Women and Jewels.
Jewels, candy, flowers, men—That is the order of a woman's preference. Jewels form a magnet of mighty power to the average woman. Even that greatest of all jewels, health, is often raised in the strenuous efforts to make or save the money to purchase them. If a woman will risk her health to get a coveted gem, then let her fortify herself against the insidious consequences of coughs, colds, and bronchial affections by the regular use of Dr. Boecher's German Syrup. It will promptly arrest consumption in its early stages and heal the affected lungs and bronchial tubes and drive the dread disease from the system. It is not a cure-all, but it is a certain cure for coughs, colds and all bronchial troubles. You can get Dr. G. G. Green's reliable remedies at Dr. Kramer's.
Get Green's Special Almanac.

To Cure a Cold in a Day

A Great Clubbing Offer Rogue River Courier AND FARM AND HOME

THE BEST AND MOST PRACTICAL FARM AND FAMILY PAPER PUBLISHED
TOGETHER WITH
A BEAUTIFUL ART CALENDAR
FOR 1902
For Only \$1.50

Believing that every one of our readers should have at least one good farm and family journal, we have perfected arrangements whereby we can send that practical and instructive journal, Farm and Home, in connection with the "Rogue River Courier," including a beautiful and useful Art Calendar for 1902 as detailed below, all for only \$1.50. We are unable to give but a brief description of the contents of Farm and Home, which is unequalled for variety and excellence. Prominent among its many departments may be mentioned the—
Farm and Garden Market Reports
Fruit Culture Mechanical Devices
Fashionable and Fancy Work
Feeding and Breeding The Aply
Talks with Our Lawyer News of the Day
Daily and Creamery Household Features
The Poultry Yard The Question Box
Plants and Flowers The Veterinary
The Horse Sheep and Swine

FARM AND HOME is published semi-monthly, the 24 numbers which comprise a year's subscription making a volume of over 600 pages, teeming with all the latest and most reliable information that experience and science can supply. No better proof of its popularity can be offered than its enormous circulation, which extends into every state, each number being read by no less than a million readers.
THE ART CALENDAR
Combines a portfolio reproducing in color one of the greatest of modern paintings in single tone, each \$2.15, suitable for framing.
It also includes Weather Forecasts for every day in the year, space for Daily Memoranda, Monthly Journal, and a list of all the latest and most reliable information that experience and science can supply. No better proof of its popularity can be offered than its enormous circulation, which extends into every state, each number being read by no less than a million readers.

Do not delay or fail to take advantage of this great offer, for never before was so much offered for so little. Remember we send both papers a full year, including the Calendar as above described, all postage, at the very low price of \$1.50.

Washington Letter.

WASHINGTON, Jan. 29, 1902.
The approaching visit of Prince Henry of Prussia is the absorbing topic of conversation in Washington this week, not only in social but in executive and diplomatic circles as well. While the proposed visit is of a social character its diplomatic significance is of sufficient importance to raise it above the ordinary social affairs and the president and the members of the cabinet are as much interested in the details as their wives and daughters. This is the first time that a president of the United States has been called upon to entertain royalty of official capacity and Mr. Roosevelt is most anxious that the event pass off with eclat.

Mr. William A. Downy, a member of the firm that is building the royal yacht, has been in Washington in conference with the president, Secretary Hay and the German ambassador and the date for the launching has been set for February 25th, although it is possible that it may be changed to later in the week as it is desired that the prince should be present at the capitol on the 27th, when Secretary Hay will deliver his eulogy on President McKinley. The details of the reception have been confided to a committee composed of Assistant Secretary of State Hill, Major General Henry C. Corbin, Rear Admiral Robert D. Evans, and Count von Quadt, first secretary of the German embassy. The president will of course, be present at the launching of the yacht but it has not been definitely determined whether Mr. Roosevelt and his party will accompany the prince to Shooters' Island or whether they will travel separately. There will be a state banquet at the White House in the prince's honor and he will probably travel farther west before leaving for home. He will sail for home on March 8th.

Undoubtedly there are some important matters of etiquette to be determined by a diplomatic friend said yesterday. "If your president would make the most pleasant impression on the prince he should try and forget all about etiquette, the remembrance of which is apt to make these affairs too formal, and merely treat him as entirely his equal in dignity and position and as a very good friend. If Mr. Roosevelt had a good friend coming to Washington from abroad he would go down to the depot and meet him and tell him he was welcome and drive with him to his abode and would try and make things pleasant for him in all ways possible and I am sure if he does that with the prince he will make the most pleasant impression. To be always thinking of etiquette is to make mistakes. Let the other think of the etiquette."

The dinners and levees at the White House continue with the usual regularity and are better managed and more enjoyable than formerly. Almost every night some one in Washington gives a dinner party and on most evenings there are one or two receptions and perhaps a ball to be attended later so that no one who has come to the capital to enjoy the social gayety is likely to be disappointed. A great many men from Washington went to Philadelphia last week to the Clover club banquet. Minister Wu was the guest of honor but that did not save him from the interruption of the speakers at the club's banquet as always subjected, however the Minister proved himself to be both good natured and witty and was voted "a royal good fellow."

The daily sessions of congress the past week have been limited in number and brief in duration and the only really important work has been done in committee. Today or tomorrow the Philippine tariff bill will be reported to the senate and promises to furnish a subject for debate that will last for some weeks. The senate committee on commerce has decided to report favorably on the ship subsidy bill and that will come up for discussion before long although probably not until after the Philippine bill is disposed of.

I met Representative James H. Southard of Ohio in the Capitol yesterday and he told me that he was pushing the question of the adoption of the metric system of weights and measures in his committee. He is chairman of the house committee on coinage, weights and measures, to which the bill providing for the adoption of that system by the government was referred. "We have heard from the scientific men of the country in past years," said Mr. Southard, "and they are unanimously in favor of the change. It is recognized that it must come sooner or later, and we desire to ascertain if the time has come. With that end in view I have invited some of the most prominent manufacturers in the country to appear before this committee and express their views."

"We expect to hear from such men as Mr. Vaniclan, Superintendent of the Bladwin Locomotive Works, Mr. W. M. McFarland of the Westinghouse Electric Company, Mr. T. C. Search, president of the National Manufacturers' Association and others. The men we have invited now are the only ones who might object to the change. I don't think they will, as many of our manufacturers now have to use two systems of measurement because their foreign customers demand the metric system."

In reply to a question Mr. Southard said that the United States, England and Russia were the only great countries who had not already adopted the system. The house committee on commerce is still hearing depositions on the subject of the Pacific cable. General Greeley, head of the United States signal service, strongly advocated government ownership of the cable. He stated that during the recent war he had been obliged to secure control of the Haytian cable at a cost of \$2,000 per day, an expense which need not have been incurred had

the government owned the cable. Admiral Bradford, who has had charge of cable soundings for the navy, also testified in favor of government ownership. He said that in the event of a war with Great Britain it would be impossible for the United States to communicate with the Philippines and declared that the fact that Great Britain owned cable communication with all of her possessions made her navy more effective than ours.

The president is contemplating a trip to the Charleston Exposition to take place early in February, and will probably leave here on the 11th. Mrs. and Miss Roosevelt, Miss Carow, Mr. A. K. Gracie and several members of the cabinet and their wives are expected to accompany the president. Mr. Roosevelt has been compelled to decline invitations to visit Savannah, Atlanta and several other southern towns.

Bailey in Southern Oregon.
Food and Dairy Commissioner Bailey has returned from Southern Oregon where he inspected the dairies and creameries, and incidentally investigated the sale of short-weight butter, says the Oregonian. In speaking of his trip, Mr. Bailey said that in his visits to the stores he found no butter below the legal weight.

"Since the agitation against short-weight butter began," he said, "Southern Oregon has enjoyed the full roll, and California, which largely supplies the market at this season of the year, has been shut out, as its rolls do not meet the scale. The short-weight movement has greatly pleased the merchants, for it relieves them of the necessity of taking farin butter in trade. The farin butter comes in all weights, and heretofore the merchants have had to accept it or lose the farmer's trade. Now he may reject it and lay the responsibility on the rejection upon the State Food and Dairy Commission."

After visiting the dairies and creameries, I stopped at the homes of some of the orchardists of Jackson county, and inquired about the fruit prospects, and received some information which should be given to the people of Portland. One of the largest orchardists in the county showed me an account, according to which a variety of apples grown in Jackson county and in the Watsonville district, California, were sold in London, England, on the same day. The Oregon apples brought 13 shillings and sixpence, and the California fruit 7 shillings—a higher mark than Oregon's superiority over her southern neighbors has ever before reached.

"New orchards are being set out and in my opinion trees will be planted on about 2000 acres this spring. "One great need of Southern Oregon is an apple cider and vinegar factory. Enough apples to supply the whole state with cider and vinegar go to waste every year. One firm of orchardists, on 160 acres of trees, planted 10 years ago, cleared \$20,000 net this year, and yet acres of apples went to waste."

Enjoyable Winter Trip.
A winter trip to Southern California and Arizona via the famous Shasta Route is one never to be forgotten. Renewed acquaintance with this section will ever develop fresh points of interest and added sources of enjoyment under its sunny skies, in the variety of interesting and added industries, in its prolific vegetation and among its numberless resorts of mountain, shore, valley and plain.

Two trains leave Portland daily morning and evening for California. These trains are equipped with the most improved pattern of standard and tourist sleeping cars, and the low rates place the trip in reach of all.

Dirty Paper Money.
The state and local boards of health of Ohio, before concluding their annual session, adopted a resolution declaring against the continued use of paper money after it has become soiled from constant handling. The matter was brought before the convention by Dr. Thomas Clarke, of Massillon. He said that the paper currency of the country, after it has been in use long enough to become dirty, is one of the most prolific

ALL WOMEN
Wine of Cardui is the guardian of a woman's health and happiness from youth to old age. It helps her safely into womanhood. It sustains her during the trials of pregnancy, childbirth and motherhood, making labor easy and preventing flooding and miscarriage. It gently leads her through the dangerous period known as the change of life.

WINE OF CARDUI
cures leucorrhoea, falling of the womb, and menstrual irregularity in every form. It is valuable in every trying period of a woman's life. It reinforces the nervous system, acts directly on the genital organs and is the finest tonic for women known. Ask your druggist for a \$1.00 bottle of Wine of Cardui.

Wine of Cardui, Ala., July 11, 1900.
I am using Wine of Cardui and I feel like a different woman already. Several ladies here keep the medicine in their homes all the time. I have three girls and they are using it with me.
Mrs. KATE BROWDER.
For advice and literature, address, either direct to the Ladies' Advisory Board, 100 N. Dearborn St., Chicago, Ill., or to The Chicago Medicine Company, Chicago, Ill.

sources of disease and one of the most dangerous carriers of bacilli in existence. As soon as a bill becomes soiled sufficiently to make hiding places for germ life it should be promptly recalled by the government and a new bill issued in its stead.
The officials of the association will recommend this action to the treasury department.

A. O. OF S. E.
The American Order of Steam Engineers is an organization of engineers, for engineers and engineers only. Its purpose is to obtain by a systematic effort a proper and just recognition of the value of the steam engineer to the community, and by education to so enlighten its members that their influence and prestige may be extended for the general betterment of the profession, and to so elevate the dignity of the calling as to command proper recognition and the respect of all men.

The day has passed when the man, whose knowledge of steam engineering does not extend beyond the starting and stopping of an engine, can call himself an engineer, and in recognition of this fact, the A. O. of S. E. declares it to be its first purpose to promote a more thorough knowledge in its members of the theory and practice of steam engineering.

The A. O. of S. E. has incorporated as part of its purposes "to help the sick, injured and distressed and bury the dead; to establish a widows' and orphan's fund; to help members who may become incapacitated from following the profession to obtain employment suited to their affliction."
The recognized danger that is attendant upon the operation and management of steam boilers and engines has demonstrated that in order to protect the lives and property of the public it is necessary that the State should exercise some supervision over these unusual elements of danger, therefore the A. O. of S. E. pledges itself to exert its influence to secure the passage of laws regulating the employment and licensing of steam engineers.

Blown to Atoms.
The old idea that the body sometimes needs a powerful, drastic purgative pill has been exploded; for Dr. King's New Life Pills, which are perfectly harmless, gently stimulate liver and bowels to expel poisonous matter, cleanse the system and absolutely cure Constipation and Sick Headache. Only 25c at Dr. Kramer's drug store.

If, in the past you have had trouble with your typewriter ribbons, send a sample order to E. L. King, 218 Sansome Street, San Francisco, and see if you can't get a better ribbon for seventy five cents than you have been paying a dollar for. \$7.00 a dozen, any color and for any machine. E. L. KING, Pacific Coast General Agent, 218 Sansome St., San Francisco, Cal.

How's This?

Wednesday—Penmanship, orthography, reading, arithmetic.

Thursday—Art of questioning, theory of teaching, methods, physiology. LEONORA SARGENT, County Supt.

Destroyer Goldborough.
After two or three accidents, numerous delays on account of repairs to her machinery and her builders bankrupt, the torpedo-boat destroyer Goldborough has been accepted by the U. S. government. Wolf & Zwicker, of Portland, took the contract to build the vessel for \$215,000, of which \$175,000 was paid, but owing to the fact that she was not completed at the proper time the firm will lose the remaining \$40,000.

TWELVE MILES LONG.

The Simplon Tunnel Will Be Bored Through That Distance.

Some of the Great Tunnels of This and Other Countries That Have Taken Many Years and Much Money to Excavate.

When the state of Massachusetts many a long year ago took up the task of digging out the Hoosac tunnel, and the work dragged along in the most tedious manner imaginable, the wits of New England, and especially Oliver Wendell Holmes, made countless jests about "that dreadful bore," which it seemed as one time would never be completed. But with an ample margin before the end of the last century it was opened to railroad traffic, and it has been useful ever since. The railroad companies all over the continent have been spending millions upon millions of dollars in the construction of tunnels since that time. The Hoosac tunnel was the first of the kind to be opened for the piercing of mountains and the building of railroads far below the surface of the earth. And note, says the New York Tribune, how the scope and extent of such enterprises have been enlarged and developed.
Before the first blast at the foot of the Hoosac hills was exploded of not more than a mile in length, under a considerable hill or a peak of moderate height, was regarded as a formidable task. The Hoosac hole was about five miles in length, and so many years were spent before trains were sent through it, and so many millions of dollars were thrown into the pit, that several more-grown-up tunnels of the old day state were inclined to boast of it as one of the seven wonders of the modern world. But the Hoosac is no mighty affair in comparison with the tunnels under great mountain ranges in our western territory and elsewhere. Under the Alps especially has engineering skill accomplished great things. The Arlberg tunnel is a half dozen miles in length. The Mont Cenis nearly eight, the St. Gothard more than nine, while the Simplon, now under way, is almost twice as long as the Arlberg, a half longer than the Mont Cenis and almost a third longer than the St. Gothard. It is expected that the Simplon will be open for traffic in 1904. The barrier of the Alps as an obstruction to swift and easy travel to and from Italy is almost done away with. What obstacles will discourage the engineers of future generations when those of today are so eager to dig out tunnels 12 miles long thousands of feet beneath the summits of snow-capped mountains?

HAS A KINDLY HEART.
King Edward Cares for His Old and Faithful Servants in All Departments.

King Edward VII. of England has a heart as kindly and tender as ever beat in a human breast, says an eastern exchange. Other faults he may have, but he never forgets one who

TO MARRY PUEBLO INDIAN.
Denver Woman Has Been Wooed and Won by an Agency Red Man.

Miss Cora Arnold, 27 years old, a pretty white woman who lives with her parents, Mr. and Mrs. George Wilder, at No. 1415 Welton street, Denver, Col., is engaged to Albino Chavaia, a full-blooded Pueblo Indian, 31 years old, who lives on the Santa Clara agency in New Mexico. The wedding, according to the present plans, will take place in Denver.
The Indian, who is a magnificent specimen, came to Denver early in the fall with a band of his tribesmen to perform at the city park. He was a friend of Charles Christy, a former government scout, and after his fellows had gone home went to Christy's house to visit. There he met Miss Arnold. He was an ardent wooer, and soon had captured the woman's heart. Their engagement became known when the Indian left for his agency to prepare a home for his bride.
