### Beautiful Picture

Of Domestic Happiness!

A pretty cottage in the suburbs, with a lovely green lawn sloping gently to the street and flowersflowers everywhere. And the man in the picture is a model husband-so kind hearted, and considerate of his wife's happiness and well being that he allows her to mow the lawn several times a week or as often as it needs it. No doubt he even consen's to her getting up early in the morning to chop the wood hard work, and after calm reflection we are inclined to agree with him. But to mow the lawn with one of our lawn mowers -this is not work, it is pleasure

DIED

JENNINGS—At his residence, May 14, 1903, Mr. J. R. Jennings, aged 78 years 8 months, 7 days.

J. R. Jennings was one of the early pioneers of Oregon and was a man highly esteemed by all his aquaintances. He came here with his family from Douglas county when the town was in its infancy and has been a resident during nearly the whole time of its existence. He was formerly in business here and conducted th old Pioneer hotel for a number of years. He leaves a wife and six children; Mrs. Annie Caldwell of Burns, Ore., Mrs. Jennie Birkehead Miss Blackburn, Gold Hill of Wasco, Tex., Henry Jennings of Miss C. Rophermel, Medford eastern Oregon, J. NO CLEW TO THE ROBBER

science of optics has developed proven the fact a perfect eye never for distant vision, and that when does fail it is because of a loss of the power through which it originally overcame defect. Such eyes canonly be made perfect through glasses, and if once made perfect will then, like the perfect eye, never change, and the glasses that make them so will never need changing. This proves that if your glasses need changing

they were not originally a perfect cor-The fitting of glasses is purely a schantcal science, requiring a thorugh knowledge of the eye and the refraction of light as applied to the eye, the real science lying in the scientist's ability to measure to an exact niesty the errors of refraction existing because of these deformities. To make these corrections, we use, resumonly, three kinds of lenses, viz., spheres, cylinders and prisms. Using those lenses separately and in combination with each other, there can be made more combinations—all of which are absolutely necessary—than there refraction of light as applied to the are absolutely necessary-than there are words in the English language. This shows that guesswork in option s very queertain. When your oculist or opticing tells you "if these glasses
