## HIGHWAY MACHINES THEIR HOME A PARK

### NEW INVENTIONS THAT ARE OF GREAT VALUE IN ROAD BUILDING

Road Roller Now Made That Can Be Converted Into a Traction Engine. Other New Machines That Save Time and Money.

One of the most important adjuncts to economical road building is found in ing in towns where large factories are the recently invented combination road located may get some points from er and traction engine, writes Wal- Rush City, R. I., and may induce the don Fawcett in the Buffalo News. It is useless to attempt to make a permanent good road without the use of a steam roller, and yet a machine available for but this one class of work has heretofore involved a very heavy expenditure. However, the new combination outfits which have lately been introduced cost only about one-half as much as an ordinary road roller, and gardens, Mornings and evenings the by reason of the fact that the machines may by the mere interchange of

#### MODERN ROAD BOLLER.

theels be converted from road roller into iraction engines it is possible to employ them for all the various tasks of operating a stone crusher, hauling the stone to the road and finally rolling the new made road.

One of these road building automo tiles will, when in use as a traction engine, haul a load of at least fifteen ons of stone over an ordinary road. On the other hand, when transformed into a stationary engine for operating sione crusher, it furnishes sufficient power to crush any ordinary rock for foundation of the highway. s as the In conjunction with this apparatus the up to date road builders are using a lately devised and very ingenious dump cart, with an attachment for omatically spreading on the road have beautiful homes was not altoany required thickness of stone.

In this time saving method of road sether practical." building the stone is dumped from the crusher into the car, hauled to any dedred point on the road by means of spread over the surface undergoing rapidly and also much more cheaply than it could possibly be done by the use of men and teams. The distributng apparatus on the dump car can be stone, sand or gravel spread upon the road will be of any desired thickness this odd mechanical worker is an ensprinkling during the rolling process, Other new paraphernalia of great tives were at some disadvantage be-

operations are the complete portaten feet in height when folded, for each of the next six. All the prizes and so carefully has the weight been for both classes thus amounted to kept down in planning these portable \$210 outfits that it is now possible to ob-
