GRANTS PASS, OREGON.  
COUNTY OFFICIAL PAPER.

Published Every Friday.  
Subscription Rates: \$1.50  
One Year, in advance.  
Six Months, .75  
Three Months, .40  
Single Copies, .05

Advertising Rates  
Furnished on application at the office, or  
by mail.  
Obituaries and resolutions of con-  
dolence will be charged for at 5c per line;  
card of thanks 50c.

A. E. VOORHIES, PROP'R.  
Entered at the post office at Grants Pass,  
Oregon, as second-class mail matter.  
FRIDAY, JUNE 9, 1905.

FRUITS, FLOWERS AND GOLDEN  
NUGGETS.

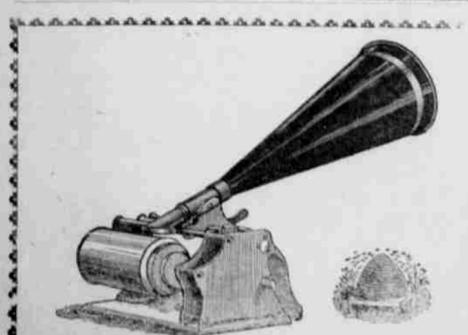

Southern Oregon Day at the Lewis  
and Clark fair gave the Portland  
Telegram, of last Friday, the inspira-  
tion to say nice things about this land  
of sunshine and flowers, luscious fruit  
and golden nuggets, and while the  
article is a most beautiful work of  
art, yet it is little over-drawn and it  
is a compliment that the residents of  
Rogue River Valley all appreciate,  
the wording of which is as follows:  
"From Ashland and Medford, where  
wild flowers bloom and wild berries  
grow and ripen the year round; where  
Nature summer after summer loads  
the peach trees and the apple trees so  
heavily that limbs must needs be  
propped to prevent their breaking;  
and from Grants Pass and Jackson-  
ville, whose surrounding mines are so  
rich and so extensive that rock which  
is less than 25 per cent gold excites  
no comment among the residents—  
from these four bustling Southern  
Oregon towns and from the country  
which surrounds them, today have  
come several hundred people to see  
the Lewis and Clark Exposition. It  
is a considerable distance from Port-  
land to Southern Oregon, and there-  
fore Portland people and Southern  
Oregon people do not see so much of  
each other as do Portland people and  
the people of outlying towns nearer.  
The present occasion furnishes an  
opportunity for making closer ac-  
quaintances, which is gratifying  
alike to the visitors and to Port-  
landers."

TAKILMA SMELTER TO  
BLOW IN NEXT WEEK

Chas. L. Tutt to Arrive Soon—New  
Superintendent Here—Large  
Body of Ore Blocked Out.

Capt. J. M. McIntyre, who has the  
contract for hauling ore to the Takilma  
smelter and of hauling in the coke  
from Grants Pass and the matte out  
for shipment, was in Grants Pass  
Monday. He stated that the smelter  
would be blown in about the first of  
next week and that all preparations  
were completed for the operation of  
the smelter until the roads become  
too muddy next fall to permit of coke  
and matte to be hauled. Development  
work is making such progress at the  
four mines of the Company that  
sufficient copper ore is now blocked  
out to supply the smelter for the  
next year. Arthur Monroe Carpenter,  
who is to be the superintendent for  
the smelter for this year, arrived in  
Grants Pass Saturday night and left  
the next morning for Takilma. Mr.  
Carpenter is an experienced man in all  
the details of the smelter business and  
under his management the Takilma  
smelter will be quite sure of turning  
out matte to its full capacity. Mr.  
Carpenter is from Denver, where his  
family yet are, but his wife and  
children will join him in a short time  
at Takilma.  
Charles L. Tutt, principal owner of  
the Takilma smelter and the mines, is  
expected to arrive in Grants Pass  
within the next few days from his  
home in Colorado Springs, Colorado.  
He will spend some time at Takilma  
to see that everything is in good  
shape for a big run of the smelter.  
Mr. Tutt is one of the millionaire  
mining men of Colorado. He has  
large interests in that state and in  
other Western states in both copper  
and gold properties, and while Takilma  
is one of his small investments,  
yet there is every likelihood that he  
will put in such additional capital  
as to develop it into one of the great  
copper plants of the United States.

Cured Old Sores.  
Westmoreland, Kans., May 4, 1902  
Hallard Snow Liniment Co: Your  
Snow Liniment cured an old sore on  
the side of my chin that was supposed  
to be a cancer. The sore was estab-  
lished and would not yield to treat-  
ment, until I tried Snow Liniment,  
which did the work in short order.  
My sister, Mrs. Sophia J. Carson,  
Allensville, Minn. 10c, Pa., has a  
sore and ulcers that it is a cure.  
Please send her a 5c bottle. Par-  
ticle by Return and Model Drug  
Store.

COME IN AND SEE ME

I give away the famous Busy Bee Gold Moulded Graphophone with  
\$15 in cash trade. Busy Bee Gold Moulded Records with every \$200  
cash sale, or 35 cents each. Ask for coupons with all cash purchases.

CONDOR WATER AND  
POWER COMPANY

Installing Great Electric Plant—  
Three Cables Bring 23,000  
Volts to Grants Pass.

The work of installing the great  
electric power and light system that  
was begun last fall by the Condor  
Water & Power Company is progress-  
ing rapidly, and from the Company's  
water power electric station at Gold  
Ray transmission wires are being ex-  
tended until soon Rogue River Valley  
will be covered with a network of  
electric lines. From Gold Ray a set  
of wires now extend to Central  
Point, Medford and Jacksonville,  
delivering light and power current to  
those towns and to many of the big  
farms for light and to operate irri-  
gating pumps. The stamp mill at  
the Opp mine at Jacksonville is sup-  
plied with power to operate the 10  
stamps and other machinery. From  
Medford the line is shortly to be ex-  
tended to Talent and Ashland.

A wire system is being extended  
north from the station at Gold Ray  
and it is completed to Grants Pass  
with a branch up Footh Creek to the  
Clamplin dredge, which is to change  
from steam to electric power next  
month. From Grants Pass the poles  
are set to the Greenback mine and  
the line, under direction of Foreman  
O. F. Wiley, began this week the  
work of stringing the wires from  
Grants Pass to Greenback. There  
is a likelihood that a branch line  
will be run up to the Granite Hill  
mine and electric power will take the  
place of the steam power now in use.  
It is reported that, eventually the line is  
to be extended from the Greenback  
mine to Glendale and to Roseburg,  
and from Grants Pass down Rogue  
river to the Galien mines and to  
Applegate and Walden districts.  
E. G. Perlman, of Gold Hill, has  
the contract for setting the poles for  
the various lines of the Condor Com-  
pany and this Thursday he completed  
the setting of the poles for a branch  
line down L street from the main  
line to the Grants Pass Iron & Steel  
Works, which is to use electric in-  
stead of steam power. This will close  
Mr. Perlman's work for now, but  
about next month he will return and  
put up the poles for all the branch  
lines about Grants Pass and for the  
other lines that may be extended from  
this city.

The wires that the Condor Com-  
pany are stringing are really cables,  
for they are of seven strands and as  
large as a quarter-inch rope. They  
are of aluminum, and thus weigh  
about the same as a single copper  
wire, though the price is greater.  
There are three of these cables from  
the station at Gold Ray to Grants  
Pass and they will be capable of  
carrying 23,000 volts. A transformer  
station will be established in Grants  
Pass and large transformers will  
step this immense current down  
to a voltage that will permit of its  
use for light and power purposes.  
Dr. C. R. Ray, manager for the Condor  
Company is negotiating for a lot owned  
by Judge H. K. Hanna on G street  
near Seventh and the transformer  
station will likely be located on it.  
If the purchase of this property is made  
the present wooden building, which  
is occupied by the Mee restaur-  
ant, will be torn down and a  
brick building erected on the lot.  
In addition to being used for a trans-  
former station this building will be  
used for the Grants Pass office of the  
Company and for a supply depot for  
the construction crews and for its  
linemen. Current is now on from  
Gold Ray to Gold Hill, and light is  
now being furnished in that town.  
The line is ready for transmission  
of current to Grants Pass, but it  
will probably be a month before  
current is brought to this city, as the  
additional generators, now being put  
in at the station at Gold Ray, will  
not be ready to run for a month yet.  
The new turbine wheels, of which  
there are eight, are all set and when  
the additional generators are in the  
station will be capable of generating  
5,000 H. P.

The Condor Water & Power Com-  
pany will have the distinction of hav-  
ing the most mileage and the longest  
distance of transmission of any elec-  
tric company in Oregon. The Com-  
pany's longest line will be from Gold  
Ray by way of Grants Pass to  
Greenback mine a distance of 40  
miles. From Gold Ray the line  
crosses to the south side of Rogue  
river follows the county road to Grants  
Pass, crossing the river at Gold Hill,  
and then back again to the south side  
at Rock Point and thence down the  
county road to opposite the foot of  
Eight street in this city, where it  
crosses over the river and by Eighth  
street to K and across on that street  
to Seventh, and up that street to F  
street where the transformer station  
will be. The main line to the Green-  
back and other mines on Grays

Jump-off-Joe and Louie creeks will  
go out Seventh street to the Louie  
creek road. At the four crossings of  
Rogue river the lines swing across  
from high poles, as is done in this city  
on Seventh street across the depot  
grounds. The insulators used are  
of a new design and are made of  
a special kind of porcelain. These  
now on the lines are seven inches in  
diameter, but the current is so high  
that they heat and cause too great a  
loss of electricity. These insulators  
will be replaced by insulators of 12  
inches in diameter, which is expected  
to be large enough to give a good in-  
sulation to the wires. Patrolmen are  
employed, who make daily trips along  
each division of the system. The  
patrolman on the Grants Pass-Gold  
Hill division is Arthur Ellison. He  
travels on his wheel and carries a  
small repair outfit and a portable  
telephone with him. Small repairs  
he makes but if badly out of order  
he telephones to Gold Ray or to  
Grants Pass for the regular repair  
crew. Their greatest difficulty comes  
from broken insulators that hoodlum  
boys and men break with rocks and  
guns. Already Patrolman Ellison  
has found five insulators on his divi-  
sion that have been broken by men or  
boys. There is a very heavy penalty  
provided by state law for this offense  
and persons caught breaking insula-  
tors on any telegraph, telephone or  
electric light line will get a reminder  
that they will not soon forget.

The Condor Company has a tele-  
phone system of its own and has tele-  
phone wires on the same poles with  
its electric wires and has telephone  
stations at all points reached by its  
power and light wires.

Michigan Mine's New Mill.

There appears to be another side  
to affairs at the Michigan mine, for  
W. T. Perry, who was a member of the  
company, states that so far as he  
knows that no stamp mill has been  
ordered, and that another trial will  
be given the crusher mill now in-  
stalled at the mine. The difficulty  
arose over the fact that C. C. Pratt,  
manager of the company that built  
and is installing the mill, wishing to  
give it a short test, after it was  
completed two weeks ago, started it  
up and ran dry ore through it. The  
result was that the pad and hood of  
the grinder became heated and ex-  
panding checked down, breaking a  
number of cogs from the gearing.  
Mr. Pratt had run dry ore successfully  
through the sample mill they built  
in Portland, but the Michigan ore  
evidently being harder could not be  
run dry. It was not the intention of  
Mr. Pratt to operate the mill on dry  
ore, and would not have done so, had  
the pumping plant been completed  
and to working order.

Mr. Pratt returned Sunday from  
Portland with the repairs to the mill  
and a new manganese steel pad and  
hood to the mill, and the pump being  
completed and ready to supply the  
grinders with water, it is expected  
to give the mill a full and thorough  
trial next week. Mr. Perry states  
that the mill, when it was run, more  
than met his expectations and ground  
much faster and more even than  
would a quartz mill using the same  
amount of power.

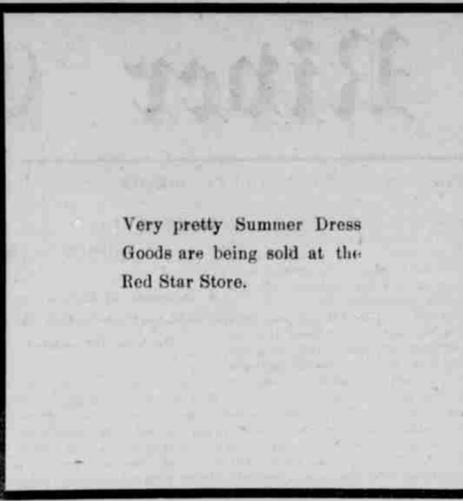

Mr. Perry went to the mine Tues-  
day and returned Thursday morning  
and he states that the new parts to  
the mill will be put in and the mill  
will be put in operation Wednesday  
and run all day. He says it run sat-  
isfactorily and ground the ore to the  
required fineness and at good speed  
and that the grinder did not heat  
or give other trouble. The operation  
of the mill will be continued until  
it has been given a thorough  
working test.

Of the system under which this  
mill works Mr. Perry makes the  
following statement:  
"One of the strong features of the  
Pratt Mining System is the fact that  
no matter how much the ore con-  
tains, the tale is all removed by a  
washing system before the ore enters  
the mill thereby rendering this dan-  
gerous and undesirable condition  
harmless when treated by the Pratt  
System. Another very important ad-  
dition to the Pratt System is the con-  
solidation of the Ryan-Electro-Chlor-  
ine system, by which ores of all  
classes can be reduced to bullion  
on the ground, and at an expense it  
is claimed, of not to exceed one-half  
the ordinary expense of smelting. So  
confident are the Pratt people of the  
ultimate revolutionizing effect upon  
the mining world by the combined  
systems above referred to, that large  
capital has been interested and a  
syndicate has been formed for the  
purpose of acquiring such as they de-  
sire of the choicest and most desirable  
well developed mining properties now  
lying idle, for the purpose of working  
them, as can be done by this system  
at a great profit. As proof of how  
public sentiment is turning in favor  
of this new method, it is learned that  
already another plant has been ordered  
and will be installed upon another  
property only a short distance from  
the Michigan mine as soon as it can  
be manufactured. C. C. Pratt of  
Portland, Oregon, patentee of this  
system, will also be interested in the  
Pratt Mining Syndicate which is the  
one referred to above."

How's This?  
We offer One Hundred Dollar  
Reward for any case of Catarrh that  
cannot be cured by Hall's Catarrh Cure.  
F. J. CRENEY & CO., Toledo, O.  
We, the undersigned, have known  
F. J. CRENEY for the last 15 years,  
and believe his perfectly honorable  
in all business transactions and  
financially able to carry out any obli-  
gations made by his firm.  
WALDING, KISSAN & MARVIN,  
Wholesale Druggists, Toledo, O.  
Hall's Catarrh Cure is taken inter-  
nally, acting directly upon the blood  
and mucous surfaces of the system.  
Testimonials sent free. Price 75  
cents per bottle. Sold by all Druggists.  
Take Hall's Family Pills for  
constipation.

Sleeping Accommodations.

As an accommodation to visitors to  
the Exposition, and others a 16-section  
tourist sleeper will be placed in ser-  
vice between Ashland, and Portland,  
on trains 15 and 16 commencing May  
29th. Sections 9, 10, 11, and 12 are  
reserved for this station and can be  
secured at the depot. G. P. Jester, Agt.

Very pretty Summer Dress  
Goods are being sold at the  
Red Star Store.

TO MARCH TO PORTLAND

Cadet Corps Will Reach Grants  
Saturday, June 25.

Nearly 60 members of the congrega-  
tional cadet corps of Eureka, Cal., left  
that place Monday morning to march  
to Portland nearly 500 miles, which  
place they expect to reach July 30 or  
possibly sooner. They travel up the  
coast to Crescent City arriving there  
Saturday, June 18 and will camp over  
Sunday, then across the mountains to  
Grants Pass arriving here Saturday,  
June 25 and remaining over Sunday.  
The next Sunday they are to spend in  
Roseburg and the following Sunday at  
Eugene.

On arriving at Portland they will be  
quartered in-side the exposition grounds  
and remain 10 days. The return trip  
will be made by steamer from Port-  
land to Eureka arriving home early in  
August.

This company of cadets is the pick  
of the club of nearly 150 boys, officered  
by Clarke Emery, captain; Joseph  
Moore, 1st lieutenant; Wallace Hill,  
2d lieutenant; Fred Brown, 3d lieu-  
tenant; Rev. F. Baker, chaplain; Dr.  
C. E. Donnell, musical director.

Two teams with drivers will carry  
the tents and provisions, and a cook  
will also accompany the party.

A Testimonial.

Grants Pass, Ore.,  
June 14, 1905.  
Dr. F. A. Clise & Son,  
Eye-Sight Specialists,  
Gentlemen: It is with pleasure I  
recommend you to others. Since com-  
mencing to wear glasses I have had  
serious trouble in getting a pair to fit  
my eyes. Have tried leading opticians  
and oculists in different parts of the  
United States, but never till you  
tested my eyes have I been fitted.  
The glasses you prescribed for me  
about a month ago give me perfect  
sight and rest my eyes. The careful  
manner in which you examine the  
eyes should appeal to everyone who  
needs glasses.

Masons Meet in Portland.

The seventy quartz mine, made by  
the Grants Pass Woman's club, have  
proven exceedingly popular, and  
hundreds of them have been given  
away to Eastern people. The Courier  
job office has been busily engaged in  
turning out the cards for these pins  
which are made each Thursday at the  
mining exhibit rooms at which time  
it is desired that all the ladies in-  
terested, whose time is not otherwise  
taken, may assist in making these  
pins. The pins which visitors de-  
scribe as the hit of the fair, are made  
of a circular card on which are in-  
scribed the words, "Grants Pass,  
Oregon, Josephine county, gold  
mine." In the center of this card is  
fastened a piece of quartz, the  
finished pin presenting a neat and  
striking effect.

Josephine county is represented at  
the Lewis & Clark fair in a manner  
perhaps not so elaborate or preten-  
sive as some counties but quite  
strikingly and effectively and the  
mineral exhibit is one that attracts a  
great deal of attention. The gold  
display of L. L. Jewell, \$5000 worth  
of nuggets and gold quartz, is attrac-  
tive in a remarkable degree. This  
is shown under glass and is one of  
the striking features in the exposition.

Miss Effie Yost leaves Saturday  
morning for a short stay at Green-  
back and will then go to Portland to  
spend the summer with her sister,  
Mrs. R. S. Bailey.

40 acres of good river bottom land  
at a snap, within 30 minutes drive  
from town. Terms easy. W. L. Ire-  
land, The Real Estate Man, Ground  
floor, Courier Building.

Prospectors  
Wanted

To save money on their outfits,  
which they can do at

McLANE'S

And anything else wanted for the  
camp at prices that are right.

EELS DESTROY  
IRRIGATING DAM

Myriads of Eels in Applegate  
River Cause Dam of Murphy  
Ditch Co. to Wash Away.

Chas. Johnson and family paid our  
bag a visit Sunday.

Victor Daniels has finished haying.  
He has a fine crop of alfalfa.

Mr. and Mrs. Aler Watts attended  
services here Sunday morning.

Mrs. Carrie McCallister will return  
to Conger's mill next Sunday.

Clarence Wynant and Will McCal-  
lister were at Conger's mill Sunday.

Howard Wynant has been working  
for the Hayes Brothers in the hay  
field.

The basket dinner given last Sun-  
day was a grand success, although  
the attendance was small.

The Evangelistic meeting held  
last Friday evening was well attend-  
ed, and we cordially invite them back  
again.

Considerable trouble is being ex-  
perienced by the Murphy Irrigation  
Company to hold their dam in the Ap-  
legate. The dam is constructed  
with sacks of sand and the eels work  
holes in the sacks and the water then  
washes the sand out of the sacks, when  
sand and sacks go down the river.

Ashland to Own Both Light and  
Power Plants.

Municipal ownership appears to be  
popular in Ashland, for at the special  
election last week in that city to  
vote on the issuance of \$80,000 in  
bonds with which to install a city  
electric light plant, there were only  
nine votes against the proposition.

Ashland has for years owned its water  
plant and it has proved so profitable  
and satisfactory an investment to the  
taxpayers that that fact had much to  
do in making the vote practically  
unanimous for the city to also own  
the electric light plant. Medford has  
owned for several years past both its  
light and water plants. Jacksonville  
owns its water plant, but not the  
light plant.

Masons Meet in Portland

A good-sized delegation from Grants  
Pass attended the Masonic Grand  
Lodge in Portland this week. Dr.  
W. H. Flanagan went as an officer of  
the Grand Lodge, A. F. and A. M.  
holding the position of Deputy Grand  
Master, and he was given the further  
honor of being made Worshipful  
Grand Master for the ensuing year.  
B. R. Riggs was delegate for Grants  
Pass Lodge, No. 84, Herbert Smith  
represented Reames Chapter No. 28, R.  
A. M., and Mrs. H. C. Bobzien was  
the representative for Josephine Chap-  
ter No. 26, O. E. S. Mrs. E. G. Dixon  
was to have represented Josephine  
Chapter, but the recent death of her  
father made it so she could not go, so  
she gave her proxy to Mrs. Bobzien.

The officers who attended the Grand  
Lodge were J. C. Campbell, Mr.  
and Mrs. James Holman, Mrs. B. W.  
Riggs and R. W. Clarke. Mrs. Bob-  
zien will remain north for some time  
and will go to Seaside, where she  
will be the guest of Mr. and Mrs. R.  
L. Davis.

The officers for this year for the  
Grand Lodge for the Grand of  
Masons is as follows:  
Dr. W. H. Flanagan, Grants Pass,  
grand master; Dr. W. H. William-  
son, Portland, deputy grand master;  
Let L. Pearce, Salem, senior grand  
warden; Ed Kiddle, La Grande,  
junior grand warden; W. A. Cleland,  
Portland, grand treasurer; James  
F. Robinson, Eugene, re-elected  
grand secretary; Judge J. B. Cleland  
and J. M. Hodson, of Portland, and  
M. S. Woodcock, of Corvallis, were  
re-elected trustees.

The officers for the Grand Chapter,  
Eastern Star are:  
Worthy grand matron, Mrs. Inez M.  
Ryan, Oregon City; worthy grand  
patron, George M. Hyland, Portland;  
associate grand matron, Mrs. Bay  
L. Sherwin, Ashland; associate  
grand patron, C. C. Parker, Albany;  
grand secretary, Mrs. Mary Scott  
Meyers, The Dalles; grand treasurer,  
Mrs. Clara L. Lyle, La Grande; grand  
conductress, Mrs. Florence Naeberg,  
Marshfield; associate grand conductress,  
Mrs. Jennie E. Reames

Enlarging Chautauqua Building.

Visitors at the coming session of  
the Southern Oregon Chautauqua  
Assembly in Ashland can hardly be  
expected to recognize the unique  
tabernacle where they have so many  
times in the past been edified and  
entertained. The bee-hive shaped  
structure has been bisected and one  
half moved back and an extension  
built between the two halves, to  
double the seating accommodations  
in the building. Another copula will  
be added and the building will be  
generally improved to meet the  
growing needs of the Assembly. The  
movers finished their work Friday  
and the carpenters are busy now with  
their contract.—Ashland Tidings.

Reception to Evangelists

The Chapel car Emanuel left Wed-  
nesday evening for Merrill. The  
evangelists, Rev. and Mrs. E. B.  
Hermiston, who are with the chapel  
car, were tendered a farewell recep-  
tion on the afternoon of Wednesday  
at the residence of Mrs. W. H. Fattilo  
by the Baptist Ladies Aid Society.  
A delightful social time was had and  
refreshments were served. A most  
enjoyable reception was given by  
Mrs. Hermiston that proved the lady  
to be a fine socialist.

The reception closed by an address  
by Rev. J. E. Travis, in which he ex-  
pressed the appreciation of the mem-  
bers of the Baptist church and of the  
citizens of Grants Pass for the effi-  
cient work and for the fine sermons  
that both Rev. and Mrs. Hermiston  
had delivered at the series of meet-  
ings held the past week at the Baptist  
church. Rev. Hermiston responded  
in a feeling manner stating that he  
and Mrs. Hermiston would leave,  
wherever they went, only the kindest  
recollection of their stay in Grants  
Pass and of the many courtesies that  
had been extended to them while here.

Geo. Baehner is visiting his parents  
and old friends here this week. Mr.  
Baehner was a member of the May  
class graduating from the North  
Pacific dental college. He has de-  
cided to locate permanently in Rose-  
burg.

E. C. Dixon has sold his interest  
in the Dixon Bros' dental business to  
his brother and has moved with his  
family to Ashland where he has  
opened an office opposite the Hotel  
Oregon. Mr. Dixon also sold his resi-  
dence property on O street to his  
brother.

Postmaster C. E. Harmon went to  
Selma Friday to accompany home  
Mrs. Harmon, who had gone to their  
farm near that place to spend the  
summer, to seek relief from hay  
fever, but getting no relief she was  
compelled to return to Grants Pass,  
and she and Mr. Harmon got back  
Monday.

will crush the ore taken from their  
mine, the Maid of the Mist.

Geo. Sparks, who has been in  
Seattle, Wash., for the past six  
months returned to his home on  
Thompson creek last Friday.

Der Captain.

Dr. Findley Returns.

Dr. M. C. Findley, returned Friday  
from New York, where he had been  
for the past two months doing post  
graduate work in advanced practice  
in the great eye, ear and throat in-  
stitutions of that city. Dr. Findley  
was able to bring with him some of  
the most renowned specialists of the  
country and to witness their methods  
in performing some very delicate  
operations and he had the privilege  
of himself performing several difficult  
operations under these specialists. Dr.  
Findley was thus able to learn of the  
latest discoveries and methods that are  
in use by the great specialists of the  
country in the treatment of diseases of  
the eye, ear and throat, and as he  
confines himself entirely to this  
practice he expects to be able to give  
his patients the benefit of this knowl-  
edge and to successfully treat the  
most difficult cases. While Dr. Findley  
has had one of the most completely  
equipped offices of the kind in Ore-  
gon, yet new instruments are being  
perfected that are an improvement on  
the old and he brought some of the  
best of these home with him, among  
them being a tonsillotomy, an instru-  
ment for removing the tonsils without  
causing loss of blood. Dr. Findley  
has heretofore had one of these instru-  
ments and selected this one from a  
number of the best that are manu-  
factured. That Grants Pass is able to  
have a specialist, of the standing of  
Dr. Findley, is an advantage to the  
city for in his practice he brings  
many people from a distance here  
thus adding to the material prosperity  
of the town.

Look Out for Purse Snatchers

It is reported that Portland is the  
Mecca for purse snatchers, pick-  
pockets, and sneak thieves of all  
kinds who will find easy operating  
on the Lewis & Clark fair visitors.  
Everyone who visits the fair should  
guard against any possibility of los-  
ing their money, tickets and valu-  
ables in this manner. A. E. Voor-  
hies has a stock of purses and jewel  
bags for ladies which are absolutely  
proof against purse snatchers. They  
range in price from 35 cents to \$2.50  
and every lady who goes to Portland  
this year should have one. See them  
at the Courier Building.

Films—Courier Building.

Sunrise Condensed Milk

That is out to make a reputa-  
tion. Is made at a new condensa-  
tory on Coos Bay, the big dairy  
district of Oregon.

Proved to Be the Best

by the agent who bought a can  
of another brand and opened  
it and one of his and proved his  
was the best.

Is Not Two-thirds Sugar,  
Water and Corn Starch

But is pure cows milk and is  
just as good as cow's milk for  
your coffee. Try it and be con-  
vinced.

INLAND CRACKERS

Made in Spokane from hard  
wheat, which makes the best  
cracker of any wheat. Try a  
package at 25 cents.

Chiles' Grocery

Front st., near Fourth.

Allen & Gilbert-Ramaker Co.
