

ROGUE RIVER COURIER 4000 SIGN REGISTER BIG COPPER DEAL CLOSED SMELTER AT GOLD HILL

GRANTS PASS, OREGON. Published Every Thursday.

Subscription Rates: One Year, in advance, \$1.50; Six Months, .75; Three Months, .45; Single Copies, .15.

Advertising Rates: Furnished on application at the office, or by mail.

Obituaries and resolutions of condolence will be charged for at 5c per line; card of thanks 5c.

A. E. VOORHIES, PROP. & MGR. Entered at the post office at Grants Pass, Oregon, as second-class mail matter.

THURSDAY, JUNE 16, 1934.

President Roosevelt has appointed John W. Minto to be postmaster at Portland, succeeding F. J. Hancock, whose resignation takes effect June 30.

The Evening Post, published at North Bend, Oregon, with D. L. Looft-bourger, editor, and Frank X. Hoffer, business manager, is the latest newspaper to enter the field.

The cause of unionism has received a lifting blow in Colorado, in the necessary deportation of strikers from the gold fields by the military powers.

A crushing blow to trade unionism has also been dealt in Rochester, N. Y., in the refusal of a large clothing firm to renew their contract with the United Garment Workers of America.

Unionism as it is or should be, and unionism as it is practiced by many of its members and some of its officials are two widely separated extremes.

The deportation of the disturbing element from Colorado in the nature of the local conditions seemed the only solution of the trouble.

My, ain't it great! said a little fellow the other day, as he walked up to the skin and ran his hands through the hair.

On being assured that there were really bears in Oregon, the young man became very much interested, and had it not been for his mother, he would have been in the Oregon building yet.

Photographs of Oregon views, Penitentiary Indian robes, and a variety of Oregon things also attract great attention from Eastern visitors.

Some who have traveled over coast states, the photographs present familiar views, and they are always given over with renewed interest.

The building itself, which is intended to be a fountain of Lewis and Clark's fort on Clatsop Plains, is about 100 feet long across the front, with a square yard adjoining on the back.

Immediately on entering, the visitor finds himself in a large hall-way, with an immense fireplace on one side, and on the other side a door opening out into the enclosed yard, with from each end wings project.

At one end Col. Doolittle of the Lewis and Clark expedition company has a small office in addition to a large reception room, while the other wing is occupied by the offices of General Superintendent Walbridge.

The roof is covered with regular old-fashioned shingles, split from red cedar and brought all the way from Oregon.

On the top, there is also a platform used for dedication purposes. A little grove of trees adds attractiveness to the location and never fails to elicit favorable comment from the crowds of exposition visitors.

The cabin is so different from other state buildings that it always pleases people who have grown tired of seeing plain simple mansions.

The Gold Standard is a property that demands development and operation on a large scale, and it will be the purpose of the new owners to bring this about.

The several adjoining claims will be operated conjointly. The property offers every facility for becoming a big mine. As well as having an enormous ore body, there is an abundance of timber and water.

W. S. Haskins has sold the Gold Bug mine to Messrs. Angus McQueen and Clark Todd of Portland, and Albert Geiser of Sumpter. It takes six figures to express the price paid for this excellent producer, which will be greatly improved by the new owners, who intend adding 30 stamps to the mill that is now located at the mine, on Mt. Reuben.—Glendale News.

Leland Sitings: Plenty of work for willing hands. George Chapin was seen on our streets last week, selling strawberries.

John Worthington is on the sick list. Lung trouble is the cause of his ill health. No other sickness to report.

Attention passed off very quietly, the Dew drop, although three miles from the pole, refused to sell whiskey that day.

Our streets were blockaded last Saturday. To see the business that is done here is surprising. Why? Because our merchants sell goods cheap.

We are having the growing weather, people are very busy laying as people have turned their attention towards stock raising and selling of hogs. That means the raising of a large amount of hogs in this district.

Of Oregon Building at St. Louis Exposition.

Over 4000 visitors have signed the register in the Oregon building at the Louisiana Purchase Exposition, and as many more have passed through the structure without registering.

The log cabin is cool on the hottest days, and presents a very inviting appearance to tired sightseers. Directly across the gravelled road from the Oregon building is the Home of Hoo Hoo, the lumberman's club, which is similar in many respects to the Westfoot house.

The lumbermen have spared no expense in making their home attractive, and have a very excellent restaurant in their club for furnishing light meals.

Visitors are at once attracted by the two unique buildings, and never fail to take them both in. All day long they crowd the veranda of the Hoo Hoo house, and the main hall of the Oregon building, just for the sake of seeing something original and a little different from anything else on the grounds.

A large black bear skin adorns one of the walls in Superintendent Wehrung's room, and this never fails to secure the rapid attention of every small boy that enters the building, not to say that of the grown ups also.

Photographs of Oregon views, Penitentiary Indian robes, and a variety of Oregon things also attract great attention from Eastern visitors.

Some who have traveled over coast states, the photographs present familiar views, and they are always given over with renewed interest.

Sale of the Blue Ledge Copper Mines is Made.

The final transaction in the sale of the Blue Ledge copper mines on Upper Applegate was closed this week and now Dr. J. F. Reddy and E. L. Jones who have been engineering the deal are able to announce that this famous copper mine is to be developed and a big smelter will be erected at some point on Applegate in the vicinity of either Jose Bar or Watkins within the coming year.

The purchaser of the Blue Ledge mines is a company of New York millionaires at the head of whom is John R. Allen, president of the Bradshaw Mining Company, which operates a big copper mine at Middle town, Arizona. This company now holds the five-sixths interests held by L. F. Cooper, Wm. Malone, W. M. Hamilton, Geo. M. Keller and W. Wenger, of Crescent City. The other sixth is held by Dr. J. F. Reddy, Judge Chas. Prim and Geo. E. Neuber, and they will retain this interest in the new company. Before purchasing the New York Company sent out an expert mineralogist, who thoroughly examined the mine and tested the ore, and a topographic engineer who examined the route for the railroad and the site for the smelter.

Each of these men made a favorable report, the engineer, Mr. F. J. Siebert stating that the entire proposition was far more favorable than he anticipated, the ledge being so situated as to be ideal for getting out ore and to the smelter, while the building of the railroad and the installation of the smelter could be done for half a million dollars less than the company expected owing to the favorable route for the railroad and to the power, water and other advantages for the smelter. Before the final papers were signed a thorough examination of the title to the mine was made by the company's attorney, Andrew P. Burleigh of New York, who reported the title perfect.

Dr. Reddy has received word that the company will send a mine superintendent who will arrive here about the first of July, and who will secure a force of men and at once begin running all the tunnels and otherwise developing the mine ready for getting out ore when the smelter is built.

A preliminary survey for the railroad will be made in the near future. If the Jacksonville route is selected the road will be either built up the left fork of Jackson creek and by a tunnel through the divide to the right fork of Forest creek or turn on Jackson and back to the tunnel worked by the Jackson creek.

The road will be either built up the left fork of Jackson creek and by a tunnel through the divide to the right fork of Forest creek or turn on Jackson and back to the tunnel worked by the Jackson creek.

Big Plant is to be Installed on Recently Purchased Property.

A deal has been closed at Gold Hill, whereby the Gold Hill Development Company, consisting of a dozen wealthy capitalists of Milwaukee, Wis., bought of J. J. Hoock water and power privileges to conduct mining, manufacturing, etc. H. Schaefer, who represented the Wisconsin men, has been here on the ground for several months, but has returned to Milwaukee to submit plans and specifications to his company, and will return as soon as possible, probably by July 1, when active operations will begin.

It is the intention to build a 100-ton smelter of the very latest design, that will consume all fumes and gases, equipped with all the latest and improved machinery. The fuel will come from the company's coal mine in the Meadows district, and all power will be electrical. The smelter will be situated near the Rogue River Mills, on the opposite side of the river. It will give encouragement to miners to develop their properties, and will enable them to realize much higher percentage of values. The company proposes to furnish electrical power for all purposes at reasonable rates. The water-power will be 8000 horsepower. It will be necessary to construct a canal 2100 feet long, 50 feet wide, and eight feet deep, carrying 210,000 cubic feet of water per minute, with 26 foot constant head.

The company has purchased rich mining grounds near Gold Hill that it will develop, and in addition to the contracts now made is prepared to furnish power to all other properties near.

LIVE NEWS FROM PROVOLT

Ed Lewman of Provolt, was at Williams Monday on business.

Miss Sophia Shrimp of Laurel Grove was a visitor at Provolt Wednesday.

W. R. Sonson of Provolt was at Grants Pass, Tuesday with a load of chickens for the city market.

Shirley Fields and Andy E. Jess arrived at Provolt the first of the week from Boise, Idaho, where they have been spending the winter.

The base ball game of last Sunday, was a good one. The score was 16 to 8 in favor of the A. A. C. of Grants Pass. The same teams will play at the Provolt grounds a week from Sunday. Call one and all.

Lumber hauling has begun at A. M. Knox & Co.'s saw mill of Powell's Creek. They have lots of fine lumber to haul, both pine and sugar pine.

Eight teams left this morning for Grants Pass; each wagon loaded like a mountain with hay. This company has 1,500,000 lbs. of saw before shutting down this fall.

There will be a grand basket dinner and church at the Provolt school house, week from Sunday; church will be held at 11 o'clock and also at 2 o'clock in the afternoon, and at night. The following day services will be conducted by Rev. E. Badger of Provolt. All come and bring a basket and have a good time; all are invited.

The hop raisers of this valley are in good spirits this season, for they look for one of the biggest crops of hops that have been raised in this district for many years. They have hops in bloom already, while many are not yet so far along. The Estes yard is the banner yard of Jackson or Josephine county. They have vines that would measure 21 feet high and stand out. If you want to pick some of these banner hops this fall, put in your name at once, and pick over in our meadow. There are also many other yards but none of its equal.

The farmers of our valley are all busy laying in full blast at the present time. The crops are large for the first one, but what is very poor on account of dry weather. Those who have to depend upon grain hay to feed this winter will run short. The prospects at the present indicate high prices for hay again this fall. Hay in the field at Provolt district is quoted at \$8.50 per ton. It is \$1.00 higher than that of last season. The quotations of hay will be \$15 or \$20; there are many looking for a hard winter.

Woodville Items: Rev. R. Tweed visited Grants Pass Tuesday.

Mr. Morris went to Grants Pass Friday on business.

Webb Hall went to Grants Pass Thursday on business.

A goodly number of people are coming to the tent meeting these days.

Mr. Neil went to Ashland Friday to remain for a few days visiting friends.

Mrs. E. S. Stevens returned to Gold Hill after spending a few days here visiting friends.

Mr. Fleck of Grants Pass is superintending the construction of the homestead stamp mill.

Rev. Shelton, arriving from the East and will be the leading speaker in the Holiness camp meeting.

The new traction engine has arrived for the Barber Brothers. They now have two traction engines hauling lumber.

Dr. Holt of Portland, synodical missionary of the Presbyterian church, spent a day visiting Woodville friends.

Piano Lessons: Miss Laura Parker, who has been in Portland for some time, studying music with Prof. W. Gifford Nash, will return next week and will be pleased to receive all her old pupils and any others, after their residence or at her home on corner of D and West Third streets, Phone 587.

Startling Evidence: Fresh testimony in great quantity is constantly coming in, declaring Dr. King's New Discovery for Consumption Coughs and Colds to be unequalled. A recent expression from T. J. McFarland, Bentonville, Va., serves as example. He writes: "I had Bronchitis for three years and doctored all the time with out being benefited. Then I began taking Dr. King's New Discovery, and a few bottles wholly cured me." Equally effective in curing all Lung and Throat troubles, Consumption, Pneumonia and Grip. Guaranteed by National Drug store and Grants Pass Pharmacy. Trial bottles free, regular sizes 50c and \$1.00.

THE TIMBER CONDITIONS

Choice of Timber Can Yet Be Secured From the Government.

Among the hundreds of homestead entries that have been made in this locality in the last one to three years, it is reasonable to expect that a number of changes would necessarily have to take place due to peculiar and unavoidable circumstances. Owing to some such changes, there can be had relinquishments for the homesteads named below. The parties possessing these homesteads find themselves compelled by unforeseen and unavoidable circumstances to sell and relinquish their improvements and rights to the same.

When a relinquishment is received at the land office, the land reverts back to the government and becomes government land so that if your application for a timber and stone claim or homestead on a quarter section goes in with the relinquishment on that quarter section, your application is accepted by the government and the land becomes yours upon fulfillment of the usual conditions respecting government lands.

Here is a partial list of what we offer: Two homesteads in one section carrying 4,000,000 feet each, close to a logging stream in belts of timber. Price, \$235 each for improvements and relinquishments.

One claim seven miles from market, road running through it, splendid location, carrying from 1,500,000 to 2,000,000 feet. Price \$125.

Two claims, 14 miles from market, all down grade, wagon road running within 1 1/2 miles. One carrying 4,000,000 feet; price \$400. One carrying 6,000,000 feet; price \$500. Considering the lay of the land, quality of timber, the heavy belt of timber in which it is located and the amount they carry and the sum at which they can be purchased these we believe to be the best bargains in Southern Oregon.

We have a relinquishment on a quarter section which has the natural mill site for the last two claims mentioned together with several sections of timber nearly as heavy. This quarter section carries from 3 to 3 1/2 million feet of timber. Price \$400.

We also have seven other relinquishments which will carry from 2 to 4 million feet and located from 8 to 15 miles from market. Prices range from \$125 to \$200. Now, attention! The point we want to make is that these lands were the choice lands of Southern Oregon from one to three years ago. When you will have fulfilled the requirements of the Land Office each of these quarter sections will be worth from \$2000 to \$10,000.

To save you time, we would say that as a rule the improvements amount to no more than a small cabin and clearing from one to five acres. The value that we claim for these quarter sections is in the timber, sugar pine, yellow pine, cedar and Oregon pine.

Since making a careful search of the country we find that in the scramble for timber, the cruisers have overlooked many a fine 1/4 and 1/2 section of timber. Therefore we are now able to show you 37 well located 1/4 sections of government timber lands for which we will charge you \$125 location fee.

Each of these above described quarter sections can now be taken either as a homestead or as a timber claim and paid for at \$2.50 per acre to the government.

I am a responsible party and am in a position to show these quarter sections as represented. Call and see our Rooms 10 and 12 Masonic Temple, W. R. SHERMAN, Grants Pass. Long distance phone 731.
