Efforts are being made by the de-

informed on the subject that the blue- scorching sun." berry can be made to furnish a profit- In the Harleian manuscripts, now in

a great tract of 150,000 acres, known as Anglo-Saxon period, the "blueberry barrens," which is Beck, as quoted in of the berries, however, so to the canneries, one of which has a daily capua-ity of 600 bushels and an average an-in Italy; a little shade." nual output of 8,300 cases of two dozen worth of blueberries.

Before the days of canning the barrens were considered common property, and people came 50 or even 100 miles for a week's outing, to gather and villages. Now, however, the collecting of the crop is done mainly by paid to these pickers each year. During the picking season from 1,000 to 2,000 women and children are thus en-

From the figures here given it will be seen that the wild blueberry is a much more valuable fruit than is popularly supposed, representing as it does an industry of no small importance. The total eanned product of the blueberry barrens in 1899 was about 50,0000 cases, worth \$2,20 a case; so that the value of the output for this

section alone was more than \$100,000. Northern Michigan produces great quantities of bineberries, and immense tracts in other parts of the country are well adapted for the production of the There are several recognized varieties, the "high bush" bineberrs being distinguished not only by the size and quality of its fruit but also by the beauty of its flowers.

BULL MET HIS MATCH.

Went Up Against a Portable Engine ad Rad a Kink Put in His Pugnactty.

When they began to run the trol county farmer the other day, according to the Detroit Free Press, "I made my mind that I'd have to do someealculates he's the biggest thing on earth. I knew he'd mix up with the first trolley car that came whizzing along, and so I says to my son Jim: "Jim, we've got to experiment a lit-

Let's see what we can rig up." Jim was agreed, and so it happened that a feller came along next day with a portable engine. I told him what was road. He had his eye on that engine, and he knew it was a good chance to show off. The man would have to run away if he could, being afraid of an upaet, but there was no chance, and be took the middle of the road and let engine rose up on its hind wheels and

anked:

Well, sir, he struck the boilerhead fair and square, and if anybody was ever knocked into the middle of last week he was. He fell in a heap and rolled over into the ditch, and for 13 short off and twisted the other, and It was the right kind of a dose for him. When the cars began to run he at the first clang of the gong his tail went down and the tears came to his eyes. He didn't want to tackle any-thing size on wheels. Indeed, it broke his spirit till a two year-old steer could rustle him around, and if he don't grieve himself to death before apring I guess I shall kill him for solspring I guess I shall kill him for sol-

THEY FIGURED IN CHURCHES IN THE EARLY CHRISTIAN DAYS.

When First Adopted by the Public, They Seem to Have Been Utilized Solely as San Protectors-Once an Attribute of Dignity.

In the early Christian churches a large ambrella usually hung over the priest, and it is said that from this custom it became one of the attributes partment of agriculture to improve the blueberry, which, having been regarded hitherto as merely a wild fruit, is now to be brought under cultivation.

Selected plant from the decision of cardinals appointed from basilican churches. For years the doges of Venice carried umbrellas of state, and in 1288 Pope Alexander III. declared Selected plants from the "blueberry that these should be surmounted by barrens" have been transferred to the golden statuettes of the annunclation. gardens of the experiment station at | Michael Morosini was the first Vene-Orono, Me., and exceptional berries tian layman to carry an umbrella, have been gathered for the purpose of | which consisted of a small, flat square sowing the seeds from them, the seed, of green stuff, over which was a coplings produced being eventually trans-ferred from nursery rows to the field, reports the Philadelphia Saturday Evening Post. Excellent as is the wild blueberry, a small canopy and was made of leaththere is no question but that it can be er extended by a series of wooden much improved by eniture. Occasional boops. He says umbrellas were used bushes have borne fruits half an inch by horsemen, who, resting the handles in diameter, and a single plant has on the thigh as they rode, bore them been known to yield 12 quarts in a sea- so that they should "minister shadow It is the belief of those best unto them for shelter against the

Beck, as quoted in the Draper's Die burned over at frequent intervals to tionary, asserts that at the time that get rid of the scrub and to facilitate Stephen usurped the crown of England the harvesting of blueberries. The (twelfth century) umbrellas were in land is lessed for half a cent a quart, common use among the English. The paid to the owner, for all hineberries first mention of the umbrella in Engpicked, and part of the crop is shipped fresh to Portland and Boston. Most Wonders" (1598), where it is described as a "kind of round fan or shadowing

In 1656 an umbrella was exhibited in cans each. The yearly product of this the "Museum Tradescantianum; or, one cannery is not far from \$15,000 Collection of Raritles Preserved at South Lambeth, Near London, by John Tradescapt," which was known as

"one of the wonders of the ark." In the church of Cartmell, in Lancashire, England, there was preserved blueberries for their own use and for until a few years ago an umbrella said to be over 300 years old, which was used chieffy to protect the host.

References to the umbrella are to be companies which employ large num-bers of pickers, and about \$30,0000 is (1674) and Phillips' "New Worlde of are good vis: Words" (1678). In the first the reference reads: "Umbrello, a fashlon of round and broad fans, wherewith the Indians (and from them our great ones) preserve themselves from the heat of the sun, and hence any little shadow, fan or other thing wherewith the women guard their faces from the sun." The second runs: "Umbrello, a screen against the sun's heat, used chiefly by the Spanlards, among whom it is known by the name quitasole."

The imaginative Dean Swift in the "Tale of a Tub" (1606) depicts Jack, an ever resourceful type, making use of a parchment copy of his father's will as a nightenp when he went to hed and as an umbrella in rainy weather. Did the worthy Hanway take his cue from this or from Kersey, according to whom the umbrella was a "broad fan or screen commonly used by women to shelter them from rain?" The last reference, made in 1709, is the first men-tion of it as a protector from the rain. (1737) called it a parasol, defined it as "a sort of small canopy to keep off the

Small, light umbrellas came into fashion among the ladies of the French court in 1675, and these were carried by attendants: Richelet tells us that they were made of olicioth or leather

The precise date when Jonas Han-way, who died in 1786, introduced the umbrella into England is not recorded in any of the encyclopedias I have at hand, but they all state that he was tle and give our old buil a set-back. popularly known as its introducer.

With the Dutch, as with the Indian grandees, the umbrella was first an at tribute of dignity, and well it might be, for the prices paid for them at The wanted, and we was still talking, when the old bull jumped the fence into the at the Cape of Good Hope were not slow to insist on preserving the dignity of the umbrella, for Ryk van Tulbugh, governor of Cape Colony in 1752, enacted that "No one less in rank than then came down all right, though it chants shall not enter the castle in fine weather with an open umbrella. But what about the buil?" was Frank H. Vizetelly in New York Times.

tific studies and experiments was the production of Dr. Pierce's Favorite Prescription, a medicine with a record of cures of womanly ills which is without a parallel in the history of medical science. The fact of these cures is attested by hundreds of thousands of women. The permanence of the cures is proven by grateful women who after a lapse of years write in such terms as these: "It is now several years since I used Dr. Pierce's Favorite Prescription. I have had no return of my trouble. I am a healthy, happy woman, thanks to Dr. Pierce and his medicines." There are people who say that such cures are imaginary. The women who are cured don't think so. They know there was nothing imaginary about the backache, weakness and nervousness from which they suffered. They know that there was nothing imaginary about the scales which told constantly of a loss of flesh, nothing imaginary about the mirror which showed the hollowed cheek and dulled eyes. Above all they know that there was nothing imaginary about the bills they paid for medicines and doctors without receiving any benefit. There is also nothing imaginary to them about the result of the use of

"Favorite Prescription." No more pain, no more backache or headache. No more nervousness and sleeplessness. Timt's not imaginary. And there's one solid fact which there is no getting away from because it is written in solid flesh and can be weighed in ounces and pounds, and that is the gain of lost flesh which so commonly follows the use of "Favorite Prescription," together with the restoration of a clear complexion and a

"I had female trouble for eight years," writes Mrs. L. J. Dennis, of 828 East Col-"I had female trouble for eight years," writes Mrs. L. J. Dennis, of 828 East College Street, Jacksonville, Ills. "Words cannot express what I suffered. I sought relief among the medical profession and found none. Friends urged me to try Dr. Pierce's Favorite Prescription. When I commenced taking this medicine I weighed ninety-five pounds. Now I weigh one hundred and fifty-six pounds—more than I ever weighed before. I was so bad I would be from day to day and long for death to come and relieve my suffering. I had internal inflammation, a disagreeable drain, bearing-down pain, and such distress every month but now I never have a pain—do all my own work and are attempted leadthy woman." work, and am a strong and healthy woman."

"In the spring of 1000 I became very ill," writes Mrs. Alviena Scholtz, of Lake Washington, LeSueur Co., Minn.; "my back was very weak and ached so that I could do no work at all, so I was obliged to take to my bed. I wrote to Dr. Pierce and he sent me a very kind letter and advised me to take his 'Favorite Prescription' and 'Golden Medical Discovery.' I took six bottles of each and am a well woman now. I cannot say enough in favor of Dr. Pierce's medicines."

"I wrote to you for advice, February 4th, 1896," writes Mrs. Lonia Halstead, of Claremore, Cherokee Nation, Indian Territory. "I was racking with pain from the back of my head down to my heels. Had hemorrhages for weeks at a time, and was unable to sit up for ten minutes at a time. You answered my letter, advised me to use your valuable medicines, viz: Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery,' and 'Pleasant Peliets,' also gave advice about injections, bath and diet. To my surprise, in four months from the time I began your treatment I was a well woman and have not had the backeds six and the second work of the surprise. and have not had the backache since, and now I put in sixteen hours a day at hard

womanly ills. It restores regularity and dries the drains which weaken It heals inflammation and ulceration and cures female weakness. It is invaluable as a tonic for weak, worn-out, run-down women, restoring them to perfect health and strength.
