effort. Any laxity results in a retrograde movement and it requires no effort to pursue a downward course. Effort in the right direction is not to be despused or derided, however inconsiderable it may be. It counts in the aggregate and its influence can not be lost. Nothing that is elevating or ennobling is to be treated with contempt and nothing is more better things. The element in the matter most worthy of derision is the ease with which good resolutions are so often abandoned and discarded and the discouragement which so often attends slight failures. It should be more generally comprehended that ultimate success is generally achieved only after many failures. If every person should, make an honest resolution to do in every 3, are thoroughly modern, electric lightgood result would be so sudden, empha- They will accommodate 36 persons at

Death of John Angel.

The following account of the death of who passed it.

A sensational arrest has grown out o the last "hold up" of a stage couch near Lakeview, Dec 21. The Lakeview "Examiner" says:

It was known that \$100 in currency gold and silver had been abstracted from the letters in the Paisley mail, and that at least one of the bills-a ten dolfor note-was marked and a description the bill carefully noted by the sender. Business men were notified to keep a look-out for this particular bill, and each was given the number of it:

PISO'S CURE FOR

MORE DELAY.

Contractors Unable to Finish Torpedo Hoats and Destroyers in

There is more delay in the completion of the large number of torpedo boats and torpedo boat destroyers which the government is building under contracts at various yards in various parts of the country. A year ago the navy department consented to extend the time of the contractors en-gaged on this work for 12 months. It was expected that there would be no Geo. W. Dorwin, formerly superintend-ent of the Jewett mine, and now assayer, within that period. The delay was occasioned, the contractors say, by the scarcity of steel.

The particular quality of material required was such as to demand spe-cial processes, and the steelmakers rethey were loaded up with other orders requiring less care and producing Island. Skeletons, argillite, implegreater returns. The representations were sustained by the department in Thursday evening from a business trip an inquiry conducted on its own ac-to San Francisco and went out to the count, and the contracts accordingly were extended with the expectation that there would be no more difficulty and that the boats would be completed by this time.

them are but three-quarters ready for trial, and a great deal of work regovernment.
