A. E. VOORHIES, PROPR. & MNGR Entered at the post office at Grants Paus. Oregon, as second-class mail matter.

THURSDAY, APRIL 2, 1903.

The Jackson county delegation will. it is said, support W. I. Vawter for candidacy as congressman in the coming republican congressional conven-

Admiral Dewey made some comparisons between the American and German navies which were not relished by the latter people. The German press waxed quite indignant over his remarks and it looked for awhite as though it might be an affair for the gnest of Mr. and Mrs. C. Corder of department of state to settle. On in the control of the product of the product

resulting to themselves for those who profit by the library are, generally speaking not the ones whose money supports it. There are few men, light treatles just above the depot. diture when they can see no individual benefit resulting for themselves.

A man is indebted to society for all the comforts which he may enjoy and this fact should make him generous toward his fellow man in content and the comforts which he may enjoy and this fact should make him generous toward his fellow man in content and present a part of heavy discount for good reads when the principle of the Flam mine on Hogam creek for \$30,000. Armstrong and Stoll will begin active work in opening up the mine and preparing the mine with a milling and boy who can fix them up in first class style.

Happy Jack.

A. J. Osteen met with a side of the Flam mine on Hogam creek for \$30,000. Armstrong and Stoll will begin active work in opening up the mine and preparing the mine with a milling and this fact should make him generous toward his fellow man in contents. toward his fellow man in general

In the rush for timber lands which is now going on throughout Southern Oregon, the miners should watch the locations carefully and be ready with their protests if timber locations are made upon ground claimed by them. A better way is for every miner who owns a mining claim which might the building site and the necessary Bro land to send in a plat of his mining land to the land office, and a timber location on that piece of land will not then be allowed. Every miner should know the location of his ground by section, township and range and should carefully watch the timber locations. It would be a good thing for the miners to select some one to keep an eye on the timber locations and let each one furnish that person with a description of their own

The project of a wagon road from Leland to Mt Reuben, which is to be laid before the county court this week, is one of great importance to the county. This road has been talked of before, but at no time has the time for action in this matter been auspicious than at the present. The mine owners of Mt. Reuben give the assurance of completing the road to the mines if the county will build it from Leland to Reuben creek. Mt Reuben is one of the most important mining districts in the county and is growing in importance every day. There will be a number of blg quartz mines in operation there in the near future and this road is demanded both for the convenience of the mine ownersand the promotion of development and for the commercial and industrial welfare of Josephine county.

The Board of Trade is making an effort for the collection of an exhibit from Josephine county for the Oregon bureau of information at Portland It is the intention that all the products and enterprises of the county shall be represented and the exhibit is intended to include mineral, timber, agricultural and fruit products. The most important part of the exhibit will be the minerals and it is to their collection that the Board is giving its particular attention. Nothing can be done, however, without the co-operation of the miners and mise owners. Kuhli Happenings

Kuhli Happen A request has been made to then ing specimens as soon as they can secure them. But to the great majority of the requests, no response has been received. The bursan in Pertland is anxious to receive these specimens which will be seen by all incomers. The fairoads will carry these exhibits.

Saturday on the exeming the guests of the day was one of the happing that the day was one of th tion in the Union depot, where they will be seen by all incomers. The railroads will carry these entitlers.

S. R. Cook was called to Gallistice of charge. The Board of Trade in Grants Pass is anxious to receive and send them and it is ap to the miners themselves to donate the specimens. It is to the interest of every miner and prospector in the country to rapital turned this way aids toward the mineral development of the district of the speciment of the district of the district of the district of the mineral development of the district of the mineral development of the district of the and one way to further such conditions is to support this exhibit. The specimens which have been received will be sent on and those that accretions much of an exhibit as we can at least, but if the miners and miners owners will take a personal interest in the matter we can send in an exhibit which can not be duplicated for excellence in any mining district of like area in the world. We have the ores and we ought to show them.

bydraulic experience on Galice and is essful mining men in the state. CORPORATION TAX LAW Probable Bad Effects Explained

by W. C. Cowgill.

B. Cousin, who has had considerable:

poration tax law and the portage rail poration tax law and the portage rail and when be adopts me his capt way. The objection to the former is happiness will be reading over it its retarding effect on mining description of the case superintendent of county wheats. its retarding effect on mining devolopment and this view of the case well stated by W. C. Cowgill, city ditor of the Baker City Democrat in recent interview published in the Oregonian. He says:

of eastern Oregon, as well as those of southern Oregon, are a unit in their opposition to the bill passed by the recent legislature placing a special hax and very heavy premium upon all tax and very heavy premium upon all corporations, and particularly mining companies, for the very privilege of having a name.

"The mining men do not believe the contract the popular state in the mining men do not believe the source of the second links and the locks have a property of the locks have a proper "You can say that the mining men

The mining men do not believe man exact. Go alread, Ed. that Governor Chamberlain was fully Θ , K. that Governor Chamberhain was fully advised of the facts in the case, or he would have vetoed this bill. Under its provisions the prospector, the pioneer, the discoverer, the small mine owner, has no show whatever to develop his property or profit by his discovery. The extremely high tax based on capital stock, is prohibitory. I discover a good looking ore ledge; spend \$500 to \$2000 in prospecting it; I find that it has the promise of permanent production; my money is all up; it is necessary to raise a development fund in order to block our sufficient ore to sell the property at a fair profit; it can only be done by selling my will som be a fail being profit; it can only be done by selling ciont ore to sell the property at a fair newerals trais profit; it can only be done by selling man
