Good Roads Indicate Progress-Wide

The subject of good roads is an all American subject, but it is one which , ould be of most interest to those sections which have given it the least at tention. Naturally the best built and the best maintained roads are in districts where there are many people and much stone. But good roads do not come always because the region they traverse is populous. A region sometimes becomes populous because there are good roads. Then, again, there are bad roads in thickly settled districts blade.

Life is a duel in the dark with disease. One false step, one mistake, and the attack comes swift and sudden. in districts where the roads ought to be good. Good roads in a neighborhood progress and they promote progress. They are both cause and effect. Well The mistake which commonly opens the way for an attack by disease is neglect of the symptoms of stomach trouble. When eating is followed by undue fullness, belchings, sour or bitter risings, etc., disease is attacking the stomach. The best way to frustrate such an attack is to use Dr. Pierce's Golden Medical Discovery. It cures diseases of the kept highways constitute a theme which has engaged the attention of many more persons in the last decade

Improved highways have promoted the extension of rural free delivery, and this delivery has aided in the de

than in any previous one.

A BAR TO PROSPERITT.

velopment of better roads, says the ngton Star. The buggy benefit to highways. A road good enough for mounted horsemen and horsewomen, as so many of our predecessors traveled, was not good enough this tonic. For diseases peculiar to for a buggy. Then the bicycle im-proved the roadways. A highway good made. It is composed of the ingre-enough for a buggy was not good dients from which the system has enough for a biggy was not good enough for a bicycle, and thousands of wheelmen rolling through the country did campaign work for the betterment of roads. They told the country folk, and insisted on it, too, that their roads were not as good as some others. This was missionary work, because it is a phenomenon of country life that a man always thinks the road he lives on is very good or at least not so bad as some others.

As the bicycle helped along the good cause, so will the automobile or the traction carriage. Automobilists want better roads.

dients from which the system has been deprived by disease, over-work or dissapation. It enters at once into the circulation, building up the tissues that have been wasted, and making pure, rich blood in the most direct way. For weak, nervous and unsteady people, pimply, pale or fleshiess people, it will make strong steady nerves and give the complexion that wholesome look that indicates health. We have hundreds of letters that people have written us, saying that they had gained in good solid flesh at the rate of one to three pounds per week while using Dr. Gunn's Blood and Nerve Tonie. It should be taken after meals, one or

one. A committee of automobilists, reporting recently on New York roads,

"It is worse than useless to create expensive and valuable highways only to have them cut to pieces by the use have them cut to pieces by the use of narrow tires, as now used for the hauling of heavy loads in this state. When you have got a good thing, it costs money, and you must take care of t and change your methods to maintain it. Wide tires are of the greatest in preserving ordinary dirt

HIGHWAY ACROSS COUNTRY The Macadamized Road From New

York to Chicago.

The movement for the building of a macadamized highway from New York to Chicago is certainly deserving of success, says the Cleveland Leader.

Anything that is designed to be success. Anything that is designed to improve ST. VITUS DANCE Sure Cure Circular Dr. United States ought to be encouraged, for the greatest obstacle in the way of the successful development of the agricultural regions of the country today is the difficulty experienced in traveling over the highways in certain seasons of the year.

The movement for good roads was given considerable impetus several years ago, when a great army of wheel riders began to clamor for improve ments in the highways, and much was accomplished in various sections of the country through the efforts of the wheelmen's organization. The craze for bleycle riding has abated, however, and one force in the good roads move ment has been lost.

The men back of the New York-Chicago highway project are, of course, interested in automobiles, either as manufacturers or users of horseless reficies, and they cannot be said to be free from an interested motive. That should make no difference, however. The contemplated inprovement would be of great benefit to the country, and if ways and means can be provided the project should be carried through.

DYSPEPSIA.

People that have dyspepsia have eyes and are usually weak kneed. They feel bilious and the world in general has a bilious look to them, they have so many symptoms that it is difficult to locate the place where they feel the worst. the project should be carried through.

This country ought some day to have as good country roads as are to be European countries in which the building of highways has been carried on scientifically for many years.

Experimenting With Wood Pavement An experiment is to be tried with wood pavement in Brooklyn. A sample street or two is to be covered with ping which has been treated with creosote oil and rosin, the process giving hardness and endurance. The blocks are set up edgewise—that is, the grain of the wood runs in the same direction as in the growing tree-and they are laid on coherete in the same manner as asphalt. The advantages chimed over asphalt are slience, elasticity, endurance, facility of repair and a trifling gain in cheapness.

CROUP. The startling amounteement of a becovery that will surely lengthen fe is made by editor O. H. Downey, f. Churabasco, Ind. "I wish to tate," be writes, that Dr. King's The peculiar cough which indicates croup, is usually well known to the mothers of cronpy children. No time should be lost in the treatment of it, and for this the is made by edifor C. H. Downey, of Churchasso. Ind. "I wish to state." be writes, that Dr King's New Discovers for Consumption is the most infallible renealy that I have ever known for coughs, Colds and Grip, I's invaluable to people with work law. and for this purpose no medicine ba-received more universal approval than Chamberlain's Cough Remedy Do not waste valuable time in experiment not waste valuable time in experiment ing with untried remedies, no matter how highly they may be recommended, but give this medicine as directed and all symptoms of croup will quick, by disappear. For sale by all drug, more guarantees every 50c and \$1.00 gists. mer guarantees every 50c and \$ bottle, and gives trial bottles free.

"The nicest and pleasantest medi-cine I ever used for indigestion and constipation is Chamberlain's Stomach and Liver Tablets," says Melard F. Craig, of Middlegrove, N. Y. "They work like a charm and do not gripe or have any unpleasant effect." For sale by all druggists,

HONEST DOCTORS

As a rule doctors are absolutely honest. The fancy

which some people have that doctors make frequent

visits to run up bills is simply born of lack of knowledge

of the delicacy and difficulty of the doctor's work. As

a rule, when the doctor has reached the limit of his skill

he will say so, and refuse to take money for

services which he knows must be unavailing. But

even the most honest doctor sometimes falls into

the error of limiting the possibilities of a cure to

the measure of his own skill. He says, practic-

ally, "I have exhausted all my knowledge and skill in the case. Nobody can do more than I

can. The patient cannot get well." This state-

ment may be made in perfect good faith and in all honesty, and yet it is very often proven wrong

by the recovery of the patient as a result of the

"My sister (of Arlington, Washington Co., Neb.) was

"My sister (of Arlington, Washington Co., Neb.) was taken very sick and had several doctors," writes Mrs. C. L. Harrison, of Elk City, Douglas Co., Neb. "They could not do her any good and told my mother they would not come any more, as no doctor could help her, that she could not get well. She had 'wasting of the digestive organs.' My mother said to my sister, 'Well, I almost know that Dr. Pierce's medicines will cure her.' So she bought six bottles, three of 'Golden Medical Discovery,' three of 'Favorite Prescription' and some of the

covery, 'three of 'Favorite Prescription' and some of the 'Pellets,' and now my sister is a well woman." The testimonial of Mrs. Harrison is an admirable illustration of the fact that honest doctors can be

mistaken. Several doctors were in attendance. They said, "We wont come any more as the patient can't get well, and no doctor could help her," and yet the use of Dr. Pierce's Golden Medical Discovery effected a complete cure. This is not an excep-

tional case. It has happened again and again that after

doctors had decided no cure was possible, a perfect cure

"I am truly glad that I can do the least thing to show my gratitude for your great medicine," writes Mrs. Mollie Birchfield, of
Handley, Kanawha Co., W. Va. "I was taken six years ago with
a severe pain in my back. The spot seemed no larger than a
twenty-five cent piece, and at times it worked around to my stomach until I had no relief except when under the influence of morphine. The rain would last longer every attack until I finally

ach until I had no relief except when under the influence of morphine. The pain would last longer every attack, until I finally gave up last winter and did not believe I could live a day longer, my misery was so great. I had no appetite and craved cold water all the time. I had eight doctors to see me and all pronounced my trouble gall-stones. Some said I would get well, and others said not until I had the gall-stones removed, but I thank God and Dr. Pierce that I am living, and have had no operation performed either. I just took your treatment right along and it has saved my life. No one thought they would ever again see me in health. Just to think how I suffered for six long years, and here this great cure within reach of me all the time, yet I did not think of it. After the first dose of your medicine I did not have to take any more morphine. I have now taken twelve bottles of Dr. Pierce's Golden Medical Discovery and 'Favorite Prescription,' and now I can work all day with ease. No pains, and no morphine. I have a splendid appetite, sleep good, and feel like a new woman. I hope no one will ever suffer as I did and not try to get this great cure and blessing, for it is a blessing to the sick."

It might be asked, with reason, "How can Dr. Pierce's Golden Medical Discovery cure when so many doctors fail?" The answer must be that "Golden Medical Dis-

covery" is the product of a larger experience in disease and superior skill in treatment than theirs. Many a sailor can pilot his boat about the familiar waters of his own coast who would be powerless to accomplish an ocean voyage. Many a doctor can

treat successfully certain familiar forms of disease who finds himself helpless when the larger problems of complicated diseases confront him. Dr. Pierce's Golden Medical Discovery was perfected in years of study and experience. Dr. Pierce found that

many diseases of organs remote from the stomach had their origin in diseases of the stomach and other organs of digestion and nutrition. He argued that a medicine which would cure the diseased stomach and its allied organs, would also cure the dis-

eases in other organs when they were caused by disease of the digestive and nutritive

tracts. To produce such a curative medicine was the effort of Dr. Pierce. His success is testified to by thousands upon thousands of cures.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other

organs of digestion and nutrition, and so enables the perfect nutrition of the body.

Perfect nutrition is perfect health. Blood is only digested food, and a common cause

of impure blood is food undigested. The "Discovery," therefore, heals the stomach and purifies the blood. It increases the blood supply

and so strengthens the heart, liver, lungs, kidneys, etc.

whose vitality and vigor depend on an abundant sup-ply of pure blood. It cures biliousness and cleanses

the blood from poisonous excreta, the product of a sluggish liver. It builds up the whole body with

sound solid flesh, and gives new strength and new life

to worn-out, run-down, weak and emaciated men and
