SOUTHERN OREGON

Views on the Future of This District.

S. W. Blasdel, of Portland, was and population at a rate not before in Grants Pass several days this week, a guest of the Josephine. Mr. Blas del is one of the leading mining men of the Pacific Coast and has extensive interests in Southern Oregon as well as in several other of the leading mining districts of the West, Mr. Blasdel has great confidence in the future of Southern Oregon and thinks that the time is not distant when it will be one of the principal fields for investment by capitalists.

> The numerous failures of mine ven tores that have occurred in Southern Oregon in the opinion of Mr. Blasdel, is no proof that this is a poor mining section. Every new district has this experience and is dotted with abandoned mine workings and wrecks of mill buildings, monuments of som visionary, inexperienced man's folly or more frequently of some despondent promoter and mine officials who work their stockholders more than they do their mine. There have been mines. enough developed into paying properties in this district to conclusively prove that there is mineral wealth here. And the vast number of promising veins that have been opened up and the large extent of territory on which they are located is added proof that Southern Oregon has the certain prospects of being the scene of great mining operations and a safe, and profitable place for hig investments. full. A few minutes later the hus-Mr. Blasdel but recently returned from the East and found in New York | sd : and other money centers much in terest in western investments, and be thinks that the volume of Eastern oney to be invested in mining proprty is on the increase, and now that Southern Oregon is beginning to get a standing in the mining world much of this money will come here.

Mr. Blasdel is a large stockholder in rock-bound stream, for the greater productive capacity. Cos. or wood which owns 500 acres of placer ground on Grave creek six miles below Le land. Their entire acreage prospects company does not expect to begin mining operations before a year from in length will be constructed to bring allow you to return and exchange work and do not expect to have their plant in readiness for piping until a
